# Contents

PREFACE .....	xi
---------------	----

## Vitamins C and E and LDL Oxidation

BALZ FREI, JOHN F. KEANEY, JR., KAREN L. RETSKY, AND KENT CHEN

I. Introduction .....	1
II. Mechanisms of LDL Oxidation .....	5
III. Antioxidant Protection of LDL by Vitamin C .....	9
IV. LDL Oxidation and Vitamin E .....	14
V. Trials of <i>in Vivo</i> Antioxidant Supplementation .....	21
VI. Conclusions .....	26
References .....	27

## Antioxidant Vitamins and Human Immune Responses

ADRIANNE BENDICH

I. Introduction .....	35
II. Free Radicals .....	36
III. Essential Micronutrients with Antioxidant Activities .....	36
IV. Immune Functions .....	37
V. Free Radicals and Immune Cell Function .....	39
VI. Clinical Examples of the Interactions of Free Radicals, Antioxidants, and Immune Function .....	42
VII. Conclusions .....	55
References .....	56

## Cytokine Regulation of Bone Cell Differentiation

MELISSA ALSINA, THERESA A. GUISE, AND G. DAVID ROODMAN

I. Introduction .....	63
II. Osteoblasts .....	63
III. Osteoclasts .....	76
IV. Summary .....	86
References .....	86

## The Molecular Pharmacology of Ovarian Steroid Receptors

ELISABETTA VEGETO, BRANDEE L. WAGNER, MARKUS O. IMHOF,  
AND DONALD P. McDONNELL

I. Introduction .....	99
II. The Mechanism of Action of Estrogen and Progesterone .....	101
III. Steroid Hormone Receptor Antagonists .....	109
IV. Final Comments .....	120
References .....	121

## Signal Transduction Pathways Combining Peptide Hormones and Steroidogenesis

MICHAEL R. WATERMAN AND DIANE S. KEENEY

I. Introduction .....	129
II. Acute Action of Peptide Hormones on Steroidogenesis .....	130
III. Chronic Action of Peptide Hormones on Steroidogenesis .....	134
IV. Conclusions and Future Directions .....	143
References .....	145

## The Roles of 14-3-3 Proteins in Signal Transduction

GARY W. REUTHER AND ANN MARIE PENDERGAST

I. Introduction .....	149
II. 14-3-3 Sequence and Structure Analysis .....	150
III. Regulation of Cellular Processes by 14-3-3 Proteins .....	153
IV. 14-3-3 Proteins and Protein Kinases .....	158
V. Roles of 14-3-3 Proteins in Signal Transduction Pathways .....	166
VI. Conclusions .....	169
References .....	170

## Physiological Roles for Parathyroid Hormone-Related Protein: Lessons from Gene Knockout Mice

ANDREW C. KARAPLIS AND HENRY M. KRONENBERG

I. Introduction .....	177
II. Strategy for Generating PTHrP-Negative Mice .....	179

CONTENTS

ix

III. The PTHrP-Negative Phenotype .....	181
IV. Summary .....	190
References .....	191

< INDEX .....	195
