Biological Problems of Regenerative Cementogenesis: Synthesis and Attachment of Collagenous Matrices on Growing and Established Root Surfaces

Hubert E. Schroeder

I. Introduction	1
II. Origin, Types, and Function of Root Cementum on Human Teeth	2
III. Spontaneous Cementogenesis and Matrix Formation on Growing Root Surfaces	5
IV. Matrix Formation on Established Root Surfaces <i>in Vitro</i>	28
V. Regenerative Cementogenesis on Established Root Surfaces <i>in Vivo</i>	43
VI. Concluding Remarks and Perspectives	51
References	52

Immunocytochemical Localization of Proteins in Striated Muscle

Marvin H. Stromer

I. Introduction	61
II. Localization of Proteins in Skeletal Muscle Cells	62
III. Localization of Proteins in Cardiac Muscle Cells	102
IV. Sarcoplasmic Reticulum, Transverse Tubules, and the Sarcolemma	119
V. Other Proteins	127
VI. Conclusions and Outlook	128
References	129

Recent Developments in Vertebrate Cell Culture Technology

Satish J. Parulekar, Thomas Hassell, and Satish C. Tripathi

I.	Introduction	145
II.	Traditional Cultures	147
III.	Three-Dimensional Cultures	153
IV.	Commercial Scale Bioreactors	162
V.	Design and Optimization Considerations	192
VI.	Concluding Remarks	201
	References	204

Transdifferentiation in Medusae

Volker Schmid

I.	Introduction	213
II.	The Concept of Transdifferentiation	214
III.	Transdifferentiation in Hydromedusae	218
IV.	Concluding Remarks	256
	References	258

Symplast as a Functional Unit in Plant Growth

Kiyoshi Katou and Hisashi Okamoto

I.	Introduction	263
II.	Electrophysiological Structure of the Plant Germ Axis	265
III.	Role of Spatially Separated Proton Pumps in Stem Elongation	273
IV.	Lockhard Equations and Action of Auxin	277
V.	Integration of the Activity of the Symplast in Plant Growth	285
VI.	Conclusion	299
	References	300

Intracellular Ca²⁺ Messenger System in Plants

Shoshi Muto

I.	Introduction	305
II.	Receptors	306
III.	G Proteins	308

CONTENTS

vii

IV. Regulation of Intracellular Ca^{2+} Concentration	311
V. Phosphatidylinositol Turnover	321
VI. Calmodulin	328
VII. Protein Kinases	332
VIII. Concluding Remarks	338
References	339
Index	359
