## Microfibrils from the Arterial Subendothelium

Françoise Fauvel-Lafève

I. Introduction .....	1
II. Structure of Subendothelial Microfibrils .....	2
III. Microfibrils and Elastinogenesis .....	19
IV. The Thrombogenicity of the Subendothelium .....	19
V. The Thrombogenicity of Type VI Collagen .....	23
VI. The Thrombogenicity of Elastin-Associated Microfibrils .....	25
VII. Conclusions and Perspectives .....	29
References .....	30

## Cultivation and Transplantation of Epidermal Keratinocytes

J. V. Terskikh and A. V. Vasiliev

I. Introduction .....	41
II. Culture of Keratinocytes .....	43
III. Behavior of Keratinocytes in Culture .....	47
IV. Transplantation of Cultured Keratinocytes .....	54
V. Concluding Remarks .....	63
References .....	64

## **Retinoids and Mammalian Development**

G. M. Morriss-Kay and S. J. Ward

I.	Introduction .....	73
II.	The Retinoic Acid Signaling Pathway in Embryogenesis .....	77
III.	Synthesis and Catabolism of Retinoic Acid in Embryonic Tissues .....	85
IV.	Nuclear Aspects of Retinoic Acid Signal Transduction .....	97
V.	Retinoic Acid in Craniofacial Development .....	99
VI.	Retinoic Acid and Limb Development .....	106
VII.	Retinoic Acid in Other Developing Systems .....	110
VIII.	Conclusions .....	116
	References .....	119

## **Gene Expression in the Epididymis**

C. Kirchhoff

I.	Introduction .....	133
II.	Ontogenesis of Epididymal Gene Expression Pattern .....	135
III.	Gene Expression in the Adult Epididymis .....	153
IV.	Factors Regulating Gene Expression in the Adult Epididymis .....	169
V.	Concluding Remarks .....	184
	References .....	186

## **Roles of Reactive Oxygen Species: Signaling and Regulation of Cellular Functions**

I. A. Gamaley and I. V. Klyobin

I.	Introduction .....	203
II.	Mechanisms Inducing Generation of ROS by Cells .....	204
III.	ROS Homeostasis in Animal Cells .....	211
IV.	Cytotoxic Effects of ROS .....	214
V.	Regulation of Cell Functions by ROS .....	220
VI.	ROS as Signal Molecules .....	223
VII.	ROS in Plants .....	235
VIII.	Concluding Remarks .....	237
	References .....	238

# High-Density Lipoprotein: Multipotent Effects on Cells of the Vasculature

Gillian W. Cockerill and Stephen Reed

I. Introduction .....	257
II. <i>In Vitro</i> Effects of HDL on Endothelial Cells .....	262
III. Effects of HDL on Leukocyte Activation .....	267
IV. Effects of HDL on Cell Transmigration .....	271
V. HDL, Thrombosis, and Platelet Function .....	273
VI. Effect of HDL on Vasoactive Molecules .....	276
VII. Acute-Phase Response and HDL .....	279
VIII. HDL Receptors and Cell Signal Transduction .....	281
IX. Concluding Remarks .....	286
References .....	287
Index .....	299
