**THINKING  
ABOUT  
SCIENCE**

**MAX DELBRÜCK AND  
THE ORIGINS OF  
MOLECULAR BIOLOGY**

---

*Ernst Peter Fischer and Carol Lipson*

*W. W. Norton & Company* · New York · London

# Contents

---

*Preface: The Pleasure of Thinking About Science 7*

## *NEW PHYSICS IN THE OLD WORLD 15*

*The Student and the Stars 17*

*Theoretical Physics—The Intellectual's Game 35*

*The Berlin Years 62*

*Light and Life—The Great Challenge 78*

## *MOLECULAR BIOLOGY IN THE NEW WORLD 103*

*The Atom of Biology 105*

*Insights from a Simple System 131*

*The Rise of Molecular Genetics 157*

*The Great Denouement 191*

## *THE RESTLESS WORLD OF A SCIENTIST 213*

*Looking for Biophysics 215*

*The Phage of Vision 234*

*The German Interlude 260*

*Mind from Matter? 278*

*Epilogue: The Inner Unity 297*

*Bibliography 299*

*Index 317*
