

A Color Atlas of Sectional Anatomy of the Mouse

Contents

Introduction iii

Skeleton

Skeleton : left lateral view P1

Skeleton (head and forefoot) : left dorsal view P2

Skeleton of the head : dorsal and ventral surfaces P3

Skeleton of the head : view of the ventral endocranial skullcap and dorsal internal base of skull P4

Skeleton (limb and vertebrae) : right lateral view P5

Skeleton of the left thoracic limb : left lateral view P6

Skeleton of the right pelvic limb : view of pantal and dorsal surfaces P7

Skeleton of coxae : view of the dorsal and ventral surfaces P8

Head and Facies (Gross photographs and Dorsal sections)

Head : dorsal view of skull with skin removed P9

Head : dorsal view of rhinencephalon, cerebral hemisphere and cerebellar hemisphere with bones of skull and entocranium removed P10

Dorsal section through bilateral eyeballs and thalamus P11

Dorsal section of head through rostrum and bilateral eyeballs P12

Dorsal section of head through upper lip and bilateral eyeballs, view through upper lip and bilateral optic nerves P13

Dorsal section through hard palate and optic nerve, through nasal cavity and thalamus : ventral views P14

Eyeball, optic nerve and pituitary : left lateral view P15

Eye and ophthalmic vein : left lateral views P16

Head, neck and fore-limbs (Gross photographs and Sagittal section)

Head, neck and fore-limbs : left and right lateral views (skin removed) P17

Head and neck : ventral view (skin removed) P18

Head and neck (skin removed) : ventral and left lateral views P19

Head and neck : ventral view of trachea and common carotid artery P20

Thyroid gland and parathyroid gland : view of the ventral and left lateral surfaces P21

Sagittal section through right molar tooth : right lateral view and view of cranial and caudal incisor teeth P22

Neck, chest, thoracic cavity and lungs (Gross photographs)

Neck and chest : view of ventral surface (skin removed) P23

Viscera of thoracic cavity from left side and right side : major part of left and right lungs removed P24

Viscera of thoracic cavity (heart and thymus) : ventral view P25

Chest : view of right lateral surface and thoracic cavity from right side P25

Lungs in thoracic cavity : dorsal view (air pumped into trachea in right photograph) P27

Lungs and heart : view of the dorsal and ventral surfaces (air pumped into trachea) P28

Thoracic and abdominal organs (Gross photographs)

Male thoracic and abdominal organs (heart, liver, stomach, kidney and thoracic aorta) :
view of ventral surface P29

Abdominal organs (descending colon, rectum and anus) : view of the ventral surface P30

Abdominal viscera : liver, intestinal tracts and urinary bladder (after urination) P31

Female abdominal cavities (liver, stomach, spleen and ovary) : view from the left side and
from the right side P32

Liver : diaphragmatic surface and visceral surface P33

Liver : gall bladder, common bile duct and duodenum : ventral view P34

Portal vein : view of the ventral surface P35

Liver : view of diaphragmatic and visceral surfaces P36

Abdominal viscera : mesenteric lymph node, jejunal artery and vein, ileal artery and vein
P37

Digestive tract (removed and displayed) P38

Stomach and duodenum : view of cranial surface, longitudinal sections of mucous tunica of
stomach and pyloric part of stomach P39

Kidney and suprarenal glands : dextral, sinistral and bilateral P40

Ureter and urinary bladder : bladder was turned up to show running ureters P41

Male and female reproductive organs (Gross photographs)

Ventral view of male external genitalia (prepuce turned down, scrotal sacs removed) P42

Male reproductive organs (removed and displayed) : ventral view P43

Kidneys and ovaries : ventral view and dorsal view P44

Female genital organs : abdominal cavity, ovary and uterine tube, enucleated, ventral views P45

Vagina, bladder, urethra of female and feminine pudendum (gravid uterus) P46

Multiparous of uterus, cervix and vagina in situ (transverse section through vagina to interior part of uterus) P47

Pregnant females and fetuses (Gross and sectional photographs)

Ventral view of pregnant female 20 days after mating P48

Sagittal section of pregnant female 20 days after mating : right lateral view P49

Dorsal section through pregnant uterus (late pregnancy) P50

Transverse section through the pregnant uterus (late pregnancy) : caudal views P51

Transverse sections through pregnant uteri (late pregnancy) : caudal views P52

Pregnant female with uterus displayed (late pregnancy) P53

Pregnant uteri and fetuses : vagina and body of uteri were reversed upward, parts of uterus and fetus amnios have been cut away P54

Fetuses and placenta : vagina and the body of uterus were reversed upward after extirpation and macrograph of fetuses P55

Dorsal and ventral view of superficial bodies (Gross photographs)

Superficial muscles of the body : dorsal view P56

Superficial muscles of the body : ventral view P57

Limbs and tail (Gross photographs)

Limbs : superficial layer, view of left lateral and ventral P58

Artery and vein of pelvic limb and tail : ventral, left lateral and dorsal views P59

The limbs : dorsal view and caudal view of forearms, medial view and caudal view of hindpaws P60

Mammary glands (Gross photographs)

Mammary gland : dorsal view P61

Mammary gland : left and right lateral views P62

Mammary gland : ventral view P63

external urethral openings (new born mice)

Male and female external urethral openings (newborn mice) P64

Sagittal sections (right and left lateral views)

Sagittal section through right humerus and anterior surface of right femur : right lateral view P65

Sagittal section through right masseter muscle and right distal end of femur : right lateral view P66

Sagittal section through lower part of right masseter muscle and right quadriceps femoris muscle : right lateral view P67

Sagittal section through right zygomatic arch and right knee joint : right lateral view P68

Sagittal section through right eyeball and right lateral root of tail : right lateral view P69

Sagittal section through right eyeball and right knee joint : right lateral view P70

Sagittal section through right shoulder joint and right femur : right lateral view P71

Sagittal section through right lower lip and right patella : right lateral view P72

Sagittal section through right ventral nasal conchae and right suprarenal gland : right lateral

view P73

Midsagittal section through right nasal bone and rectum : right lateral view P74

Midsagittal section through rostrum of nose and liver : mirror symmetry views, right and left lateral views P75

Sagittal section through left eyeball and suprarenal gland : right lateral view P76

Midsagittal section through right upper lip and anus : left lateral view P77

Sagittal section through right external naris and right kidney : left lateral view P78

Sagittal section through left nasal septum and rectum : left lateral view P79

Sagittal section through the left vitreous body and left kidney : left lateral view P80

Sagittal section through pituitary, thymus and left ala ossis ilii : left lateral view P81

Sagittal section through masseter muscle and head of left femur : left lateral view P82

Sagittal section through left external auditory meatus, left kidney and left biceps femoris muscle : left lateral view P83

Sagittal section through left elbow joint and left femur : left lateral view P84

Dorsal sections (dorsal and ventral views)

Dorsal section through trapezius muscle of cervical part and spinous process of sacrum : dorsal view P85

Dorsal section through trunk of corpus callosum and bodies of vertebra : dorsal view P86

Dorsal section through third ventricle, anus and bilateral testes : dorsal view P87

Dorsal section through bilateral eyeballs and pituitary : dorsal view P88

Dorsal section through rostrum of nose and anus : dorsal view P89

Dorsal section through nasal apex, bilateral suprarenal glands and bilateral kidneys : dorsal view P90

Dorsal section through body of tongue caudal vena cava and bilateral kidney : dorsal view P91

Dorsal section through roof of tongue and rectum : dorsal view P92

Dorsal section through epiglottis, caudal vena cava and anus : ventral view P93

Dorsal section through cartilage part of nasal septum and bilateral ovaries : ventral view P94

Dorsal section through external jugular vein and femoral region : ventral view P95

Dorsal section through body of tongue and feminine pudendum : ventral view P96

Dorsal section through mandible and feminine pudendum : ventral view P97

Epididymides and testes : dorsal view (dorsal section) and ventral view (scrotal sacs removed) P98

Transverse sections (rostral and caudal views)

Transverse sections through tips of noses : rostral views P99

Transverse section through bilateral eyeballs : rostral view P100

Transverse section through bilateral lenses : rostral view P101

Transverse section through bilateral olfactory bulbs and intraorbital lacrimal glands : caudal view P102

Transverse section through bilateral olfactory bulbs and caudal incisor tooth : caudal view P103

Transverse section through post orbital part : rostral view P104

Transverse section through bilateral hippocampocortical tracts and root of tongue : rostral view P105

Transverse section through bilateral caudal incisor teeth and intraorbital lacrimal glands : caudal view P106

Transverse section through bilateral temporomandibular joints : caudal view P107

Transverse section through hypothalamus and pituitary : caudal view P108

Transverse section through thalamus, hypothalamus and body of hyoid bone : caudal view P109

Transverse section through bilateral tympanic bullae and pharynx : caudal view P110

Transverse section through bilateral pharyngeal fornix and submandibular gland : rostral view P111

Transverse section through bilateral medial corticohypothalamic tract and temporomandibular joint : caudal view P112

Transverse section through bilateral piriform lobes and fauces : caudal view P113

Transverse section through pineal body and cochlea : rostral view P114

Transverse section through bilateral cerebellar hemispheres and pharyngeal fornices : rostral view P115

Transverse section through atlas and bilateral submandibular glands : caudal view P116

Transverse section through 4th cervical vertebra and bilateral humeri : rostral view P117

Transverse section through 2nd thoracic vertebra and manubrium of sternum : caudal view P118

Transverse section through 5th thoracic vertebra and 4th sternum : caudal view P119

Transverse section through 6th thoracic vertebra and 2nd sternum : caudal view P120

Transverse section through spinous process of 7th thoracic vertebra and 5th sternum : caudal view P121

Transverse section through 8th right rib and left ventricle : caudal view P122

Transverse section through 10th thoracic vertebra, apex of heart and xiphisternum : caudal view P123

Transverse section through 10th to 11th intervertebral disk of thoracic vertebrae and fundus of gall bladder : caudal view P124

Transverse section through 11th thoracic vertebra and xiphoid cartilage : caudal view P125

Transverse section through spinous process of 11th thoracic vertebra, gall bladder and xiphoid cartilage : caudal view P126

Transverse section through spinous process of 11th thoracic vertebra and bilateral 7th costal cartilage : caudal view P127

Transverse section through 2nd lumbar vertebra and left suprarenal gland : caudal view P128

Transverse section through 2nd lumbar vertebra, spleen and right kidney : caudal view P129

Transverse section through 2nd to 3rd intervertebral disk of lumbar vertebra and bilateral renal sinus (kidney) : caudal view P130

Transverse section through 4th lumbar vertebra and bilateral kidneys : caudal view P131

Transverse section through vertebral body of 4th lumbar vertebra and bilateral kidneys : caudal view P132

Transverse section through caudal articular process of 4th lumbar vertebra and bilateral kidneys : caudal view P133

Transverse section through vertebral body of 4th lumbar vertebra and bilateral ovarian veins : caudal view P134

Transverse section through vertebral body of 6th lumbar vertebra and bilateral vesicular glands : caudal view P135

Transverse section through 2nd sacral vertebra, bilateral vesicular gland and urinary

bladder : caudal view P136

Transverse section through 4th sacral vertebra and pelvic part of urethra of male : caudal view P137

Transverse section through 1st caudal vertebra and cavernous body of penis : caudal view P138

Transverse section through vertebral foramen of 1st caudal vertebra and coagulational gland : caudal view P139

Transverse section through vertebral foramen of 1st caudal vertebra and bilateral preputial gland : caudal view P140

Transverse section through 1st caudal vertebra and pubic symphysis : caudal view P141

Transverse section through 2nd caudal vertebra and penis bone : caudal view P142

Transverse section between 2nd and 3rd caudal vertebrae : caudal view P143

Transverse section through 3rd caudal vertebra and penis bone : caudal view P144

Transverse section through 3rd caudal vertebra and preputial gland : caudal view P145

Transverse section through vertebral body of 4th caudal vertebra and anus : caudal view P146

Transverse section through 4th caudal vertebra and bilateral tibiae : caudal view P147

Transverse sections through 6th and 4th vertebral body of caudal vertebrae : caudal views P148

Angiogram (left lateral and ventral views)

Angiogram : left lateral view P149

Angiogram : ventral view P150

Appendix P151
