Transport of Glucose across the Blood-Tissue Barriers

Kuniaki Takata, Hiroshi Hirano, and Michihiro Kasahara

I. Introduction	1
II. Glucose Transporters	2
III. Blood-Tissue Barriers	5
IV. Glucose Transport in the Blood-Tissue Barriers	9
V. Regulation of Glucose Transporter Expression in Blood-Tissue Barriers	33
VI. Concluding Remarks	37
References	38

The Role of Suppressors in Determining Host-Parasite Specificities in Plant Cells

Tomonori Shiraishi, Tetsuji Yamada, Yuki Ichinose, Akinori Kiba,
and Kazuhiro Toyoda

I. Introduction	55
II. Suppressors of Defense Response Produced by Phytopathogens	59
III. Specific Production and Accessibility-Inducing Activity of Suppressors	62
IV. Specific Suppression of the Establishment of Chemical Barriers	65
V. Mode of Action of the Suppressors	67
VI. Species-Specific Suppression of Cell Wall Function by the Suppressor	76
VII. Concluding Remarks	81
References	85

Distribution and Functions of Platelet-Derived Growth Factors and Their Receptors during Embryogenesis

Paris Ataliotis and Mark Mercola

I. Introduction	95
II. Biochemistry of PDGFs and Their Receptors	96
III. Distribution of PDGFs during Embryogenesis	104
IV. Functional Studies on the Effects of PDGF	110
V. Concluding Remarks	117
References	119

Adaptive Crystal Formation in Normal and Pathological Calcifications in Synthetic Calcium Phosphate and Related Biomaterials

G. Daculsi, J.-M. Bouler, and R. Z. LeGeros

I. Introduction	129
II. Analytical Techniques	135
III. Crystal Formation, Composition, and Properties in Normal Calcifications	139
IV. Crystal Formation, Composition, and Properties in Pathological Calcifications	145
V. Factors Affecting Crystal Formation and Properties of Biologically Relevant Calcium Phosphates	154
VI. Calcium Phosphates and Related Bone Graft Biomaterials	159
VII. Comparative Properties of Bone and Calcium Phosphate Materials	165
VIII. Bone/Biomaterial Interface	167
IX. Summary and Conclusion	175
References	177

The Biogenesis, Traffic, and Function of Cystic Fibrosis Transmembrane Conductance Regulator

Tamas Jilling and Kevin L. Kirk

I. Introduction	193
II. Cystic Fibrosis Transmembrane Conductance Regulator	195
III. CFTR Mutations That Cause Disease	200
IV. Physiological Role of CFTR as an Apical Cl ⁻ Channel in Epithelial Tissues	208
V. Regulation of CFTR Function by the Cytoskeleton	212
VI. CFTR as a Regulator of Other Channels	213
VII. Itinerary of CFTR Traffic within Epithelial Cells	215

VIII. Regulation of Membrane Traffic by CFTR?	220
IX. Summary and Conclusions	231
References	232

Regulation of Phenylpropanoid Metabolism in Relation to Lignin Biosynthesis in Plants

Mark S. Barber and Heidi J. Mitchell

I. Introduction	243
II. General Phenylpropanoid Pathway	247
III. Lignin Branch Pathway	262
IV. Storage and Transport of Monolignols	269
V. Polymerization Process	271
VI. Concluding Remarks	273
References	279
Index	295
