Somite Formation and Patterning

Estelle Hirsinger, Caroline Jouve, Julien Dubrulle, and Oliver Pourquié

I. Introduction	1
II. Origin and Commitment of the Somitic Cells	5
III. Somite Formation	8
IV. Antero-posterior Compartmentalization of the Somites	14
V. Dorso-ventral Patterning of the Avian Somite	18
VI. Medio-lateral Polarity of the Avian Somite	37
VII. Conclusion	47
References	49

Morphogenesis of the Eggshell in *Drosophila*

Gail L. Waring

I. Introduction	67
II. Morphology of the Eggshell	69
III. Identification of Eggshell Proteins	73
IV. Eggshell Genes	76
V. Posttranslational Processing of Eggshell Proteins	85
VI. Assembly	89
VII. Concluding Remarks	102
References	104

Cell Biology of the Cytochrome P-450 in the Liver

Shinsuke Kanamura and Jun Watanabe

I. Introduction	109
II. Regulatory Mechanisms for P-450 Expression in Mammalian Hepatocytes	110
III. Membrane Topology of P-450 Molecules	126
IV. Sublobular Expression of P-450	134
V. Concluding Remarks	140
References	140

Alternative Protein Sorting Pathways

John Kim, Sidney V. Scott, and Daniel J. Klionsky

I. Introduction	153
II. Retrograde Transport	154
III. Degradative Pathways	165
IV. Nondegradative Pathways	179
V. Channel-Mediated Transport	188
VI. Concluding Remarks	191
References	191

Structural Correlates of the Transepithelial Water Transport

Ekaterina S. Snigirevskaya and Yan Yu. Komissarchik

I. Introduction	203
II. Features of Epithelia	205
III. The Role of Tight Junctions in Transepithelial Transport	215
IV. Ultrastructure of Apical Membranes of Epitheliocytes	224
V. Participation of the Vacuolar System in the Cell Response on Induced Water Transport	240
VI. The Role of the Cytoskeleton in Transcellular Water Transport	250
VII. Conclusions	255
References	256

Membrane Trafficking and Processing in *Paramecium*

Richard D. Allen and Agnes K. Fok

I. Introduction	277
II. Membrane Trafficking	279

III. Membrane Modulation and Membrane Transport Systems	304
IV. Concluding Remarks	311
References	312

Role of Natural Benzoxazinones in the Survival Strategy of Plants

Dieter Sicker, Monika Frey, Margot Schulz, and Alfons Gierl

I. Introduction	319
II. General Characteristics of Benzoxazinones	320
III. Biosynthesis of Benzoxazinoids	324
IV. Mode of Action Benzoxazinoid Aglucones	332
V. Molecular Allelopathy of Benzoxazinones and Benzoxazolinones	335
VI. Concluding Remarks	341
References	341
Index	347
