**1 Vorwort / Foreword** **5**

**2 Wissenschaftlicher Beirat / Scientific Board** **9**

**3 Aufgabenstellung und Struktur / Mission and Structure** **10**

3.1 Aufgabenstellung / Mission . . . . . 10

3.1.1 Mikro-, Nano- und Optoelektronik / Micro-, nano-, and optoelectronics 11

3.1.2 Optimierung und Steuerung technischer Prozesse / Optimization and control of technological processes . . . . . 11

3.1.3 Phasenübergänge / Phase transitions . . . . . 11

3.1.4 Stochastik in Natur- und Wirtschaftswissenschaften / Stochastics in natural sciences and economics . . . . . 12

3.1.5 Strömungs- und Transportprobleme in Kontinuen / Flow and propagation processes in continua . . . . . 12

3.1.6 Numerische Methoden der Analysis und Stochastik / Numerical methods of analysis and stochastics . . . . . 13

3.2 Organisatorische Struktur / Organizational Structure . . . . . 13

3.2.1 Forschungsgruppe Partielle Differentialgleichungen und Variationsgleichungen / Research Group Partial Differential Equations and Variational Equations . . . . . 15

3.2.2 Forschungsgruppe Laserdynamik / Research Group Laser Dynamics . . 15

3.2.3 Forschungsgruppe Numerische Mathematik und Wissenschaftliches Rechnen / Research Group Numerical Mathematics and Scientific Computing 15

3.2.4 Forschungsgruppe Nichtlineare Optimierung und Inverse Probleme / Research Group Nonlinear Optimization and Inverse Problems . . . . . 16

3.2.5 Forschungsgruppe Stochastische Systeme mit Wechselwirkung / Research Group Interacting Random Systems . . . . . 17

3.2.6 Forschungsgruppe Stochastische Algorithmen und Nichtparametrische Statistik / Research Group Stochastic Algorithms and Nonparametric Statistics . . . . . 17

3.2.7 Forschungsgruppe Kontinuumsmechanik / Research Group Continuum Mechanics . . . . . 18

3.2.8 Wissenschaftlich-technische Dienste / Scientific Technical Services . . . 18

**4 Research Results and Applied Projects** **20**

4.1 Research Group Partial Differential Equations and Variational Equations . . . . 20

4.1.1 Overview . . . . . 20

Simulation of pulse propagation in nonlinear optical fibers . . . . . 22

WIAS-TeSCA simulations of laser diodes . . . . . 24

Thermodynamics-based modeling of semiconductor lasers . . . . . 26

A quantum transmitting Schrödinger-Poisson system . . . . . 28

Nonlocal phase separation problems for multicomponent systems . . . . 32

Stationary solutions of a two-dimensional heterogeneous energy model for semiconductor devices near equilibrium . . . . . 35
Hysteresis operators . . . . . 38
Numerical simulation and optimization of SiC single crystal growth by sublimation from the gas phase . . . . . 40
Approximation and optimization of curved mechanical structures . . . . 44
Lyapunov functions for positive linear evolution problems in $C^*$ . . . . 45
4.2 Research Group Laser Dynamics . . . . . 47
4.2.1 Overview . . . . . 47
Dynamics of semiconductor lasers . . . . . 48
Multiscale systems . . . . . 58
4.3 Research Group Numerical Mathematics and Scientific Computing . . . . . 63
4.3.1 Overview . . . . . 63
4.3.2 Projects . . . . . 66
Algorithms for the solution of the semiconductor device equations in three dimensions with application to DEPFET sensor design . . . . . 66
Optimization of the sparse direct solver `PARDISO` for use in the Intel Math Kernel Library . . . . . 69
Three-dimensional Delaunay mesh generation . . . . . 71
Process simulation in gas turbine engineering . . . . . 73
Numerical simulation of non-Newtonian fluids of Oldroyd type . . . . . 76
Two-phase flow with evaporation . . . . . 80
Thermocapillary instability in full-zone liquid bridges . . . . . 82
Melt-flow simulation in Czochralski growth . . . . . 85
Simulation of microwave and laser structures using rectangular grids and tetrahedral nets . . . . . 89
Visualization of numerical simulations and production of presentations . 93
Numerical simulation of Direct Methanol Fuel Cells . . . . . 94
`pdelib` – Algorithms and software components for the numerical solution of partial differential equations . . . . . 96
4.4 Research Group Nonlinear Optimization and Inverse Problems . . . . . 100
4.4.1 Overview . . . . . 100
Optimization of diffractive structures and reconstruction methods for severely ill-posed problems . . . . . 101
Optimal control of surface heat treatments . . . . . 106
Optimization problems related to industrial resource scheduling . . . . . 109
4.5 Research Group Interacting Random Systems . . . . . 111
4.5.1 Overview . . . . . 111
Low temperature phases in models with long-range interactions . . . . . 113
Stochastic dynamics . . . . . 115
Gibbs measures of highly disordered systems . . . . . 118
Microscopic modeling in financial markets . . . . . 119
Interacting catalytic branching processes . . . . . 120
Stochastic models for Boltzmann-type equation . . . . . 123
4.6 Research Group Stochastic Algorithms and Nonparametric Statistics . . . . . 126
4.6.1 Overview . . . . . 126
Statistical data analysis . . . . . 128

Applied mathematical finance . . . . . 140
Numerical analysis of complex stochastic models . . . . . 152
4.7 Research Group Continuum Mechanics . . . . . 164
4.7.1 Overview . . . . . 164
4.7.2 Projects . . . . . 166
Wave properties of four models describing poroelastic media . . . . . 166
Numerical analysis of surface waves on impermeable boundaries of a poroelastic medium . . . . . 168
Phase transitions . . . . . 171
Stability of dewetting polymer films . . . . . 174
Kinetic schemes for selected initial and boundary value problems . . . . 175
4.8 Projects interconnecting research groups . . . . . 178
Quasilinear nonsmooth evolution systems in $L^p$-spaces on three-dimensional domains . . . . . 178
Micro-macro transitions in the atomic chain . . . . . 182

**5 Scientific-technical Services 184**
5.1 Bibliothek / Library . . . . . 184
5.2 Fachinformation / Science Information . . . . . 186
5.3 Rechentechnik / Computer Department . . . . . 188

**6 Publications, Scientific Life 190**
6.1 Publications . . . . . 190
6.1.1 Monographs . . . . . 190
6.1.2 Monographs (to appear) . . . . . 190
6.1.3 Articles in Refereed Journals . . . . . 190
6.1.4 Contributions to Collected Editions . . . . . 199
6.2 Preprints, Reports . . . . . 204
6.2.1 WIAS Preprints Series . . . . . 204
6.2.2 WIAS Reports Series . . . . . 210
6.2.3 WIAS Technical Reports Series . . . . . 210
6.2.4 Preprints/Reports in other Institutions . . . . . 211
6.3 Membership in Editorial Boards . . . . . 212
6.4 Talks, Posters, and Contributions to Exhibitions . . . . . 213
6.4.1 Talks . . . . . 213
6.4.2 Posters . . . . . 227
6.4.3 Contributions to Exhibitions . . . . . 228
6.5 Visits to other Institutions . . . . . 229
6.6 Academic Teaching . . . . . 232
6.7 Calls, Awards and Distinctions, Habilitations, Ph.D. Theses, and Undergraduate-degree Supervision . . . . . 236
6.8 WIAS Conferences, Colloquiums, and Workshops . . . . . 238
6.9 Visiting Scientists . . . . . 240
6.9.1 Guests . . . . . 240
6.9.2 Scholarship Holders . . . . . 245
6.9.3 Doctoral Candidates and Post-docs supervised by WIAS Collaborators . 245
6.10 Guest Talks . . . . . 246

6.11 Membership in Organizing Committees of non-WIAS Meetings . . . . . 254
6.12 Software . . . . . 255
6.13 Grants . . . . . 259
