Unusual Autonomic Ganglia: Connections, Chemistry, and Plasticity of Pelvic Ganglia

Janet R. Keast

I. Introduction	1
II. Typical Features of Autonomic Ganglia	2
III. Pelvic Ganglia	11
IV. Concluding Remarks	49
References	51

Mechanisms and Control of Embryonic Genome Activation in Mammalian Embryos

Keith E. Latham

I. Introduction	71
II. Forming the Embryonic Genome	73
III. Nuclear Changes during Cleavage Related to EGA	81
IV. Cytoplasmic Changes Controlling EGA	94
V. A Comprehensive Model for Controlling EGA	109
VI. Prospectives	111
References	113

Temporal and Spatial Coordination of Cells with Their Plastid Component

Annette W. Coleman and Andrea M. Nerozzi

I. Introduction	125
II. Basic Background Information	128
III. Architecture of Plastid DNA Genome Complexes	129
IV. Cytology of Plastid Division	134
V. Fundamental ptDNA:Plastome:Cell Size:Nuclear Ploidy Proportionality	136
VI. Molecular Aspects of Plastid DNA Synthesis	139
VII. Plastid Distribution at Cytokinesis	141
VIII. Control of Plastid Positioning	143
IX. Proteins Associated with Plastid DNA	146
X. Genetics of Plastid DNA	150
XI. Choice of Experimental Materials	153
XII. Conclusions	155
References	156

Cellular and Molecular Mechanisms of Sexual Incompatibility in Plants and Fungi

Simon J. Hiscock and Ursula Kües

I. Introduction	165
II. Molecular Mechanisms of Recognition and Mating in Fungi	170
III. Sexual Incompatibility Systems in Nonflowering Plants	213
IV. Self-Incompatibility Systems in Flowering Plants	218
V. Evolution of Mating-Type and Self-Incompatibility Systems	246
VI. Prospect	258
References	259
Index	297
