Gene Expression during Amphibian Limb Regeneration

Jacqueline Géraudie and Patrizia Ferretti

I. Introduction	1
II. Molecules Regulated during Regeneration	4
III. Growth Control in the Blastema	18
IV. Genes Controlling Morphogenesis in the Regenerating Limb	23
V. Concluding Remarks	38
References	38

Biochemistry of the Extracellular Matrix of *Volvox*

Manfred Sumper and Armin Hallmann

I. Introduction	51
II. Ultrastructure of the <i>Volvox</i> ECM	54
III. Biochemical Characterization of ECM Components	56
IV. ECM Biogenesis and Remodeling	62
V. Relationship to Higher Plant ECMs	74
VI. Conclusions	75
References	79

Cell Biology of the Basophil

Ann M. Dvorak

I. Introduction	87
II. Basophil Identification	90

III. Basophils in Disease	97
IV. Basophils as Secretory Cells	98
V. Development of Tools for Advanced Cell-Biological Studies of Basophils	110
VI. Vesicles as Prominent Transport Organelles in the Cytoplasm of Basophils	122
VII. Proof of a Degranulation Model Identified in Human Basophils in 1975	155
VIII. Charcot-Leyden Crystal Protein Distribution in Actively Degranulating Human Basophils	157
IX. Histamine Distribution in FMLP-Stimulated Human Basophil Granules	192
X. Recovery of Basophils from Secretion	198
XI. Morphometric Analysis of Basophil Degranulation	198
XII. Concluding Remarks	212
References	214

Membrane Receptors for Endocytosis in the Renal Proximal Tubule

Erik Ilsø Christensen, Henrik Birn, Pierre Verroust, and Søren K. Moestrup

I. Introduction	237
II. Ultrastructure of the Endocytic Apparatus in the Proximal Tubule	239
III. Megalin	243
IV. gp280/Intrinsic Factor Receptor (IFR)	259
V. IGF-II/Man-6-P Receptor	265
VI. Folate Receptor	268
VII. Concluding Remarks	272
References	272
Index	285
