Contents

Polytene Chromosomes, Heterochromatin, and Position Effect Variegation 1

I. F. Zhimulev

- I. General Remarks 1
- II. Morphology of the Heterochromatic Regions of the Chromosomes
in Dividing Cells 5
- III. Repetitive Sequences 43
- IV. Genetic Content of Heterochromatic Regions
of Mitotic Chromosomes 55
- V. Diminution of Chromatin and Chromosomes 78
- VI. Centromeric Heterochromatin in Polytene Chromosomes 90
- VII. Intercalary Heterochromatin 134
- VIII. Telomeric Heterochromatin 238
- IX. The B Chromosomes 282
- X. Heterochromatin of Chromosomes Restricted to
Germline Cells 304
- XI. Changes in Expression of Genes Dependent on Their Position
in the Genome 306
- XII. Genetic Inactivation under Position Effect Variegation 309
- XIII. Modification of Gene Expression under Position Effect 334
- XIV. Time of Genetic Inactivation in Development 355
- XV. Unusual Cases of Position Effect 357
- XVI. Molecular and Cytogenetic Aspects of Position
Effect Variegation 376
- XVII. Current Concepts of the Mechanism of Position Effect
Variegation 422
- XVIII. Heterochromatization of Chromosome Regions and Regulation
of Gene Activity 435
- References 444
