## The Phylogeny of the Insulin-like Growth Factors

Manfred Reinecke and Chris Collet

I. Introduction .....	1
II. Overview of Insulin-like Growth Factors in Mammals .....	5
III. Insulin-like Growth Factors in Nonmammalian Vertebrates .....	33
IV. IGF-like Peptides in Invertebrates .....	55
V. Molecular Evolution of the IGF System .....	59
VI. Concluding Remarks .....	69
References .....	72

## Secretion of Mucous Granules and Other Membrane-Bound Structures: A Look Beyond Exocytosis

I. Deyrup-Olsen and D. L. Luchtel

I. Introduction .....	95
II. Mucous Granules .....	97
III. Secretion of Membrane-Bound Structures Other Than Mucous Granules .....	114
IV. Concluding Remarks .....	132
References .....	133

## Immune–Endocrine Interactions in the Mammalian Adrenal Gland: Facts and Hypotheses

Gastone G. Nussdorfer and Giuseppina Mazzocchi

I.	Introduction .....	144
II.	Cytokines Involved in the Immune–Endocrine Interactions, Their Receptor Subtypes, and Signaling Mechanisms .....	145
III.	Cytokine Biosynthesis in the Adrenal Gland .....	147
IV.	Regulation of Cytokine Release in the Adrenal Gland .....	151
V.	Cytokine Receptors and Their Localization in the Adrenal Gland .....	153
VI.	Effects of Cytokines on the Secretory Activity of the Adrenal Cortex .....	153
VII.	Effects of Cytokines on the Growth of the Adrenal Cortex .....	165
VIII.	Physiological and Pathophysiological Relevance of the Immune–Endocrine Interactions in the Adrenal Gland .....	168
IX.	Concluding Remarks .....	172
	References .....	173

## The Structure, Function, and Cellular Regulation of Ryanodine-Sensitive Ca<sup>2+</sup> Release Channels

Varda Shoshan-Barmatz and Richard H. Ashley

I.	Introduction .....	186
II.	Excitation–Contraction Coupling .....	189
III.	Ryanodine-Sensitive Ca <sup>2+</sup> Release Channels .....	194
IV.	Regulation of RyR/Ca <sup>2+</sup> Release Channel Activity .....	204
V.	Modulation of RyR Activity by Protein–Protein Interactions .....	226
VI.	Modification of the RyR by Calpains .....	233
VII.	Modulation of RyR Activity by Chemical Modification .....	236
VIII.	Regulation of <i>ryr</i> Gene Expression .....	237
IX.	Concluding Remarks .....	248
	References .....	249
	Index .....	271
