Involvement of Gap Junctional Communication in Myogenesis

Bruno Constantin and Laurent Cronier

I. Introduction	1
II. Gap Junctional Intercellular Communication	3
III. Development of Skeletal Muscle	17
IV. Involvement of Gap Junctional Intercellular Communication in Myogenesis	29
V. Concluding Remarks and Perspectives	43
References	48

Genetic Analysis of Plant Morphogenesis *in Vitro*

Munetaka Sugiyama

I. Introduction	67
II. Genetic Variation in Tissue Culture Responses	68
III. Mutational Analysis of Morphogenesis <i>in Vitro</i>	72
IV. Concluding Remarks	80
References	80

The Cell and Developmental Biology of Tendons and Ligaments

Michael Benjamin and J. R. Ralphs

I. Introduction	85
II. Cell Biology	88

III. Development	102
IV. Concluding Remarks	119
References	120

Some Aspects of Plant Karyology and Karyosystematics

Valery G. Grif

I. The Significance of DNA Amount per Genome in Plant Biosystematics	131
II. Euchromatin and Heterochromatin Bands of Plant Chromosomes	157
III. The Arrangement of Chromatin and Chromosomes during Mitosis	167
IV. Conclusion	169
References	169

Eph Receptors and Ephrins: Regulators of Guidance and Assembly

David G. Wilkinson

I. Introduction	177
II. General Properties of Eph-Related Receptors and Ephrins	178
III. Roles in Neuronal Growth Cone Guidance	186
IV. Guidance of Migrating Cells and Stabilization of Patterns	203
V. Other Roles of Eph Receptors and Ephrins	212
VI. Biochemistry of Signal Transduction by Eph Receptors and Ephrins	216
VII. General Roles of Eph Receptors and Ephrins	221
VIII. Conclusions and Perspectives	228
References	228

Renewal of Photoreceptor Outer Segments and Their Phagocytosis by the Retinal Pigment Epithelium

Jeanine Nguyen-Legros and David Hicks

I. Introduction	246
II. Photoreceptor Outer Segment–Retinal Pigment Epithelium Relationships	247
III. The Steps of the Outer Segment Renewal Process: A Survey	252
IV. Experimental Models for Studying RPE Phagocytosis and Methods for Evaluating Phagocytic Activity	270

CONTENTS

vii

V. What Can Be Learned from Phagocytosis Deficiency? The RCS Rat	275
VI. Regulating and Modulating Factors of Shedding/Phagocytosis	278
VII. Concluding Remarks and Future Directions	292
References	295
Index	315
