Contributors .....	ix
--------------------	----

## **Control of Genes by Mammalian Retroposons**

Nikolai V. Tomilin

I. Introduction .....	1
II. Major Families of Mammalian Retroposons: An Overview .....	3
III. Control of Amplification and Distribution .....	8
IV. Retroposon-Mediated Modulation of Expression of Protein-Coding Genes .....	15
V. Evolutionary Implications and Future Prospects: Combinatorial Evolution of Regulation of Gene Expression Promoted by Retroposons .....	29
VI. Conclusions .....	33
References .....	34

## **Human Mitochondrial Diseases: Answering Questions and Questioning Answers**

Neil Howell

I. Introduction .....	49
II. Mitochondrial Genetics: Ramifications for Mitochondrial Diseases .....	50
III. The Mitochondrial Encephalomyopathies .....	64
IV. Leber Hereditary Optic Neuropathy .....	79
V. Concluding Remarks and Future Directions .....	98
References .....	101

## Occludin and the Functions of Tight Junctions

Karl Matter and Maria S. Balda

I. Introduction .....	117
II. Structural Aspects .....	119
III. Biogenesis of Tight Junctions and Targeting of Occludin .....	126
IV. Paracellular Permeability .....	131
V. Occludin and Cell Surface Polarity .....	136
VI. Regulation of Occludin .....	137
VII. Concluding Remarks .....	140
References .....	141

## Pattern Formation and Cell Differentiation: Trichomes in *Arabidopsis* as a Genetic Model System

Martin Hülskamp, Arp Schnittger, and Ulrike Folkers

I. Introduction .....	147
II. Development of Trichomes .....	148
III. Pattern Formation: Selection of a Trichome Cell .....	156
IV. Regulation of Trichome Formation .....	164
V. Trichome Cell Morphogenesis .....	168
VI. Concluding Remarks .....	174
References .....	175

## The Armadillo Family of Structural Proteins

Mechthild Hatzfeld

I. Introduction .....	179
II. Structure of Armadillo Repeat Domains .....	181
III. Classical Catenins: Armadillo, $\beta$ -Catenin, and $\gamma$ -Catenin .....	183
IV. p120 <sup>cas</sup> -Related Catenins, a Growing Subfamily of Armadillo Repeat Proteins .....	199
V. Roles of Catenins in Tumorigenesis .....	206
VI. Roles of Catenins in Regulating the Balance between Cell Adhesion and Motility .....	209
VII. Interactions of Armadillo Repeat Proteins with Microtubules .....	211
VIII. Summary and Perspectives .....	212
References .....	214

## Hepatocyte Growth Factor and the Kidney: It Is Not Just for the Liver

Daniel F. Balkovetz and Joshua H. Lipschutz

I. Introduction .....	226
II. Hepatocyte Growth Factor .....	226
III. Hepatocyte Growth Factor Receptor: c-met .....	230
IV. Effects of Hepatocyte Growth Factor <i>in Vitro</i> .....	236
V. Hepatocyte Growth Factor in Renal Development .....	244
VI. Hepatocyte Growth Factor and Kidney Disease .....	247
References .....	250

## Nature and Role of Proteasomes in Maturation of Fish Oocytes

Toshinobu Tokumoto

I. Introduction .....	261
II. Overview of Oocyte Maturation in Fish .....	264
III. Nature of Proteasomes .....	266
IV. Role of Proteasomes in Oocyte Maturation .....	276
V. Concluding Remarks .....	287
References .....	288
Index .....	295
