

# ATHERO- SCLEROSIS IV :

FG

Proceedings of the  
Fourth International Symposium

Edited by

G. SCHESSLER Y. GOTO Y. HATA G. KLOSE

With 308 Figures and 185 Tables

Springer-Verlag

Berlin Heidelberg New York 1977

*Opening Address: Statistical Trend in the Incidence of Cerebrovascular Accidents and Coronary Heart Disease in Japan (K. Oshima)* . . . . . XV

*Keynote Address: Atherosclerosis, the Main Problem of the Industrialized Societies (G. Schettler)* . . . . . XXI

List of Authors . . . . . XXXIX

**I. Relation Between Arterial Wall and Risk Factors for Coronary Heart Disease  
Connective Tissue and Immunological Mechanism on Atherosclerosis**

Arterial Endothelial Permeability to Macromolecules (C. J. Schwartz, R. G. Gerrity, L. J. Lewis, G. M. Chisolm, K. N. Bretherton) . . . . . 1

The Maintenance of Endothelial Integrity (J. C. F. Poole) . . . . . 12

Arterial Smooth Muscle Cells in Atherogenesis: Births, Deaths and Clonal Phenomena (W. A. Thomas, J. M. Reiner, R. A. Florentin, K. Janakidevi, K. J. Lee) . . . . . 16

Lipoproteins — Steady State Aspects (Elspeth B. Smith) . . . . . 24

Connective Tissue in Atherosclerosis (M. Daria Haust) . . . . . 30

Immunologic Mechanism of Atherosclerosis (J. L. Beaumont, V. Beaumont) . . . . . 36

*Workshop 1. Dynamics of Lipoproteins and Lipids in the Arterial Wall (Chairmen: A. J. Day, K. Wada)*

Introduction (A. J. Day) . . . . . 45

Uptake of Serum Lipoproteins into the Arterial Wall (T. Yasugi) . . . . . 46

Enzymes Catalyzing Phospholipid-Dependent Transacylations in the Arterial Wall (J. Patelski, M. Piorunska-Stolzmann, A. Waliszewska) . . . . . 48

Heparin-Manganese Precipitability of Canine Lipoproteins as Correlated With Binding to the Cell Surface Receptors on Fibroblasts (R. W. Mahley, T. L. Innerarity) . . . . . 52

Synthesis and Removal of Free Cholesterol and of Cholesterol Ester by Smooth Muscle Cells in Tissue Culture (A. J. Day, M. Sheers, S. Kar) . . . . . 57

Abstracts . . . . . 63

*Workshop 2. Hypertension, Arteriolar Disease and Atherosclerosis (Chairmen: H. Jellinek, G. Ooneda)*

Possibilities of Hyaline Formation in the Vessel Wall, Light- and Electron Microscopic Structure: Problems of the Nomenclature (H. Jellinek) . . . . . 73

Hypertension, Stroke and Atherogenesis in Experimental Models (Y. Yamori, R. Horie, M. Ohtaka, Y. Nava, M. Fukase) . . . . . 79

Hypertension and Cerebral Atherosclerosis (Y. Yoshida, H. Shinkai, T. Sekiguchi, G. Ooneda) . . . . . 83

Abstracts . . . . . 88

<i>Workshop 3. Epidemiology of Atherosclerosis and Geographic Differences in Risk Factors (Chairmen: J. P. Strong, T. Omae)</i>	
An Introduction to the Epidemiology of Atherosclerosis (J. P. Strong)	92
Association Between Risk Factors and Atherosclerotic Lesions Based on Autopsy Findings in the Oslo Study: A Preliminary Report (L. A. Solberg, I. Hjermann, A. Helgeland, I. Holme, P. A. Leren, J. P. Strong)	98
Atherosclerosis and Risk Factors (N. H. Sternby)	102
Coronary Risk Factors in Adults: The Influence of Nutrition in Early Life (M. Hanefeld, W. Leonhardt, H. Haller)	104
The Relation of Ante Mortem Factors to Atherosclerosis at Necropsy (M. R. Garcia-Palmieri, M. I. Castillo, M. C. Oalman, P. D. Sorlie, R. Costas, Jr.)	108
Atherosclerosis and Its Risk Factors in the Hawaiian Japanese (G. N. Stemmermann, G. G. Rhoads, W. C. Blackwelder)	113
Atherosclerosis in Relation to Personal Attributes of a Japanese Population in Homes for the Aged (S. Hatano, T. Matsuzaki)	116
Frequency of Coronary and Peripheral Artery Disease in Hyperlipoproteinemia (G. Crepaldi)	120
Concluding Remarks on the Epidemiology of Atherosclerosis (T. Omae)	124
Abstracts	125

<i>Workshop 4. Measurement of Triglyceride Turnover (Chairmen: E. Nikkilä, I. Fukui)</i>	
Kinetics of VLDL Subfractions (G. Steiner, D. Streja)	129
Comparison of Methods of Plasma Triglyceride Turnover (A. Chait, J. J. Albers, J. D. Brunzell)	132
The Intravenous Fat Tolerance Test With Intralipid-Validity, Applications, and Limitations (S. Rössner)	137
Triglyceride Turnover in Diabetic States of Dogs (H. Nakamura)	141
Abstracts	146

<i>Workshop 5. Smoking and Atherosclerosis (Chairmen: H. C. McGill, N. Kimura)</i>	
Epidemiological Research in Japan on Smoking and Cardiovascular Diseases (Y. Nakayama)	149
Atherogenic Compounds of Tobacco Smoke (P. Astrup)	156
Abnormalities Potentially Mediating the Effect of Cigarette Smoking on Atherosclerosis (H. C. McGill, Jr.)	161
Oxygen Transport and Smoking (J. L. Gainer)	165
The Evidence for Nicotine as an Etiological Factor in Cardiovascular Disease (CVD) (H. Schievelbein)	167
Abstracts	170

## II. Lipoproteins

Structure of the Plasma Lipoproteins—A Review (A. M. Gotto, R. L. Jackson)	177
Cellular Catabolism of Serum Lipoproteins (O. Stein, V. Ebin, H. Bar-On, Y. Stein)	189
Synthesis and Secretion of Plasma Lipoproteins and Apo-Lipoproteins (R. J. Havel, R. L. Hamilton)	192
Dynamics of Lipoprotein Interconversion (S. Eisenberg)	197
Lipoprotein Metabolism in Tissue Culture (Y. Stein, O. Stein)	205
Current Concepts of Hyperlipoproteinemia (A. M. Gotto, Jr.)	209

<i>Workshop 6. Lipoproteins (Chairmen: A. M. Scanu, C. Naito)</i>	
Electroimmunoassays of Serum Apolipoproteins in Normolipidemic Subjects and Patients With Primary Hyperlipoproteinemias (P. Alaupovic, M. D. Curry, W. J. McConathy) . . . . .	220
Lipid Organization in Human Plasma Low-Density Lipoproteins (G. G. Shipley, R. J. Deckelbaum, D. Atkinson, D. M. Small) . . . . .	222
Formation and Structural Properties of Lipoprotein-X (D. Seidel) . . . . .	228
Isothermal Calorimetric Studies on Human HDL Apolipoproteins (H. Peeters, M. Rosseneu) . . . . .	233
High-Density Lipoprotein Abnormalities Associated With Disease (G. Assmann) . . . . .	238
On the Role of Apolipoprotein A-I in the Structure of Serum High-Density Lipoproteins (HDL) (Mary C. Ritter, A. M. Scanu) . . . . .	241
Abstracts . . . . .	247

<i>Workshop 7. Animal Models of Atherosclerosis and Regression (Chairmen: D. Vesselinovitch, T. Nakashima)</i>	
Requirement for Regression Studies in Animal Models (D. Vesselinovitch, R. W. Wissler) . . . . .	259
The Effect of Strenuous Exercise on Plasma Lipids and Atherosclerosis on Cholesterol-Fed Cockerels (H. Y. C. Wong, F. B. Johnson) . . . . .	263
Changes of Cyclic Nucleotides in the Regressive Course of Experimental Atherosclerosis and Their Modification by Sex Hormones and Phthalazinol (F. Numano) . . . . .	268
Model of Arterial Injury by Balloon De-Endothelialization: Reappraisal, Improvement, and Application to Measurement of Endothelial Growth (W. Insull, C. C. Chidi) . . . . .	273
Reversibility of Atherosclerosis in Pyridoxine-Deficient Monkeys (F. Kuzuya) . . . . .	275
Regression of Atherosclerosis at Serum Cholesterol Concentrations Achievable in Man (M. G. Bond, B. C. Bullock, N. D. M. Lehner, T. B. Clarkson) . . . . .	278
Aortic Atherosclerosis of Primates (N. D. M. Lehner, W. D. Wagner, B. C. Bullock, M. G. Bond) . . . . .	280
Abstracts . . . . .	286

<i>Workshop 8. Cholesterol Metabolism (Chairmen: D. S. Goodman, Y. Yamamura)</i>	
Cholesterol Metabolism in High- and Low-Responding Rhesus Monkeys (A. K. Bhattacharyya, D. A. Eggen) . . . . .	293
Relationships Between Metabolism of Cholesterol and the Turnover of Plasma Lipoproteins (H. S. Sodhi, B. J. Kudchodkar, D. T. Mason, N. Borhani) . . . . .	298
Studies on the Mechanism of Development of Hypercholesterolemia: Effect of Aging and Genetic Factors in Animal Models (N. Takeuchi) . . . . .	301
Cholesterol Synthesis in Slowly Exchangeable Cholesterol Pool in Man (T. A. Miettinen) . . . . .	305
Bile Acid Metabolism Under Basal and Experimental Conditions in Normo- and Hyperlipidemic Subjects (K. Hellström) . . . . .	308
Cholesterol Turnover in Metabolism in Normal and Hyperlipidemic Humans (D. S. Goodman, F. R. Smith, R. P. Noble, R. B. Dell) . . . . .	311
Abstracts . . . . .	315

<i>Workshop 9. Hormones, Lipoprotein Lipase and Atherosclerosis (Chairmen: H. Greten, H. Orimo)</i>	
Hormones, Lipoprotein Lipase and Atherosclerosis (H. Greten) . . . . .	322

Molecular Aspects of Hepatic Triglyceride Lipase and Lipoprotein Lipase From Human Post-Heparin Plasma (J. Augustin, H. Freeze, W. V. Brown) . . . . .	322
The Interactions of Lipoprotein Lipase With Cofactor Proteins, Lipid Substrate, and Certain Sulfated Polysaccharides (T. Olivecrona, G. Bengtsson) . . . . .	325
Purified Monoacylglycerol Hydrolase From Human Post-Heparin Plasma: Characteristics and Role in the Reaction Catalyzed by Lipoprotein Lipase (A. Noma) . . . . .	328
Measurement of Post-Heparin Plasma Lipoprotein Lipase and Hepatic Triglyceride Lipase Activities and Their Relation to Plasma Triglyceride Metabolism (C. Ehnholm, J. K. Huttunen, P. K. J. Kinnunen, E. A. Nikkilä) . . . . .	332
Hormonal Regulation of Human Adipose Tissue Lipoprotein Lipase (J. D. Brunzell, A. P. Goldberg) . . . . .	336
Post-Heparin Triglyceride Activity (PHTGLA) in Diabetic Rats (H. Orimo, T. Nakano, A. Noma) . . . . .	342
Abstracts . . . . .	344

*Workshop 10. Collagen, Elastin, Mucopolysaccharides in Atherosclerosis (Chairmen: W. H. Hauss, M. Nakamura)*

Influence of Muscular Training on Arterial Wall Cell Reaction (W. H. Hauss) . . . . .	350
Complex Carbohydrates of Arterial Wall Connective Tissue (B. Radhakrishnamurthy, G. S. Berenson, E. R. Dalferes, Jr.) . . . . .	353
New Results on Gag and Collagen in Atherosclerosis (J. Lindner, K. Grasedyck, B. Schütte) . . . . .	357
Functional Relations Among Cells and Fibers of the Aortic Media: Microanatomic and Biosynthetic Findings (S. Glagov, J. M. Clark, D. Y. M. Leung, M. B. Mathews) . . . . .	362
Abstracts . . . . .	366

**III. Regression of Atherosclerosis**

Animal Models of Regression (R. W. Wissler, D. Vesselinovitch) . . . . .	377
Methods to Accelerate Regression (K. T. Lee, A. S. Daoud, Y. S. Kwak) . . . . .	386
The Mechanism of Atherosclerosis Regression (H. C. Sary, D. A. Eggen, J. P. Strong) . . . . .	394
Connective Tissue Changes in Regression (M. L. Armstrong) . . . . .	405
Angiographic Evidence of Atherosclerosis Regression in Man (D. H. Blankenhorn) . . . . .	414
Enhancement of Regression of Human Atherosclerosis (T. Shimamoto) . . . . .	422

*Workshop 11. Nutritional Factors and Atherosclerosis (Chairmen: D. Kritchevsky, Y. Goto)*

Influence of all Nutrients on Atherosclerosis (D. Kritchevsky) . . . . .	437
Influence of Diet Factors on Plasma Lipids in Ischemic Heart Disease (S. Nanbu, N. Kimura, H. Toshima, M. Ageta, S. Kariya, H. Mae, T. Kamogawa) . . . . .	438
Practical Considerations of Changing Dietary Cholesterol and Fat (P. J. Nestel) . . . . .	442
Dietary Protein, Hypercholesterolemia and Atherosclerosis (K. K. Carroll, M. W. Huff, D. C. K. Roberts) . . . . .	445
Soybean Protein Diet in the Treatment of Hypercholesterolemia (C. R. Sirtori, E. Agradi, F. Conti, O. Mantero, E. Gatti) . . . . .	448
Abstracts . . . . .	454

**IV. Epidemiology**

Epidemiological Studies of Atherosclerotic Disease in Japan (N. Kimura) . . . . .	461
Highlights of Epidemiological Research in Western Countries (F. H. Epstein) . . . . .	471
Abstracts . . . . .	479

## V. Pediatric Aspects of Atherosclerosis

Risk Factors in Children — The Early Natural History of Atherosclerosis (G. S. Berenson) . . . . .	489
Morphologic Aspect of Childhood Atherosclerosis (L. C. Blieden, N. Neufeld) . . . . .	498
Abstracts . . . . .	506

## VI. Treatment of Human Atherosclerosis

Dietary Management of Atherosclerosis (G. Schlierf, P. Oster, D. Seidel, A. Raetzer, B. Schellenberg, C. C. Heuck, R. L. Wicklein) . . . . .	511
Drugs and Atherosclerosis (R. Paoletti, A. Catapano, G. C. Ghiselli, C. R. Sirtori) . . . . .	517
Metabolic Management of Hyperlipidemia (H. Buchwald, I. J. Guzman, R. B. Moore, R. L. Varco) . . . . .	528
Metabolic Aspects of the Management of Obliterative Atherosclerosis (B. Pernow) . . . . .	536
Abstracts . . . . .	543

### *Workshop 12. Hyperlipoproteinemias (Chairmen: J. Davignon, S. Yamazaki)*

Mechanisms of Hyperlipoproteinemia Derived From Multicompartmental Analysis of Very Low-Density Apolipoprotein B-Kinetics (P. J. Nestel) . . . . .	559
On the Significance of Typing of Hyperlipoproteinemia in Primary Asymptomatic Hyperlipidemia (A. G. Olsson) . . . . .	563
Secondary Causes and Aggravating Factors for Hyperlipoproteinemia (J. A. Little) . . . . .	566
Diagnosis of Type III Hyperlipoproteinemia by Means of Rate Zonal Ultracentrifugation (S. Sailer, J. Patsch, W. Patsch) . . . . .	570
Some Aspects of Sensitivity and Resistance to the Cholesterol Lowering Effect of Clofibrate (R. Pichardo, J. Davignon) . . . . .	573
Newer Methods of Treatment of the Hyperlipoproteinemias (A. N. Howard) . . . . .	576
Analysis of the Characteristics of $\beta$ -K Band in the Fraction of Lipoprotein by Polyacrylamide Gel-Disc Electrophoresis and the Frequency of Its Appearance in IHD (S. Yamasaki) . . . . .	580
Nutritional Factors and Atherosclerosis (I. Fukui, H. Kushiro, K. Arisue, Y. Yamaguchi, Z. Ogawa, C. Hayashi, Y. Yamamura) . . . . .	583
Abstracts . . . . .	589

### *Workshop 13. Thrombosis and Atherosclerosis (Chairmen: R. H. More, T. Takeuchi)*

Introduction (R. H. More) . . . . .	594
Structure of the Renal Artery and Its Vasoconstriction (T. Takeuchi) . . . . .	594
Coronary Arterial Changes in Childhood and Young Adults With Respect to Progression of Coronary Sclerosis and a Brief Comment on Thrombosis as a Complication (I. Sakurai) . . . . .	597
Thrombosis and Endothelial Injury in Atherogenesis (S. Moore, J. Mustard, M. A. Packham, R. L. Kinlough-Rathbone) . . . . .	601
Platelet Factors and the Proliferation of Vascular Smooth Muscle Cells (H. R. Baumgartner, A. Studer) . . . . .	605
Thrombogenic and Atherogenic Effects of Dietary Fats (S. Renaud) . . . . .	609
Scanning and Transmission Electron Microscopic Studies on Experimental Thrombosis in Rabbits (K. Tanaka) . . . . .	613
Abstracts . . . . .	617

<i>Workshop 14. Tissue Culture in Atherosclerosis (Chairmen: A. S. Daoud, K. Murata)</i>	
Proliferative Response of Arterial Smooth Muscle Cells to Hyperlipemia (K. Fischer-Dzoga, R. W. Wissler) . . . . .	624
Cholesterol Ester Synthesis by Microsomal Fractions From Fu5AH Rat Hepatoma Cells: Stimulation by Lipoproteins From Hyperlipemic Sera (G. H. Rothblat, M. Naftulin, L. Y. Arbogast) . . . . .	627
Inhibition of Lipid Synthesis by Sulfated Glycans in Cultured Aortic Cells (K. Murata) . . . . .	632
The Effect of Hypoxia and Carbon Monoxide on Arterial Smooth Muscle Cell Cultures (T. Zemlenyi, W. J. Paule, D. E. Rounds, V. K. Kalra, D. H. Blankenhorn) . . . . .	636
Sterol Metabolism in Cultured Human Endothelial Cells (S. N. Jagannathan) . . . . .	639
Effect of Human Sera on DNA Synthesis in Aortic Explants (A. S. Daoud, K. Fritz, J. Augustyn, J. Jarmolych, J. Sosa) . . . . .	642
Abstracts . . . . .	645
 <i>Workshop 15. Atherosclerosis Without Major Risk Factors (Chairmen: A. L. Robertson, M. Murakami)</i>	
Introduction (A. L. Robertson, Jr.) . . . . .	650
Studies on the Atherogenesis and Sucrose Intake in Crab-Eating-Monkeys (H. Sekimoto, I. Nakada, K. Nakamura, M. Takaori, S. Takabatake, H. Hirai, M. Murakami) . . . . .	650
Ascorbic Acid and Atherosclerosis: Effects of Chronic Hypovitamin C on Aortic Ground Substance and Lipid Metabolism (T. Fujinami, R. Higuchi, S. Nakano, N. Sakuma, K. Hayashi, J. Yokoi) . . . . .	654
Ethanol-Lipemia. A Doubtful Risk Factor (P. Avogaro, G. Cazzolato, G. Bittolo-Bon, F. Belussi) . . . . .	658
Vasoactive Agents and Postprandial Chylomicrons as Risk Factors in Atherogenesis (A. L. Robertson, Jr.) . . . . .	664
Unexplained Variability in Extent of Atherosclerosis in Homogenous Human Population (J. P. Strong) . . . . .	671
Abstracts . . . . .	675
 <i>Workshop 16. Intervention Trials (Chairmen: W. L. Holmes, Y. Hata)</i>	
Diet and Coronary Heart Disease — Primary Prevention Trials (S. Dayton) . . . . .	676
Attempts at Primary and Secondary Prevention of Coronary Heart Disease (P. Leren, I. Hjermann) . . . . .	680
Intervention Trial for Secondary CV Prevention in Primary Atherogenous Hyperlipidemias (J. L. de Gennes) . . . . .	686
The Multiple Risk Factor Intervention Trial (MRFIT)(W. L. Holmes) . . . . .	690
 <b>General Abstracts</b> . . . . .	693
 Movie . . . . .	709
 <b>References</b> . . . . .	711
 <b>Author Index (Abstracts)</b> . . . . .	781
 <b>Subject Index</b> . . . . .	789
