Cell Model Systems in Plant Cytoskeleton Studies

Seiji Sonobe

I. Introduction	1
II. Categories of Cell Model Systems	2
III. Cell Models of Plant Cells	4
IV. Cell Models in Future Studies	18
V. Concluding Remarks	20
References	21

The Structure, Function, and Assembly of Actin Filament Bundles

Ruth Furukawa and Marcus Fechheimer

I. Introduction	29
II. Biological Systems with Well-Characterized Actin Filament Bundles	30
III. Mechanisms of Actin Filament Bundle Formation	56
IV. Concluding Remarks	75
References	77

Nuclear Components with Microtubule-Organizing Properties in Multicellular Eukaryotes: Functional and Evolutionary Considerations

František Baluška, Dieter Volkmann, and Peter W. Barlow

I. Introduction	91
II. Relationships between Nucleus and Microtubules in Eukaryotic Cells	93

III. The Concept of Primary and Secondary MTOCs: Premitotic Plant Cells	101
IV. Model for Plant Cell Microtubule–Cytoplasmic Interactions in Plant Cells	104
V. Plant Cell Cytokinesis and Postmitotic Segregation of Secondary MTOCs	107
VI. Identification of Nuclear Proteins with Microtubule-Organizing Properties	111
VII. Interrelationships between Chromosomal and Microtubular Cycles	115
VIII. Concluding Remarks	119
References	121

Sialic Acids in Molecular and Cellular Interactions

Sørge Kelm and Roland Schauer

I. Introduction	137
II. Sialic Acids Masking Recognition Sites	144
III. Sialic Acids as Recognition Determinants	155
IV. Perspectives	210
References	212

Embryonic Neural Chimeras in the Study of Vertebrate Brain and Head Development

Nicole M. Le Douarin, Martin Catala, and Cesira Batini

I. Introduction	242
II. A Novel View of Neurulation in Amniotes	248
III. Fate Map of the Early Neural Primordium at the Neurula Stage	257
IV. Encephalic Vesicles	261
V. Quail–Chick Marker System for Studying Cell Migration during CNS Development ...	272
VI. The Problem of the Origin of the Oligodendrocytes in the Neural Epithelium	285
VII. Transfer of Genetically Encoded Behavioral or Pathological Traits by Brain Transplants	291
VIII. Concluding Remarks	297
References	299
Index	311
