

# VITAMINS AND HORMONES

ADVANCES IN RESEARCH AND APPLICATIONS

*Editor-in-Chief*

GERALD LITWACK

*Department of Pharmacology*

*Jefferson Cancer Institute*

*Thomas Jefferson University Medical College*

*Philadelphia, Pennsylvania*

**Volume 57**

**ACADEMIC PRESS**

**San Diego London Boston  
New York Sydney Tokyo Toronto**

# Contents

PREFACE .....	xi
---------------	----

## Micronutrients, Vitamins, and Cancer Risk

C. J. SCHORAH

I. Introduction .....	2
II. Fruit and Vegetables: The Strength of the Connection .....	2
III. Mechanisms of Micronutrient Inhibition of Carcinogenesis .....	3
IV. Evidence for Micronutrient Prevention of Carcinogenesis .....	6
V. Conclusions .....	15
References .....	16

## Nitric Oxide and Platelet Aggregation

DAVID R. RIDDELL AND JAMES S. OWEN

I. Introduction .....	26
II. Platelet Activation .....	26
III. Platelet Inhibition .....	29
IV. Lipoproteins and Platelet Reactivity .....	36
V. ApoE Receptor 2: The Intermediary to Activate Platelet NOS .....	39
VI. Conclusions .....	41
References .....	42

## Nitric Oxide and Apoptosis

JUDITH HAENDELER, ANDREAS M. ZEIHNER, AND STEFANIE DIMMELER

I. Introduction .....	50
II. Proapoptotic Effects of Nitric Oxide .....	53
III. Antiapoptotic Effects of Nitric Oxide .....	61
IV. Peroxynitrite .....	66
V. Conclusions .....	69
References .....	70

## Cytoplasmic and Nuclear Cytokine Receptor Complexes

HICHEM C. MERTANI, GÉRARD MOREL, AND PETER E. LOBIE

I. Introduction .....	80
II. Cytokine Receptor Family .....	82
III. Cytoplasmic Cytokine Receptor Complexes .....	84
IV. Nuclear Cytokine Receptor Complexes .....	91
V. Conclusions .....	104
References .....	105

## The Guanylyl Cyclase Family of Natriuretic Peptide Receptors

STEPHANIE SCHULZ AND SCOTT A. WALDMAN

I. Introduction .....	124
II. The Natriuretic Peptides .....	124
III. The Natriuretic Peptide Receptors .....	128
IV. Structure and Function of Guanylyl Cyclase-Coupled Receptors .....	132
V. Structure and Function of ANP-C .....	136
VI. Function of Natriuretic Peptides and Their Receptors .....	139
References .....	145

## Thioredoxin in the Endocrine Response to Stress

HIROTOSHI TANAKA, YUICHI MAKINO, AND KENSAKU OKAMOTO

I. Introduction .....	154
II. Redox Regulation of Gene Expression and Thioredoxin .....	154
III. Redox Regulation of Glucocorticoid Hormone Action: Cross-Talk between Hormonal Stress Response and Peripheral Antioxidant System .....	159
IV. Discussion and Perspectives .....	166
References .....	170

## Hyper- and Hypoaldosteronism

DAVID J. TORPY, CONSTANTINE A. STRATAKIS,  
AND GEORGE P. CHROUSOS

I. Introduction .....	178
II. Physiologic Mechanisms .....	180
III. Classification and Management of Hyperaldosteronism and Related Conditions .....	184

IV. Classification of Hypoaldosteronism .....	195
V. Specific Syndromes of Isolated Hypoaldosteronism .....	198
VI. Management of Hypoaldosteronism .....	206
References .....	207

## Transcriptional Regulation of Angiotensinogen Gene Expression

ALLAN R. BRASIER, YOUQI HAN, AND CHRISTOPHER T. SHERMAN

I. Introduction .....	218
II. Tissue and Circulating Renin-Angiotensin Systems .....	219
III. Rodent AGT Gene Structure and Organization .....	221
IV. Human AGT Gene Structure and Organization .....	237
V. Summary and Future Directions .....	240
References .....	241

## 11 $\beta$ -Hydroxysteroid Dehydrogenase

PAUL M. STEWART AND ZYGMUNT S. KROZOWSKI

I. Introduction .....	250
II. Overview of Adrenal Corticosteroid Hormone Secretion and Metabolism .....	251
III. Enzymology of 11 $\beta$ -Hydroxysteroid Dehydrogenase .....	254
IV. 11 $\beta$ -Hydroxysteroid Dehydrogenase and Corticosteroid Hormone Receptor Function .....	269
V. Expression and Regulation of 11 $\beta$ -Hydroxysteroid Dehydrogenase Isozymes within Mammalian Tissues .....	272
VI. Clinical Consequences of Aberrant 11 $\beta$ -Hydroxysteroid Dehydrogenase Activity .....	284
VII. Future Developments .....	299
VIII. Summary .....	300
References .....	301

## Nongenomic Steroid Actions: Fact or Fantasy?

MICHAEL CHRIST, KARIN HASEROTH, ELISABETH FALKENSTEIN,  
AND MARTIN WEHLING

I. Introduction .....	326
-----------------------	-----

II. Evidence for Rapid Steroid Actions .....	328
III. Models of Nongenomic and Genomic Steroid Actions .....	355
IV. Conclusion .....	359
References .....	360
INDEX .....	375
