

# CONTENTS

Contributors .....	vii
--------------------	-----

## **What Ever Happened to *Acetabularia*? Bringing a Once-Classic Model System into the Age of Molecular Genetics**

Dina F. Mandoli

I. Introduction .....	1
II. The Haplophase .....	22
III. The Diplophase .....	28
IV. Concluding Remarks .....	39
References .....	40
Appendix I. Cultureware and Media Preparation .....	46
Appendix II. Culture and Genetics .....	58
Appendix III. Whole Cell Biology Methods .....	65

## **The Role of the Dynactin Complex in Intracellular Motility**

Elizabeth A. Holleran, Sher Karki, and Erika L. F. Holzbaur

I. Introduction .....	69
II. Dynactin Structure and Composition .....	71
III. Mutational Analyses .....	94
IV. Models for the Function of Dynactin in Intracellular Transport .....	99
V. Concluding Remarks .....	102
References .....	103

## **Dual Mechanisms of Apoptosis Induction by Cytotoxic Lymphocytes**

Joseph A. Trapani

I.	Introduction .....	111
II.	Mechanisms of Cytotoxic-Lymphocyte-Mediated Cell Death .....	113
III.	Molecular Pathology of CL-Mediated Apoptosis .....	152
IV.	Concluding Remarks .....	168
	References .....	168

## **Drought-Induced Responses in Plant Cells**

Zohreh Tabaeizadeh

I.	Introduction .....	193
II.	Plant Cell Water Status .....	194
III.	Physiological and Biochemical Responses in Plant Cells during Drought Stress .....	195
IV.	Effects of Drought on Oxidative Stress and Gene Expression .....	208
V.	Signal Transduction Pathways Involved in the Plant Cell Response to Water Stress ...	234
VI.	Concluding Remarks .....	235
	References .....	236

## **Peptidergic Control of the Corpus Cardiacum–Corpora Allata Complex of Locusts**

Dirk Veelaert, Liliane Schoofs, and Arnold De Loof

I.	Introduction .....	249
II.	Activities of the Corpus Cardiacum and the Corpora Allata .....	253
III.	Locust Endogenous Neuropeptides .....	263
IV.	Concluding Remarks .....	288
	References .....	290
Index .....		303
