The Cellular Basis of Tumor Progression

Gloria H. Heppner and Fred R. Miller

I. Introduction	1
II. Tumor Progression	2
III. Cellular Heterogeneity as the Basis of Tumor Progression	7
IV. Consequences of Tumor Heterogeneity and Progression	32
V. Concluding Remarks	36
References	39

Molecules Involved in Mammalian Sperm-Egg Interaction

S. B. McLeskey, C. Dowds, R. Carballada, R. R. White, and P. M. Saling

I. Introduction	57
II. The Zona Pellucida and Its Interaction with Sperm	62
III. The Egg Plasma Membrane and Its Interaction with Sperm	85
IV. Concluding Remarks	97
References	98

Coordination of Nuclear and Chloroplast Gene Expression in Plant Cells

Michel Goldschmidt-Clermont

I.	Introduction	115
II.	Classical Genetics of Nuclear-Plastid Interactions	122
III.	Plastid Development	128
IV.	Nuclear Control of Plastid Gene Expression	135
V.	Signaling between the Plastid and the Nucleocytoplasm	160
VI.	Concluding Remarks	163
	References	165

Signaling in Unicellular Eukaryotes

Søren T. Christensen, Vagn Leick, Leif Rasmussen, and
Denys N. Wheatley

I.	Introduction	181
II.	Signaling Systems in Unicellular Eukaryotes	189
III.	Signal Molecules in Cell Survival and Proliferation in <i>Tetrahymena</i>	196
IV.	Signal Molecules in Chemosensory Behavior in <i>Tetrahymena</i>	219
V.	Control of Cell Proliferation in <i>S. cerevisiae</i>	224
VI.	Signaling Systems in Prokaryotes Compared with Those in Eukaryotes	229
VII.	Concluding Remarks	231
	References	232

Action of SO₂ on Plants and Metabolic Detoxification of SO₂

Ulrich Heber and Katja Hüve

I.	Introduction	255
II.	Emissions and Immissions	258
III.	Deposition	261
IV.	Toxicity of SO ₂ and Its Hydration Products	265

CONTENTS

V. Metabolic Detoxification of SO ₂ and Its Hydration Products	271
VI. Effects of SO ₂	275
VII. Conclusions	279
References	280
Index	287
