# Pollination Mechanisms, Reproduction and Plant Breeding

With 77 Figures

Springer-Verlag  
Berlin Heidelberg New York 1977

# Contents

<b>Chapter 1. Introduction</b> . . . . .	<b>1</b>
1.1 Implications of Pollination Mechanisms in Plant Breeding and Crop Production . . . . .	1
1.1.1 Pollination Mechanisms and Breeding of New Cultivars . . . . .	1
1.1.2 Pollination Mechanisms and Cultivar Maintenance . . . . .	2
1.1.3 Pollination Mechanisms and Agricultural Yield . . . . .	3
1.2 Reproduction in Higher Plants . . . . .	3
1.2.1 Historical and General Background . . . . .	3
1.2.1.1 Morphological-Structural Flower Biology . . . . .	4
1.2.1.2 Functional Flower Biology . . . . .	4
1.2.1.3 Correlation between Structure and Function . . . . .	5
1.2.2 Modes of Reproduction . . . . .	5
1.2.2.1 Sexual Reproduction . . . . .	6
1.2.2.1.1 Spatial Separation of Sex Organs as an Outbreeding Device . . . . .	6
1.2.2.1.2 Basic Concepts of Structural Differentiation . . . . .	6
1.2.2.1.3 Models of Floral Differentiation . . . . .	7
1.2.2.1.4 Definitions of Sex Types in Flowering Plants . . . . .	10
1.2.2.1.5 Temporal Separation of Sex Organs as an Outbreeding Device . . . . .	13
1.2.2.2 Asexual Forms of Reproduction . . . . .	14
1.2.2.2.1 Asexual Propagules outside the Floral Region . . . . .	14
1.2.2.2.2 Asexual Propagules within the Floral Region . . . . .	15
1.2.2.3 Distribution of Modes of Reproduction among Cultivated Plants. . . . .	16
1.3 Ecology and Dynamics of Pollination . . . . .	29
1.3.1 Specificity of Flowers and Pollen . . . . .	29
1.3.2 Pollen-Dispersal Agents . . . . .	31
1.3.2.1 Biotic Vectors . . . . .	31
1.3.2.2 Abiotic Vectors . . . . .	34
1.3.3 Timing and Climatic Factors in Pollination Dynamics . . . . .	36
1.3.4 Location and Mass Effects in Pollination Ecology . . . . .	41
1.3.5 Competition Effects in Pollination Dynamics . . . . .	43
1.3.6 Determination of the Natural Cross-Pollination Rate (NCP) . . . . .	43
1.3.6.1 Progeny Testing of Dominants . . . . .	45
1.3.6.2 Progeny Testing of Recessives . . . . .	46

1.3.6.3	Progeny Testing of Heterozygotes . . . . .	46
1.3.6.4	Progeny Testing of Recessives and Heterozygotes . . . . .	47
1.3.7	Artificial Control of Outcrossing . . . . .	48
<b>Chapter 2. Autogamy . . . . .</b>		<b>51</b>
2.1	Evolutionary Aspects of Autogamy . . . . .	51
2.1.1	Strategies for Adjustment of Recombination . . . . .	51
2.1.2	Origin of Mating Systems in Higher Plants . . . . .	52
2.1.3	Variation in Autogamous Populations . . . . .	53
2.2	Mechanism of Autogamy . . . . .	56
2.2.1	Cleistogamy . . . . .	56
2.2.2	Chasmogamic Selfing . . . . .	58
2.3	Management of Pollination in Autogamous Crops . . . . .	62
2.3.1	Emasculation . . . . .	62
2.3.1.1	Mechanical Removal of Microsporophylls . . . . .	62
2.3.1.2	Male Gametocide . . . . .	66
2.3.1.3	Circumvention of Emasculation Requirements . . . . .	69
2.3.2	Controlled Pollination . . . . .	70
2.3.2.1	Isolation . . . . .	70
2.3.2.2	Pollen Collection and Storage . . . . .	70
2.3.2.3	Pollen Transfer Methods . . . . .	73
2.3.2.3.1	Utilization of Natural Pollen Vectors . . . . .	73
2.3.2.3.2	Forced Pollination . . . . .	76
<b>Chapter 3. Allogamy . . . . .</b>		<b>79</b>
3.1	Sexual Reproduction—Structures and Functions . . . . .	79
3.1.1	The Anther and the Male Gametophyte . . . . .	79
3.1.1.1	Differentiation of the Anther . . . . .	79
3.1.1.2	The Tapetum . . . . .	80
3.1.1.3	Development of the Sporogeneous Tissue . . . . .	81
3.1.1.4	Microsporogenesis . . . . .	82
3.1.1.5	From Microspore to Pollen Grain . . . . .	83
3.1.2	Androgenesis: Production of Haploid Plants by Anther and Pollen Culture . . . . .	85
3.1.2.1	Haploid Plants—Occurrence, Induction, and Identifi- cation . . . . .	85
3.1.2.2	The Production of Haploid Callus and Embryoids by Anther and Pollen Culture . . . . .	86
3.1.2.3	Pathways of Pollen Embryogenesis . . . . .	89
3.1.2.4	Factors Affecting Androgenesis . . . . .	92
3.1.2.4.1	Culture Conditions . . . . .	92
3.1.2.4.2	Donor Plants . . . . .	92
3.1.2.4.3	Pollen Age . . . . .	92
3.1.2.4.4	Anther Stage and Ploidy . . . . .	93
3.1.2.5	Application of Androgenesis for Breeding and Genetic Studies . . . . .	93

3.1.3	The Pistil and the Female Gametophyte . . . . .	96
3.1.3.1	The Pistil . . . . .	97
3.1.3.2	The Female Gametophyte . . . . .	98
3.1.4	Fertilization . . . . .	100
3.1.4.1	Contact between Pollen and Stigma . . . . .	100
3.1.4.2	Pollen Germination . . . . .	101
3.1.4.3	Pollen Tube Discharge and Double Fertilization . . . . .	102
3.1.5	Sexual Reproduction in Conifers . . . . .	103
3.2	Control and Modification of Sex . . . . .	104
3.2.1	The Genetic Control of Sex Determination . . . . .	104
3.2.1.1	General Considerations Concerning the Genetic Control of Dioecism . . . . .	105
3.2.1.2	Artificial Dioecism in <i>Zea mays</i> . . . . .	107
3.2.1.3	Artificial Dioecism Caused by Suppressive Genes—Linkage between Genes as a Prerequisite for Sex Dimorphism . . . . .	109
3.2.1.4	Chromosomal Control of Sex Determination . . . . .	110
3.2.1.5	Main Methods for the Study of the Genetics and Cytology of Sex Determination . . . . .	112
3.2.1.6	Genetic Regulation of Sex: Representative Examples . . . . .	113
3.2.1.6.1	The Active Y Chromosome System . . . . .	113
3.2.1.6.2	The X-Autosomal Balance System . . . . .	118
3.2.1.7	Genetics of Sex Determination in Some Economic Crops . . . . .	119
3.2.2	Modifications of Sex Expression . . . . .	120
3.2.2.1	Introduction . . . . .	120
3.2.2.2	Mineral Nutrition and Edaphic Factors . . . . .	127
3.2.2.3	Light . . . . .	128
3.2.2.4	Temperature . . . . .	132
3.2.2.5	Chemical Agents . . . . .	134
3.2.2.5.1	Auxins and Related Compounds . . . . .	135
3.2.2.5.2	Gibberellins . . . . .	137
3.2.2.5.3	Kinins . . . . .	139
3.2.3	Sex Expression in Some Economic Crops and its Application to Breeding and Crop Improvement . . . . .	141
3.2.3.1	The Cucumber and Other Cucurbit Crops . . . . .	141
3.2.3.1.1	Patterns of Sex Expression . . . . .	141
3.2.3.1.2	Effects of Day Length and Temperature on Flowering and Sex Expression . . . . .	145
3.2.3.1.3	Effects of Growth Regulators . . . . .	147
3.2.3.1.4	Inheritance of Sex Expression and Breeding Procedures . . . . .	151
3.2.3.1.5	Scheme of Sex Expression in Cucumber . . . . .	157
3.2.3.2	Hemp ( <i>Cannabis sativa</i> ) . . . . .	157
3.2.3.3	Maize ( <i>Zea mays</i> ) . . . . .	159
3.2.3.3.1	Reproductive Morphology . . . . .	160
3.2.3.3.2	Environmentally Induced Sex Modification . . . . .	160

3.2.3.3.3	Sex Modification by Chemical Agents . . . . .	161
3.2.3.3.4	Inheritance of Sex Expression . . . . .	163
3.3	Incompatibility . . . . .	163
3.3.1	Genetics of Incompatibility . . . . .	165
3.3.1.1	Gametophytic Incompatibility . . . . .	165
3.3.1.1.1	One Multiallelic S Locus . . . . .	165
3.3.1.1.2	Two Multiallelic S Loci . . . . .	169
3.3.1.1.3	Three or More S Loci . . . . .	171
3.3.1.2	Sporophytic Incompatibility . . . . .	172
3.3.1.2.1	Heteromorphic Incompatibility . . . . .	173
3.3.1.2.2	Homomorphic Incompatibility . . . . .	176
3.3.2	Pollen-Pistil Interaction . . . . .	179
3.3.2.1	Pollen Cytology and Pollen-Stigma Interaction . . . . .	179
3.3.2.2	Pollen Tube-Style Interaction . . . . .	183
3.3.2.3	Pollen Tube-Ovule Interaction . . . . .	184
3.3.3	Incompatibility, Crop Production, and Breeding . . . . .	184
3.3.3.1	Transfer of Incompatibility into Cultivars . . . . .	185
3.3.3.2	Permanent Elimination of Incompatibility . . . . .	186
3.3.3.3	Surmounting the Incompatibility Barrier . . . . .	188
3.3.3.3.1	Treatment of Pollen . . . . .	188
3.3.3.3.2	Bud Pollination . . . . .	188
3.3.3.3.3	Delayed Pollination . . . . .	188
3.3.3.3.4	Heat Treatment . . . . .	188
3.3.3.3.5	Surgical Techniques . . . . .	189
3.3.3.3.6	Double Fertilization . . . . .	189
3.3.3.3.7	Other Methods . . . . .	189
3.3.3.4	Hybrid Seed Production . . . . .	190
3.3.3.4.1	Characteristics of the Gametophytic and Sporophytic Incompatibility Systems which are Related to Hybrid Seed Production . . . . .	190
3.3.3.4.2	Hybrid Seed Production in <i>Brassica</i> and <i>Raphanus</i> . . . . .	191
3.3.3.4.3	Problems in Breeding Aimed at Hybrid Seed Produc- tion . . . . .	195
3.4	Male Sterility . . . . .	196
3.4.1	Gynodioecy: Male Sterility in Natural and Artificial Populations . . . . .	196
3.4.1.1	Male Sterility as an Outbreeding Mechanism in Gynodioecious Species . . . . .	196
3.4.1.2	Nuclear Male Sterility Genes in Cultivars . . . . .	199
3.4.1.3	Male-Sterility-Inducing Plasmatypes in Cultivated Plants . . . . .	201
3.4.1.4	Utilization of Gynodioecy in Plant Breeding . . . . .	203
3.4.2	Inheritance of Male Sterility . . . . .	204
3.4.2.1	Genic Male Sterility (Mendelian Male Sterility) . . . . .	204
3.4.2.2	Cytoplasmic and Gene-Cytoplasmic Male Sterility . . . . .	206
3.4.3	Structural, Developmental, and Biochemical Charac- terization of Male Sterility . . . . .	209

3.4.3.1	Developmental Modifications Leading to Breakdown in Microgametogenesis . . . . .	209
3.4.3.1.1	Modifications in the Structural Differentiation of the Stamen . . . . .	210
3.4.3.1.2	Faulty Differentiation of the Anther . . . . .	212
3.4.3.1.3	Breakdown in Microsporogenesis . . . . .	214
3.4.3.1.4	Abortion of the Microgametophyte. . . . .	216
3.4.3.1.5	Functional Male Sterility . . . . .	219
3.4.3.2	Biochemistry of Male Sterility . . . . .	219
3.4.3.3	Male Sterility Genes and Their Action . . . . .	221
3.4.3.3.1	Site of Male Sterility Factors . . . . .	221
3.4.3.3.2	Pleiotropic Effects . . . . .	224
3.4.4	Utilization of Male Sterility in Plant Breeding . . . . .	225
3.4.4.1	Comparison of Hybrid Production Using Genic, Cytoplasmic and Gene-Cytoplasmic Male Sterility . . . . .	226
3.4.4.1.1	Genic Male Sterility . . . . .	226
3.4.4.1.2	Cytoplasmic Male Sterility . . . . .	227
3.4.4.1.3	Gene-Cytoplasmic Male Sterility . . . . .	227
3.4.4.2	Application of Genic Male Sterility. . . . .	228
3.4.4.2.1	Genetic and Field Management Programs to Provide a Homogeneous Stand of the Genic Male Sterile Seed Parent . . . . .	228
3.4.4.2.2	Pollination Control . . . . .	230
3.4.4.3	Use of Gene-Cytoplasmic Male Sterility. . . . .	233
