**San Diego New York Boston
London Sydney Tokyo Toronto**

Contents

PREFACE	xi
---------------	----

Molecular and Cellular Aspects of Insulin-like Growth Factor Action

HAIM WERNER, MARTIN ADAMO, CHARLES T. ROBERTS, JR.,
AND DEREK LEROITH

I. General Introduction	1
II. Ligands	2
III. Receptors	6
IV. IGF Binding Proteins	15
V. Physiological Roles of the IGF System	20
VI. Organ/System- Involvement of IGFs	27
VII. Conclusions	38
References	39

Heterologous Expression of G Protein-Linked Receptors in Pituitary and Fibroblast Cell Lines

PAUL R. ALBERT

I. Introduction	59
II. Heterologous Expression Systems	61
III. GH Pituitary Cells as Models for Signal Transduction	64
IV. Fibroblast Cells as Models for Signal Transduction	85
V. Conclusion and Future Prospects	96
References	98

Receptors for the TGF- β Ligands Family

CRAIG H. BASSING, JONATHAN M. YINGLING, AND XIAO-FAN WANG

I. Introduction	111
II. TGF- β Ligands	113

III. TGF- β Receptors	117
IV. TGF- β Signal Transduction	131
V. Perspectives and Future Directions	151
References	152

Biological Actions of Endothelin

KATHERINE STEPHENSON, CHANDRASHEKHAR R. GANDHI,
AND MERLE S. OLSON

I. Introduction	157
II. Discovery of Endothelin	158
III. Endothelin Structure	159
IV. Endothelin Structure-Activity Relationships	161
V. Processing of Endothelin	162
VI. Genes of the Endothelin Family	164
VII. Structural Organization of the Endothelin Gene	164
VIII. Factors That Stimulate Endothelin Production	166
IX. Endothelin Receptors	166
X. Localization of Endothelin	169
XI. Endothelin-Activated Transmembrane Signaling Systems	170
XII. Biological Actions of Endothelin	172
XIII. Pathophysiology of Endothelin	175
XIV. Endothelin and the Liver	177
XV. Conclusions	183
References	183

Cyclic ADP-Ribose: Metabolism and Calcium Mobilizing Function

HON CHEUNG LEE, ANTONY GALIONE, AND TIMOTHY F. WALSETH

I. Introduction	199
II. Cyclic ADP-Ribose	201
III. Enzymes Involved in the Metabolism of Cyclic ADP-Ribose	207
IV. Cyclic ADP-Ribose-Dependent Ca^{2+} Release	221
V. Cyclic ADP-Ribose Receptor	236
VI. Physiological Roles of Cyclic ADP-Ribose	244
VII. Conclusion	249
References	251

A Critical Review of Minimal Vitamin B₆ Requirements for Growth in Various Species with a Proposed Method of Calculation

STEPHEN P. COBURN

I. Characteristics of Vitamin B ₆ Metabolism	259
II. Vitamin B ₆ Requirements for Growth	266
III. Discussion	287
IV. Summary	290
References	291
