

# ADVANCES IN PROTEIN CHEMISTRY

EDITED BY

FREDERIC M. RICHARDS

*Department of Molecular Biophysics  
and Biochemistry  
Yale University  
New Haven, Connecticut*

DAVID E. EISENBERG

*Department of Chemistry and Biochemistry  
University of California, Los Angeles  
Los Angeles, California*

PETER S. KIM

*Department of Biology  
Massachusetts Institute of Technology  
Whitehead Institute for Biomedical Research  
Howard Hughes Medical Institute Research Laboratories  
Cambridge, Massachusetts*

VOLUME 49

## Antigen Binding Molecules: Antibodies and T-Cell Receptors

EDITED BY

EDGAR HABER

*Department of Biological Sciences  
Harvard School of Public Health  
Harvard Medical School  
Boston, Massachusetts*

ACADEMIC PRESS

San Diego London Boston  
New York Sydney Tokyo Toronto

## CONTENTS

PREFACE . . . . .	xi
-------------------	----

### Antigen-Specific T-Cell Receptors and Their Reactions with Natural Complexes Formed by Peptides with Major Histocompatibility Complex Proteins

HERMAN N. EISEN, YURI SYKULEV, AND THEODORE J. TSOMIDES

I. Overview . . . . .	1
II. History and Background . . . . .	3
III. T-Cell Receptor Genes . . . . .	8
IV. T-Cell Receptor Proteins . . . . .	11
V. T-Cell Receptor Ligands: Peptide•MHC Complexes . . . . .	15
VI. T-Cell Responses to PepMHC . . . . .	22
VII. T-Cell Receptor Accessory Proteins . . . . .	39
VIII. Altered Peptide Ligands: Partial Agonists and Antagonists . . . . .	41
IX. MHC Restriction by Self and Nonself MHC: Paradox of Alloaggression . . . . .	43
X. Concluding Remarks . . . . .	47
References . . . . .	48

### X-Ray Crystallography of Antibodies

EDUARDO A. PADLAN

I. Introduction . . . . .	57
II. X-Ray Crystallography of Whole Antibodies . . . . .	68
III. X-Ray Crystallography of Fc . . . . .	74
IV. X-Ray Crystallography of Antigen Binding Fragments . . . . .	79
V. X-Ray Crystallography of Complexes of Antibodies with Specific Ligand . . . . .	87
VI. Conclusions . . . . .	125
References . . . . .	128

## Insight into Antibody Combining Sites Using Nuclear Magnetic Resonance and Spin Label Haptens

HARDEN M. MCCONNELL AND MARIA MARTINEZ-YAMOUT

I.	Introduction . . . . .	135
II.	Antibodies ANO <sub>n</sub> . . . . .	136
III.	Difference Spectra . . . . .	138
IV.	Selective Deuteration . . . . .	138
V.	NMR Signal Assignments . . . . .	139
VI.	Diamagnetic Haptens . . . . .	141
VII.	Distance Titrations . . . . .	143
VIII.	Combining Site Dynamics and Reaction Kinetics . . . . .	143
IX.	Crystal Structure of ANO <sub>2</sub> . . . . .	144
X.	Conformational Heterogeneity . . . . .	145
XI.	Synopsis and Outlook . . . . .	147
	References . . . . .	148

## Computational Biochemistry of Antibodies and T-Cell Receptors

JIRI NOVOTNY AND JÜRGEN BAJORATH

I.	Background . . . . .	150
II.	Tools of Computer Analysis . . . . .	154
III.	Structures, Sequences, and Superfamilies . . . . .	162
IV.	Molecular Anatomy of Antibody Binding Site . . . . .	168
V.	In Search of Effector Sites . . . . .	173
VI.	Protocols for Three-Dimensional Modeling of Binding Sites . . . . .	177
VII.	Binding Affinity and Specificity . . . . .	194
VIII.	Molecular Basis of Protein Antigenicity . . . . .	213
IX.	Antibody Engineering . . . . .	220
X.	T-Cell Receptor Modeling and Engineering . . . . .	232
	References . . . . .	236

## Catalytic Antibodies

EDWARD M. DRIGGERS AND PETER G. SCHULTZ

I.	Introduction . . . . .	261
II.	Immunological Evolution of Catalysis . . . . .	262
III.	Structural Studies . . . . .	266

IV. Evolving Functions Not Yet Found in Nature . . . . .	270
V. Unnatural Cofactors . . . . .	273
VI. Difficult Chemical Transformations . . . . .	275
VII. Future Directions . . . . .	280
VIII. Conclusion . . . . .	283
References . . . . .	284

### The Nature of the Antigen

MICHAEL SELA AND ISRAEL PECHT

I. Introduction . . . . .	289
II. Antigens, Antigenicity, Immunogenicity . . . . .	290
III. Molecular Criteria for Antigenicity . . . . .	298
IV. Role of Conformation in Antigenicity . . . . .	300
V. Antibody-Antigenic Epitope Interactions . . . . .	303
VI. Conformational Transitions Induced by Hapten Binding . . . . .	306
VII. T-Cell-Antigenic Epitope Interactions . . . . .	311
VIII. Thymus-Independent Antigens . . . . .	316
IX. Superantigens . . . . .	319
X. Tumor Antigens . . . . .	321
XI. Concluding Remarks . . . . .	323
References . . . . .	323

### Antibody Binding Sites

JAMES S. HUSTON, MICHAEL N. MARGOLIES, AND EDGAR HABER

I. Overview . . . . .	330
II. Protein Chemistry of Antibody Fragments and Antigen Binding Regions . . . . .	330
III. Engineered Antibody Binding Sites . . . . .	347
IV. Antibody Combining Site Structure: Antiarsenate and Antidigoxin Antibodies . . . . .	380
V. Enhancing Enzyme Selectivity with Substrate-Selective Antibodies . . . . .	427
References . . . . .	439

## Maturation of the Immune Response

CÉSAR MILSTEIN AND MICHAEL S. NEUBERGER

I. Introduction . . . . .	451
II. Genetic and Structural Diversity of Primary Repertoire . . . . .	454
III. Available Repertoire and Onset of Immune Response . . . . .	461
IV. Hypermutation . . . . .	464
V. Antigenic Selection . . . . .	470
VI. Structural and Evolutionary Implications . . . . .	477
References . . . . .	481
AUTHOR INDEX . . . . .	487
SUBJECT INDEX . . . . .	525
