## **How the Assembly Dynamics of the Nematode Major Sperm Protein Generate Amoeboid Cell Motility**

Joseph E. Italiano, Jr., Murray Stewart, and Thomas M. Roberts

|   |    |
|---|----|
| I. Introduction .....                                   | 1  |
| II. Biology of Nematode Sperm .....                     | 3  |
| III. Characteristics of Major Sperm Protein (MSP) ..... | 8  |
| IV. MSP-Based Locomotion .....                          | 13 |
| V. Conclusions and Prospects for Future Research .....  | 29 |
| References .....  | 31 |

## **Functional Specificity of Actin Isoforms**

Sofia Yu. Khaitlina

|   |    |
|---|----|
| I. Introduction .....   | 35 |
| II. General Characteristics of Actin Isoforms .....                                       | 37 |
| III. Correlation between Amino Acid Substitutions and Actin's Functional Properties ..... | 76 |
| IV. Concluding Remarks .....  | 81 |
| References .....  | 84 |

## **Cell Biology of Cardiac Development**

Michael J. Farrell and Margaret L. Kirby

|                               |     |
|-------------------------------|-----|
| I. Introduction .....         | 99  |
| II. Early Cardiogenesis ..... | 101 |

|  |     |
|--|-----|
| III. Formation of Cardiac Chambers .....       | 114 |
| IV. Development of Cardiovascular System ..... | 132 |
| V. Concluding Remarks .....                    | 144 |
| References .....                               | 144 |

## **Role of Programmed Cell Death in Development**

R. M. Ranganath and N. Rao Nagashree

|                                   |     |
|-----------------------------------|-----|
| I. Introduction .....             | 159 |
| II. Cell Death in Animals .....   | 160 |
| III. Cell Death in Plants .....   | 202 |
| IV. Synthesis and Prospects ..... | 218 |
| References .....                  | 227 |

## **Reversible Vacuolation of T-Tubules in Skeletal Muscle: Mechanisms and Implications for Cell Biology**

Sergei A. Krolenko and Jack A. Lucy

|   |     |
|---|-----|
| I. Introduction .....   | 243 |
| II. Induction of Reversible Vacuolation by Glycerol Efflux .....                      | 245 |
| III. Physiological and Pathological Significance of Vacuolation in the T-System ..... | 262 |
| IV. Transfection of Skeletal Muscle .....   | 269 |
| V. Mechanisms of T-System Vacuolation .....   | 271 |
| VI. Vacuolation in More Details .....   | 278 |
| VII. Concluding Remarks .....   | 289 |
| References .....  | 290 |
| Index .....   | 299 |
