Contents

| | |
|---------------|----|
| PREFACE | xi |
|---------------|----|

Ecdysone Receptors and Their Biological Actions

LYNN M. RIDDIFORD, PETER CHERBAS,
AND JAMES W. TRUMAN

| | |
|---|----|
| I. Introduction..... | 1 |
| II. Nomenclature..... | 5 |
| III. EcR and USP Isoforms | 7 |
| IV. The Ecdysone Receptor | 7 |
| V. Biological Actions | 23 |
| VI. Regulation of EcR and USP..... | 48 |
| VII. Evolution of EcR and USP in the Arthropoda | 52 |
| VIII. Concluding Observations..... | 57 |
| References..... | 59 |

Chromatin-Remodeling Complexes Involved in Gene Activation by the Glucocorticoid Receptor

ANNIKA E. WALLBERG, ANTHONY WRIGHT,
AND JAN-ÅKE GUSTAFSSON

| | |
|--|-----|
| I. Introduction..... | 76 |
| II. The GR Belongs to the Nuclear Receptor Superfamily | 76 |
| III. Biological Effects of Glucocorticoids | 77 |
| IV. Functional Domains of the Glucocorticoid Receptor | 79 |
| V. Mechanisms of Glucocorticoid Receptor Action | 83 |
| VI. General Mechanisms of Gene Activation | 86 |
| VII. Chromatin..... | 91 |
| VIII. ATP-Dependent Chromatin Remodeling | 93 |
| IX. Histone Acetylation | 96 |
| X. Histone Deacetylation | 102 |
| XI. Diseases Linked to Chromatin | 103 |
| XII. Concluding Remarks..... | 106 |
| References..... | 107 |

Mechanism of Action of Estrogens and Selective Estrogen Receptor Modulators

VENKATESH KRISHNAN, HUNTER HEATH, AND HENRY U. BRYANT

| | |
|---|-----|
| I. Introduction..... | 124 |
| II. Estrogen | 124 |
| III. Selective Estrogen Receptor Modulators | 135 |
| IV. Phytoestrogens | 138 |
| V. Conclusion | 140 |
| References..... | 141 |

The Role of Protein Kinase C in the Development of the Complications of Diabetes

D. KIRK WAYS AND MATTHEW J. SHEETZ

| | |
|---|-----|
| I. General Introduction | 150 |
| II. PKC Biochemistry and Pharmacology | 151 |
| III. Diabetic Retinopathy | 155 |
| IV. Diabetic Nephropathy | 160 |
| V. Neuropathy | 165 |
| VI. Atherosclerosis | 171 |
| References..... | 177 |

Transcriptional Regulation of the LH β Gene by Gonadotropin-Releasing Hormone and the Protein Kinase C System

L. M. HALVORSON

| | |
|--|-----|
| I. Introduction..... | 195 |
| II. GnRH Signaling and Gonadotropin Biosynthesis | 197 |
| III. Model Systems Used in Analysis of the LH β Gene Promoter..... | 201 |
| IV. Initial Characterization of the LH β Gene 5' Flanking Region..... | 202 |
| V. Early Growth Response Protein 1 (Egr-1) and LH β Gene Expression..... | 204 |
| VI. Steroidogenic Factor-1 (SF-1) and the LH β Gene | 209 |
| VII. Sp1 and LH β Gene Expression | 215 |
| VIII. DAX-1 and the GnRH Response | 217 |
| IX. Pituitary Homeobox 1 (Ptx1) and LH β Gene Expression..... | 218 |
| X. Conclusions | 219 |
| References..... | 220 |

Angiotensin II and Calcium Channels

MICHEL F. ROSSIER AND ALESSANDRO
M. CAPPONI

| | |
|---|-----|
| I. Introduction..... | 230 |
| II. Angiotensin II Receptor Subtypes and Mode of Action | 231 |
| III. Electrophysiological Properties and Molecular Biology of the Various Types of Calcium Channels Affected by AngII | 239 |
| IV. Molecular Mechanisms of Angiotensin II-Induced Modulation of Calcium Channels | 247 |
| V. Conclusion | 268 |
| References..... | 268 |

Liposome Targeting to Tumors using Vitamin and Growth Factor Receptors

DARYL C. DRUMMOND, KEELUNG HONG,
JOHN W. PARK, CHRISTOPHER C. BENZ,
AND DMITRI B. KIRPOTIN

| | |
|--|-----|
| I. Introduction..... | 286 |
| II. Targeting of Liposomes to Vitamin Receptors: The Case of Folic Acid | 294 |
| III. Targeting Liposomes to Growth Factor Receptors..... | 307 |
| IV. Conclusions and Future Perspectives..... | 320 |
| References..... | 321 |

Vitamins and Homocysteine Metabolism

WARREN D. KRUGER

| | |
|--|-----|
| I. Introduction..... | 333 |
| II. Homocysteine Metabolism | 334 |
| III. Homocysteine and Health | 340 |
| IV. Vitamin Status and Plasma Homocysteine | 345 |
| V. Conclusion | 348 |
| References..... | 348 |

Cobalamins and Folates as Seen through
Inborn Errors of Metabolism: A Review
and Perspective

FARID I. HAURANI

| | |
|--|-----|
| I. Introduction | 353 |
| II. Background Review | 354 |
| III. Techniques and Critique | 363 |
| IV. Inborn Errors of Metabolism | 366 |
| V. Evolving Concepts and Conclusions | 374 |
| References | 375 |
| INDEX | 383 |
