## The Preprophase Band of Microtubules: Its Function as a Cytokinetic Apparatus in Higher Plants

Yoshinobu Mineyuki

I. Introduction .....	1
II. The Division Site .....	3
III. Features of the PPB .....	8
IV. Occurrence of the PPB .....	11
V. Temporal Aspects of PPB Development .....	15
VI. Preparation of the Division Site .....	16
VII. Spatial Aspects of PPB Development .....	23
VIII. Molecular Aspects of PPB Organization .....	28
IX. Operation of the PPB (Division) Site .....	32
X. Other Functions of the PPB .....	34
XI. Conclusions .....	36
References .....	37

## Molecular Characteristics of the Centrosome

Søren S. L. Andersen

I. Introduction .....	51
II. On the Origin and Low-Resolution Structure of the Vertebrate Centrosome .....	55
III. Centrosomal Proteins .....	60
IV. High-Resolution Analysis of Centrosome Structure and Assembly .....	75

V. Microtubule Nucleation .....	88
VI. Concluding Remarks .....	98
References .....	98

## The Pecten Oculi of the Chicken: A Model System for Vascular Differentiation and Barrier Maturation

Hartwig Wolburg, Stefan Liebner, Andreas Reichenbach, and Holger Gerhardt

I. Introduction .....	111
II. Morphology of the Mature and Developing Blood–Brain Barrier .....	115
III. The Blood–Brain Barrier <i>in Vitro</i> .....	118
IV. The Pecten as a Reliable <i>in Vivo</i> Model of the Blood–Retina Barrier .....	120
V. The Formation of the Vascular System in the Retina .....	138
VI. Concluding Remarks .....	147
References .....	148

## Bacteriorhodopsin

Janos K. Lanyi

I. Introduction .....	161
II. The Photocycle .....	163
III. Structure of the Protein .....	166
IV. Proton Release Mechanism .....	171
V. Reprotonation of the Schiff Base .....	177
VI. Proton Uptake at the Cytoplasmic Surface and Recovery of the Initial State .....	180
VII. The Reprotonation Switch .....	182
VIII. Dissipation of Free Energy in the Photocycle .....	186
IX. Summary .....	187
References .....	188

## The Regulation of Apoptosis by Microbial Pathogens

Jeremy E. Moss, Antonios O. Aliprantis, and Arturo Zychlinsky

I. Introduction .....	203
II. Bacteria .....	205
III. Parasites and Fungi .....	223
IV. Viruses .....	224
V. Concluding Remarks .....	236
References .....	237

# **Invertebrate Opioid Precursors: Evolutionary Conservation and the Significance of Enzymatic Processing**

George B. Stefano and Michel Salzet

I. Introduction .....	262
II. Invertebrate Opioid Precursors .....	266
III. Opioid Processing .....	272
IV. Stabilization of a Signal System within Evolution .....	278
V. Conclusion .....	281
References .....	282
Index .....	287
