| Contributors | ix |
|--------------------|----|

Elicitors of Plant Defense Responses

Jürgen Ebel and Eric G. Cosio

| | |
|--|----|
| I. Introduction | 1 |
| II. Elicitors of Defense Responses | 2 |
| III. Elicitor Perception | 15 |
| IV. Signal Transduction | 19 |
| V. Regulation of Defense Responses | 26 |
| VI. Concluding Remarks | 29 |
| References | 30 |

Membrane and Cytoskeleton Flow in Motile Cells with Emphasis on the Contribution of Free-Living Amoebae

Andrzej Grębecki

| | |
|--|----|
| I. Introduction | 37 |
| II. Development of Major Concepts | 38 |
| III. Interaction between the Membrane and the Cytoskeleton | 45 |
| IV. Lateral Movements of the Submembrane Cytoskeletal Layer | 53 |
| V. Current Ideas about Motor and Regulation of Cortical Flow | 64 |
| VI. Conclusions | 72 |
| References | 73 |

Cell Differentiation: An Evolutionary Perspective

Reed A. Flickinger

| | |
|---|-----|
| I. Introduction | 81 |
| II. Time of Differentiation of More Conserved Cell Types | 81 |
| III. Time of Expression of More Conserved Genes | 83 |
| IV. Action of Early-Acting and Late-Acting Tissue-Specific Genes | 86 |
| V. Regulatory Sequences of Conserved Genes | 89 |
| VI. Restriction of Transcription of AT-Rich Sequences | 91 |
| VII. Cell Division and Cell Differentiation | 97 |
| VIII. Expression of More Conserved and Less Conserved Genomic Domains | 101 |
| IX. Similarities between Evolution and Development | 105 |
| X. Expression of Genomic Domains | 107 |
| XI. Conclusions | 111 |
| References | 112 |

Neuropeptide Receptors and Astrocytes

Brigitte Krisch and Rolf Mentlein

| | |
|--|-----|
| I. Introduction | 119 |
| II. Scope of Astrocyte Reactions to Influences from Neuropeptides | 121 |
| III. Binding and Effects of Individual Neuropeptides on Astrocytes | 127 |
| IV. Neuropeptide Binding Sites on Human Astrocytomas | 153 |
| V. Concluding Remarks | 157 |
| List of Abbreviations | 160 |
| References | 161 |

Functional Aspects of Cell Response to Heat Shock

Vladimir Ya. Alexandrov

| | |
|--|-----|
| I. Introduction | 171 |
| II. Increase in Cell Thermostability and Induction of Heat Shock Proteins in Response to Short-Term Heating to Extreme Temperature | 172 |
| III. Mechanisms Underlying Increased Cell Stability in Response to Stresses | 190 |
| IV. Increased Cell Stability at Elevated Temperature within the Tolerant Zone | 210 |
| V. Conclusions | 214 |
| References | 216 |

Cell Biology of Phototaxis in Flagellate Algae

Georg Kreimer

| | |
|---|-----|
| I. Introduction | 229 |
| II. Structural Aspects | 231 |
| III. Signal Generation and Modulation Mechanisms | 251 |
| IV. <i>In Vivo</i> and <i>in Vitro</i> Analysis of Components of Algal Photoreceptive Apparatuses | 269 |
| V. The Photoreceptors | 273 |
| VI. Possible Elements of the Signal Transduction/Processing Chain | 290 |
| VII. Perspectives | 300 |
| Appendix: Previously Unpublished Material | 301 |
| References | 302 |
| Index | 311 |
