G-Protein-Coupled, Extracellular Ca^{2+} -Sensing Receptor: A Versatile Regulator of Diverse Cellular Functions

EDWARD M. BROWN, PETER M. VASSILEV, STEPHEN QUINN,
AND STEVEN C. HEBERT

I. Introduction: Ca_o^{2+} -Sensing and the Maintenance of Mineral Ion Homeostasis	2
II. Indirect Evidence That Parathyroid and Other Cells Sense Ca_o^{2+} Via a G-Protein-Coupled CaR	8
III. Isolation of a Bovine Parathyroid CaR by Expression Cloning in <i>Xenopus laevis</i> Oocytes	9
IV. Structural Similarity of the CaR to Other GPCRs	12
V. Are There Other Ca_o^{2+} Sensors?	14
VI. Signal Transduction Pathways Employed by the CaR	17
VII. The CaR Gene and Regulation of CaR Expression	18
VIII. Structure-Function Relationships of the CaR	20
IX. The CaR's Tissue Distribution and Functions in Tissues Involved in Mineral Ion Homeostasis	21
X. Human Diseases Resulting from CaR Mutations Clarify the Receptor's Physiological Roles	31
XI. Tissue Distribution and Functions of the CaR in Tissues Uninvolved in Systemic Ion Homeostasis	42
XII. CaR-Based Therapeutics	55
XIII. Summary	56
References	56

Peptide Hormones, Steroid Hormones, and Puffs: Mechanisms and Models in Insect Development

V. C. HENRICH, R. RYBCZYNSKI, AND L. I. GILBERT

I. Introduction	73
II. PTTH	79
III. Juvenile Hormone and the Prothoracic Gland	92

IV. Ecdysteroid Action	93
References	115

Nuclear Matrix and Steroid Hormone Action

THOMAS J. BARRETT AND THOMAS C. SPELSBERG

I. Introduction and Background	127
II. Nuclear Matrix–Chromatin Structure	128
III. Steroid-Hormone-Induced Effects on Chromatin Structure and Matrix Composition	131
IV. Contributions of the Nuclear Matrix to Steroid-Mediated Gene Transcription	133
V. Role of the Nuclear Matrix in Steroid Hormone Signaling and Nuclear Binding	136
VI. Maintenance of the Nuclear Matrix by Steroid Proteins	141
VII. Conclusions and Future Directions	145
References	150

Coregulatory Proteins in Nuclear Hormone Receptor Action

DEAN P. EDWARDS

I. Introduction	165
II. Nuclear Receptor Superfamily: Structure and Function	166
III. Accessory Proteins That Modulate Nuclear Receptor Binding to Target DNA Sequences	169
IV. Nuclear Receptor Transcriptional Coactivators	178
V. Summary and Future Questions	200
References	204

Molecular Action of Androgen in the Normal and Neoplastic Prostate

JOHN M. KOKONTIS AND SHUTSUNG LIAO

I. Introduction	220
II. Metabolic Activation of Androgens	221
III. AR Structure	226

IV. Mechanism of AR Activation	236
V. AR Mutation	244
VI. AR Expression in the Normal Prostate and in Prostate Cancer	249
VII. Androgen-Regulated Genes	256
VIII. AR Function in Prostate Cancer	267
IX. Concluding Remarks	273
References	274

Regulation of Androgen Action

A. K. ROY, Y. LAVROVSKY, C. S. SONG, S. CHEN, M. H. JUNG,
N. K. VELU, B. Y. BI, AND B. CHATTERJEE

I. Introduction	309
II. Androgen Receptor and Androgen Response Elements	311
III. Regulation of Androgen Receptor Gene Expression	320
IV. Ligand-Mediated Activation and Inhibition of Androgen Receptor Function	323
V. Enzymatic Regulation of Androgen Action	326
VI. Mediation of Androgen Action by Peptide Growth Factors	331
VII. Androgen Action in Target Cells Containing High Levels of Androgens and Androgen Receptor	332
VIII. Summary	337
References	339

Regulation of Estrogen Action: Role of 17 β -Hydroxysteroid Dehydrogenases

HELLEVI PELTOKETO, PIIRKKO VIHKO, AND REIJO VIHKO

I. Introduction	353
II. 17HSD Enzymes	355
III. 17HSD Type 1 Enzyme and Ovarian E2 Production	360
IV. Expression and Action of 17HSD Type 1 and Type 2 Enzymes during Pregnancy	367
V. Physiological Role and Expression of 17HSD Type 1 and Type 2 Enzymes in Peripheral Tissues	373
VI. Structure and Function of 17HSD Type 1 Enzyme: Applications to the Prevention and Treatment of Estrogen-Dependent Cancers	378
VII. Regulation of <i>hHSD17B1</i> Gene Expression	381
VIII. Conclusions	385
References	386

Steroidogenic Acute Regulatory Protein

DOUGLAS M. STOCCO

I.	Introduction	399
II.	What Are the Factors Involved in the Acute Regulation of Steroidogenesis?	402
III.	The Steroidogenic Acute Regulatory Protein	404
IV.	Consequences of a Disordered StAR Gene	421
V.	Putative Mechanism of Action of StAR	425
VI.	Conclusions	429
	References	430

Regulated Expression of the Bone-Specific Osteocalcin Gene by Vitamins and Hormones

JANE B. LIAN, GARY S. STEIN, JANET L. STEIN,
AND ANDRÉ J. VAN WIJNEN

I.	Introduction	443
II.	Protein Properties and Function Rely on the Vitamin-K-Dependent Synthesis of γ -Carboxyglutamic Acid Residues	444
III.	Regulated Expression of Osteocalcin during Osteoblast Differentiation	448
IV.	Properties of the Rat Osteocalcin Promoter	458
V.	Chromatin Structure, Nucleosome Organization, and Osteocalcin Gene–Nuclear Matrix Interactions Support Interrelationships between Activities at Multiple Independent Promoter Elements	477
VI.	Closing Remarks	487
	References	488
