

Volume 35

Advances in Genetics

Incorporating Molecular Genetic Medicine

Edited by

Jeffery C. Hall

Department of Biology
Brandeis University
Waltham, Massachusetts

Jay C. Dunlap

Department of Biochemistry
Dartmouth Medical School
Hanover, New Hampshire

Associate Editors

Theodore Friedmann

Department of Pediatrics
Center for Molecular Genetics
School of Medicine
University of California, San Diego
La Jolla, California

Francesco Giannelli

Division of Medical and
Molecular Genetics
United Medical and Dental
Schools of Guy's and
St. Thomas' Hospital
London Bridge, London SE1 9RT
United Kingdom

[1997]

San Diego London Boston New York Sydney Tokyo Toronto

Contents

Contributors ix

1 Phototransduction and Circadian Clock Pathways Regulating Gene Transcription in Higher Plants 1

Shawn L. Anderson and Steve A. Kay

- I. Introduction 1
- II. The CAB Gene: A Model for Circadian Clock and Light Regulation of Transcription 2
- III. Plant Photoreceptors 6
- IV. Identification of Signal Transduction Intermediates 11
- V. Genetic Analysis of Plant Phototransduction Pathways 15
- VI. Genetic Analysis of the Circadian Clock in Plants and Cyanobacteria 17
- VII. *Cis*- and *Trans*-Acting Elements Required for Light- and Clock-Regulated CAB Expression 20
- VIII. Conclusions and Future Perspectives 25
- References 28

2 Apoptosis 35

Brian V. Harmon and David J. Allan

- I. Introduction 35
- II. Genesis of the Apoptosis Concept 36
- III. The Scientific Revolution Gains Momentum 49
- IV. Conclusions 52
- References 53

3 Molecular Basis for X-Linked Immunodeficiencies 57

C. I. Edvard Smith and Luigi D. Notarangelo

- I. Introduction 57

II.	Brief History of Immunodeficiencies	58	
III.	Phenotype and Cellular Basis of XLA	65	
IV.	Cloning of the XLA Gene and Spectrum of Mutations		67
V.	Phenotype and Cellular Basis of SCID	73	
VI.	Cloning of the XSCID Gene and Spectrum of Mutations	74	
VII.	Cellular Basis of WAS	78	
VIII.	Cloning of the WAS Gene and Spectrum of Mutations		81
IX.	Cellular Basis of HIGM	84	
X.	Cloning of the HIGM Gene and Spectrum of Mutations	85	
XI.	Gene Therapy in Primary Immunodeficiency		87
XII.	Concluding Remarks	89	
	References	91	
4	Gene Therapy of Duchenne Muscular Dystrophy		117
	Ariberto Fassati, Stephen Murphy, and George Dickson		
I.	Duchenne Muscular Dystrophy	117	
II.	The Basis of Gene Therapy for DMD	123	
III.	Methods for Gene Transfer into Skeletal Muscle		129
IV.	Conclusions	141	
	References	142	
5	The Contribution of the Mouse to Advances in Human Genetics		155
	Elizabeth M. C. Fisher		
I.	Introduction	155	
II.	Humans Discover Mouse Genetics	156	
III.	The Mouse Is a Model Mammal	157	
IV.	The Mouse Human Comparative Map: A Genetic Rosetta Stone	162	
V.	Mouse Genomics	165	
VI.	The Contribution of the Mouse to Advances in Understanding Human Genetic Disease	168	
VII.	Modeling Human Disorders in the Mouse		184
VIII.	The Future Contribution of the Mouse to Advances in Human Genetics		195
	References	197	

- 6 *prune*/Killer of *prune*: A Conditional Dominant Lethal Interaction in *Drosophila* 207**
 Lisa Timmons and Allen Shearn
- I. Discovery of the *prune*/Killer of *prune* Interaction 207
 - II. The *awd* Gene 209
 - III. The *prune* Gene 222
 - IV. The *prune*/Killer of *prune* Lethal Genetic Interaction 236
 - References 244
- 7 Chiasmata, Crossovers, and Meiotic Chromosome Segregation 253**
 Carol A. Bascom-Slack, Lyle O. Ross, and Dean S. Dawson
- I. Introduction 253
 - II. Exchanges Enhance the Fidelity of Meiotic Chromosome Segregation 255
 - III. The Roles of Recombination in Enhancing Disjunction 265
 - IV. The Role of Chiasma Binder in Ensuring Disjunction 271
 - V. Recombination Intermediates and Chiasma Formation 273
 - VI. Not All Exchanges Ensure Disjunction 276
 - VII. Summary 277
 - References 278
- 8 Molecular Genetics of Familial Cardiomyopathies 285**
 Aman S. Coonar and William J. McKenna
- I. Introduction 285
 - II. Hypertrophic Cardiomyopathy 286
 - III. Dilated Cardiomyopathy 305
 - IV. Arrhythmogenic Right Ventricular Cardiomyopathy 310
 - V. Restrictive Cardiomyopathy 312
 - VI. Other Primary Heart Muscle Diseases 313
 - VII. Familial Syndromes Which Include Myocardial Involvement 314
 - VIII. Conclusion 315
 - References 315
- Index 325
