Role of Rab GTPases in Membrane Traffic

Vesa M. Olkkonen and Harald Stenmark

I. Introduction	1
II. General Characteristics of the Rab GTPase Subfamily	5
III. Experimental Evidence for Rab Function in Membrane Trafficking	25
IV. Membrane Association and GTPase Cycle of Rab Proteins	44
V. Linkages of Rab GTPases to Other Components of the Membrane Transport Machinery	57
VI. Perspectives	64
References	67

Lignification in Plant Cell Walls

A. Ros Barceló

I. Introduction	87
II. Nature, Composition, and Distribution of Lignins	89
III. Lignin Detection and Analysis	94
IV. Model Systems for Studying Cell Wall Lignification	98
V. Lignin Biosynthetic Pathways	101
VI. The Polymerization Step	109
VII. Factors Determining the Amount and Nature of Lignins	119
VIII. Concluding Remarks	122
References	123

Functional Interactions among Cytoskeleton, Membranes, and Cell Wall in the Pollen Tube of Flowering Plants

Yi-Qin Li, Alessandra Moscatelli, Giampiero Cai, and Mauro Cresti

I.	Introduction	133
II.	Organization of the Endomembrane System in the Pollen Tube	137
III.	The Cytoskeleton of Pollen Tubes	140
IV.	Connections of Cytoskeleton and Membranes	150
V.	Structure of the Cell Wall of the Pollen Tube	163
VI.	Exocytosis and Cell Wall Formation	170
VII.	Polarized Growth of Pollen Tubes	174
VIII.	Concluding Remarks	181
	References	183

Biology of the Postsynaptic Glycine Receptor

Christian Vannier and Antoine Triller

I.	Introduction	201
II.	Identification of the Glycine Receptor	203
III.	Molecular Biology of the Glycine Receptor	205
IV.	Spatial and Temporal Mapping of Glycine Receptor Complex Expression	215
V.	Cell Biology of the Glycine Receptor,	219
VI.	Pathology—Molecular Basis of Spastic Syndromes	230
VII.	Concluding Remarks	234
	References	235

Cell Fate Specification by Localized Cytoplasmic Determinants and Cell Interactions in Ascidian Embryos

Hiroki Nishida

I.	Introduction	245
II.	General Aspects of Ascidian Embryogenesis	246
III.	Localized Cytoplasmic Determinants in Eggs and Embryos	253
IV.	Inductive Interactions	272
V.	Specification of the Anterior–Posterior Axis	287
VI.	Lateral Inhibition in the Equivalence Group	295
VII.	Concluding Remarks	296
	References	299

Distribution of Na^+,K^+ -ATPase in Photoreceptor Cells of Insects

Otto Baumann

I. Introduction	307
II. Structural and Functional Organization of the Insect Retina	309
III. Phototransduction in Insect Photoreceptors	314
IV. Ion Concentrations and Light-Induced Ion Movements in the Insect Retina	316
V. Molecular Analysis of Na^+,K^+ -ATPase	320
VI. Localization of Na^+,K^+ -ATPase in Photoreceptors	323
VII. Developmental Redistribution of Na^+,K^+ -ATPase	332
VIII. Development and Maintenance of a Restricted Distribution of Na^+,K^+ -ATPase on the Plasma Membrane	334
IX. Concluding Remarks	338
References	339
Index	349
