A Model for Flagellar Motility

Charles B. Lindemann and Kathleen S. Kanous

I. Introduction	1
II. Structural Components of the Eukaryotic Flagellum	2
III. The Motor	13
IV. Regulation of Flagellar Motility	21
V. Coordination of the Beat Cycle	29
VI. Modeling the Flagellum	34
VII. Concluding Remarks	55
References	56

Basement-Membrane Stromal Relationships: Interactions between Collagen Fibrils and the Lamina Densa

Eijiro Adachi, Ian Hopkinson, and Toshihiko Hayashi

I. Introduction	73
II. Molecules Related to Interactions between Collagen Fibrils and Lamina Densa	78
III. Regulation of Collagen Fibril Diameter by pNcollagen III and Collagen V	109
IV. Collagen IV and the Skeleton of Lamina Densa	120
V. Interactions between Collagen Fibrils and Lamina Densa	125
VI. Other Systems Involved in the Anchoring of Collagen Fibrils to Lamina Densa	132
VII. Concluding Remarks	138
References	140

The Role of Endoxyloglucan Transferase in the Organization of Plant Cell Walls

Kazuhiko Nishitani

I. Introduction	157
II. Overview of Cell Wall Architecture in Plants	159
III. Endoxyloglucan Transferase	172
IV. XRP's	182
V. Regulation of XRP Gene Expression	186
VI. Overview of Cell Wall Construction during Plant Growth and Development: A Hypothetical Scheme	192
VII. Concluding Remarks	196
References	197

Microtubule–Microfilament Synergy in the Cytoskeleton

R. H. Gavin

I. Introduction	207
II. Basal Body-Associated Fibrillar Networks	208
III. Microtubule–Microfilament Interactions in Cell Division and Development	214
IV. Organelle Transport on Microtubule and Microfilament Tracks	222
V. Regulation of Microtubule–Microfilament Interactions	226
VI. Concluding Remarks	235
References	236

Insulin Internalization and Other Signaling Pathways in the Pleiotropic Effects of Insulin

Robert M. Smith, Shuko Harada, and Leonard Jarett

I. Introduction	243
II. Mechanisms of Insulin Internalization	248
III. Translocation of Insulin to the Cytoplasm and Nucleus	258
IV. Insulin-Responsive Pathways Other Than IRS-1 Involved in Insulin's Effects on Immediate-Early Gene Expression	267
V. Summary	272
References	273

Index	281
