# Cellular and Molecular Aspects of the Regulation of the Heart

Proceedings of the Symposium held in Berlin  
from 26.—28. August 1982

The Symposium was organized by

The Central Institute of Heart and Circulation Research  
of the Academy of Sciences of the GDR

The Society of Cardiology and Angiology of the GDR

The Biochemical Society of the GDR

Edited by

Liane Will-Shahab

Ernst-Georg Krause

Wolfgang Schulze

AKADEMIE-VERLAG · BERLIN 1984

# Contents

## *I. Membranes and contractile proteins*

LEVITSKY, D. O., M. K. ALIEV, D. S. BENEVOLENSKY and T. S. LEVCHENKO (Moscow): Properties of $\text{Ca}^{2+}$ -ATPase in cardiac sarcoplasmic reticulum . . . . .	15
SUKO, J., B. PLANK, W. WYSKOVSKY and G. HELLMANN (Vienna): Calcium uptake and phosphorylation in sarcoplasmic reticulum: Calmodulin effect in cardiac sarcoplasmic reticulum and stopped flow fluorescence measurement of $\text{Mg} \cdot \text{E}^+ - \text{P}$ in skeletal muscle sarcoplasmic reticulum . . . . .	23
ENGLAND, P., D. MILLS, H. T. PASK and S. A. JAECKOCKE (Bristol): The phosphorylation of cardiac contractile proteins. . . . .	29
SAMUEL, J. L., J. J. MERCADIER, Y. LECARFENTIER, A. M. LOMPRÉ, K. SCHWARTZ and B. SWYNGHEDAÛW (Paris): Regulation of cardiac function during chronic overload. Myosin isoenzyme redistribution . . . . .	35
SAKS, V. A., G. B. CHERNOUSOVA, N. V. LYULINA, Z. A. KHUCHUA, A. N. PREOBRAZENSKIY and R. VENTURA-CLAPIER (Moscow/Orsay): Role of multienzyme complexes in intracellular compartmentation of adenine nucleotides and in regulation of cardiac energy metabolism . . . . .	41

## *II. Ion movements*

HERING, S., A. I. UNDOVINAS and R. BODEWEI (Berlin/Moscow): Frequency- and voltage-dependent block of sodium channels in single rat myocardial cells treated with mexiletine . . . . .	51
NILIUS, B. (Halle): Pacing-dependent properties of the slow inward current in the atrial myocardium . . . . .	57
SCHOLZ, H. and R. BRÜCKNER (Hamburg): Mechanical and electrophysiological effects of $\alpha$ -adrenoceptor stimulating drugs in the heart . . . . .	67

## *III. $\text{Ca}^{2+}$ transport and protein phosphorylation*

GROSSE, R., E. SPITZER, K. ECKERT and F. BÖHMER (Berlin): Regulation of intracellular $\text{Ca}^{2+}$ -concentration in excitable and nonexcitable tissues . . . . .	75
CARAFOLI, E. (Zürich): The regulation of the $\text{Ca}^{2+}$ transporting systems of heart plasma membrane . . . . .	87
KURSKY, M. D. and Z. D. VOROBETZ (Kiev): Effect of cAMP-dependent phosphorylation on passive $\text{Ca}^{2+}$ transport in myocardial sarcolemma . . . . .	95
ZIEGELHÖFFER, A., M. B. ANAND-SRIVASTAVA and N. S. DHALLA (Bratislava/Winnipeg): Possible role of $\text{Ca}^{2+}$ -ATPase in mechanism of calcium-influx through cardiac sarcolemma . . . . .	99
LAMERS, J. M. J. (Rotterdam): $\text{Ca}^{2+}$ -calmodulin and cyclic AMP-dependent phosphorylation of cardiac sarcolemma . . . . .	107

WILL, H., T. LEVCHENKO and C. KEMSIES (Berlin/Moscow): Subunit analysis and cross-linking of phospholamban in cardiac sarcoplasmic reticulum and sarcolemma . . . . . 121

#### IV. *Metabolic aspects of myocardial ischaemia*

PANAGIA, V., J. A. C. HARROW, G. SINGH, A. GUERIN and N. S. DHALLA (Winnipeg): Myocardial membrane changes due to ischaemia-reperfusion injury in dogs treated with or without acebutolol . . . . .	133
KAMMERMEIER, H. (Aachen): Free energy of ATP-hydrolysis as a limiting factor of actin-myosin interaction and ion pumping in early failure of the heart . . . . .	141
KRAUSE, E.-G., P. J. ENGLAND and S. BARTEL (Berlin/Bristol): Isoproterenol-induced protein phosphorylation in the isolated ischaemic rat heart . . . . .	149
FERRARI, R. and O. VISIOLI (Parma): The functional and metabolical consequence of myocardial ischaemia and reperfusion. Effects of verapamil . . . . .	157
MOSINGER, B. (Prague): The role of calcium in myocardial ischaemia . . . . .	169
METSÄ-KETELÄ, T., P. VUORINEN and K. LAUSTIOLA (Tampere): The effect of cyclic GMP-elevating nitrogenous compounds on myocardial glycolysis . . . . .	177
SZEKERES, L., I. LEPRÁN, I. KRASSÓI, J. PATARICZA, E. UDVARY, M. KOLTAI and P. L. VÁGHY (Szeged): Possible pharmacological measures for the prevention of sudden death in acute local myocardial ischaemia . . . . .	185
MEERSON, F. Z. (Moscow): Stress damages of the heart: Pathogenesis and possibilities of prevention and removing . . . . .	193
GUDBJARNASON, S., A. EMILSSON and A. GUDMUNDSDOTTIR (Reykjavik): Alterations in fatty acyl chain composition of myocardial phospholipids during stress . . . . .	203
MONTFOORT, A., C. C. M. RUTTEN-VAN BEYSTERVEELD and M. R. WORTELBOER (Rotterdam): Molecular species of phosphatidylethanolamine in rat and mouse heart . . . . .	207

#### V. *Communication presented as posters*

PELOUCH, V., B. OŠTÁDAL and J. PROCHÁZKA (Prag): The effect of hypoxia on the structural and enzymatic properties of cardiac myosin . . . . .	215
OŠTÁDAL, B., T. JANATOVÁ, V. PELOUCH and E.-G. KRAUSE (Prag): A possible role of cAMP in the cardiotoxicity of catecholamines during embryonic life . . . . .	217
PORZIG, H., C. BECKER and H. REUTER (Bern): Properties and regulation of $\beta$ -adrenoceptors in living cardiac cells . . . . .	221
SCHULZE, W. (Berlin): Ischaemia-induced changes of the cardiac adenylate cyclase system I. Cytochemical studies of adenylate cyclase activity . . . . .	223
WILL-SHAHAB, L. and I. KÜTTNER (Berlin): Ischaemia-induced changes of the cardiac adenylate cyclase activity. II. Reversible inhibition of adenylate cyclase . . . . .	227
HYNIE, S. (Prag): Adenylate cyclase activity in the heart and some other tissues treated by $\alpha$ -chymotrypsin . . . . .	229
WALLUKAT, G., L. WILL-SHAHAB and A. WOLLENBERGER (Berlin): Supersensitivity to isoprenaline in cultured rat myocardial cells exposed to L(+)-lactate and pyruvate . . . . .	233
BARTEL, S., E.-G. KRAUSE and J. G. REICH (Berlin): Activation of cyclic AMP-dependent protein kinase in the ischaemic myocardium . . . . .	237
LÖWE, H., I. E. BLASIG, C. HENNIG and B. OCZKO (Berlin): Myocardial protection in vitro by o-( $\beta$ -hydroxyethyl)-rutoside a flavone derivate and by mannitol . . . . .	241
BLASIG, I. E., P. MUSCHICK, E. ROHDE, R. RICHTER, D. MODERSOHN and H. LÖWE (Berlin): Can blood flow reduction after isoproterenol overdosage induce myocardial ischaemia? . . . . .	243
GOOS, H., K.-F. LINDENAU, E.-G. KRAUSE, J. NÖHRING, S. GEHLHAR, J. SCHINKE, C. WAGENKNECHT, H. DAVID, J. LIEBETRUTH, B. JOŇAS and R. A. PARSI (Berlin): The influence of prostacyclin on experimental myocardial infarction in dogs . . . . .	247
RABITZSCH, G., H. GOOS, J. NÖHRING, J. LEMBCKE, K.-F. LINDENAU, E.-G. KRAUSE, R.-A.	

PARSI and H. HEINE (Berlin): Glycogen phosphorylase b activity in human serum after acute myocardial infarction and coronary bypass surgery . . . . .	251
FÖRSTER, W., I. HEINROTH, H.-U. BLOCK, P. MENTZ and K. PÖNICKE (Halle): Influence of $\beta$ -receptor blocking drugs on prostacyclin and thromboxane synthesis . . . . .	255
SCHIRPKA, B. (Berlin): In vivo experiments on phospholipid metabolism in rat heart. . . . .	259
TITLBACH, O., H. MAREK, L. WILL-SHAHAB, P. FEYER, L. BÖLKE and R. FIEBER (Leipzig/Berlin): Influence of drugs, hormones and ischaemia on glucose uptake, CK release and energy potential of rabbit-Langendorff hearts . . . . .	263
BRASELMANN, H., W. KRAUSE and H. GUSKI (Berlin): Biochemical and electron microscopic findings on the myocardium of trained and untrained rats after infarction . . . . .	265
POGÁTSA, G. and M. Z. KOLTAI (Budapest): The role of altered diabetic coronary reactivity in myocardial ischaemia . . . . .	269
LEHMANN, I., R. A. PARSI, B. PAPIES, E. LUDWIG, M. L. KÖNIG, M. NAGI and C. WAGENKNECHT (Berlin): Enzyme pattern in endomyocardial biopsies . . . . .	275
CAFFIER, G. and R. M. KRÜNES (Berlin): Action of free fatty acids on contractility and action potential of the heart . . . . .	279
WUSSLING, M. and G. SZYMANSKI (Halle): The influence of $Ca^{2+}$ and passive tension on relaxation phenomena in the mammalian myocardium . . . . .	281
GÜNTHER, J., E. STORCH, E. KUTSCHERSKIJ and R. VETTER (Berlin): Lipid-diet induced changes of the Ca regulation in the rabbit myocardium . . . . .	285
HERRMANN, H.-J., V. MORITZ, T. HECHT, C. NORDEN and P. MÜHLIG (Berlin): Appearances of metabolically influenced long-term vasotonus changes in coronary microvessels of rats. . . . .	289
VETTER, R., H. HAASE and H. WILL (Berlin): Potentiating effect of calmodulin and cyclic AMP-dependent protein kinase on the $Ca^{2+}$ -pump of cardiac sarcolemma . . . . .	293
HOLTZHAUER, M., H. SYDOW and H. WILL (Berlin): Characterization of a phosphorylated protein-lipid complex of heart sarcolemma . . . . .	297
WETZKER, R., R. KLINGER, I. FLEISCHER and H. FRUNDER (Jena): Activation of ( $Ca^{2+} + Mg^{2+}$ ) ATPase of erythrocyte membranes by trypsin, fatty acids and $Ca^{2+}$ . A comparison with calmodulin action . . . . .	301
SCHÖNFELD, P., D. PETZOLD and W. KUNZ (Magdeburg): Simultaneous oxidation of pyruvate and fatty acids by rat heart mitochondria at limiting substrate supply. . . . .	305
TAKÁTS, I. and L. SZEKERES (Szeged): Protecting effect of adrenergic $\beta$ -blocking agents on the energy metabolism of ischaemic myocardium . . . . .	309
VÁGHY, P. L., M. A. MATLIS and A. SCHWARTZ (Szeged): Diltiazem is a selective inhibitor of the $Na^+/Ca^{2+}$ antiporter in heart mitochondria . . . . .	313
PFEIFFER, C. and Ch. HUCKSTORF (Rostock): Rest versus frequency loaded contractions in the myocardium of rats . . . . .	319
WUSSLING, M. and G. SZYMANSKI (Halle): Influence of noradrenaline and caffeine on potentiation and staircase phenomena . . . . .	323
MÖRITZ, K.-U., R. FERMUM and U. TOFELDE (Greifswald): Dissociation of isoproterenol-induced cAMP-increase and vascular relaxation in isolated coronary arteries under the influence of DFP . . . . .	327
HOFFMANN, P., P. MENTZ and W. FÖRSTER (Halle): Influence of dietary linoleate on the adrenergic response of isolated rat hearts . . . . .	329
GELLERICH, F. N., and SCHLAME (Magdeburg): Importance of mitochondrial creatine kinase localization for securing the stimulation of mitochondrial ATP-production . . . . .	333
GOLA, G., K. KOTHE, K.-F. LINDENAU, A. LUN, H. WARNKE and C. WAGENKNECHT (Berlin): Metabolic pattern in the reperfusion period of different cardiovascular operations in the coronary sinus . . . . .	337
WOLLENBERGER, A.: Closing remarks . . . . .	341
