San Diego New York Boston  
London Sydney Tokyo Toronto

# Contents

ABBREVIATIONS AND SYMBOLS .....	ix
SOME ARTICLES PLANNED FOR FUTURE VOLUMES .....	xi

## START Control in Cycling *Saccharomyces cerevisiae* Cells

Hans Küntzel, Hans-Werner Rottjakob, Angelika Schwed and Werner Zwerschke

I. G1 Phase and Cell-Cycle START .....	2
II. Growth Control by a Nutrient-Signaling Complex .....	4
III. Transcriptional Control of G1/S Genes .....	11
IV. Periodic Fluctuation of cAMP .....	20
V. A Regulatory Network Operating at START .....	21
VI. <i>Saccharomyces cerevisiae</i> Gene Symbols .....	24
References .....	25

## Adeno-associated Virus Type 2: A Latent Life Cycle

C. J. Leonard and Kenneth I. Berns

I. Structure .....	30
II. Genetic Map .....	31
III. Establishment of Latency .....	33
IV. Integration .....	35
V. Consequences of Latency .....	40
VI. Anti-oncogenesis .....	41
VII. The Permissive State .....	41
VIII. Rescue and Replication .....	43
IX. Adeno-associated Virus as a Potential Gene-Therapy Vector .....	48
References .....	49

## DNA Methylation from Embryo to Adult

Aharon Razin and Tal Kafri

I. Gene-Specific Methylation Patterns .....	55
II. Demethylation .....	56

III. Effect of Methylation on Gene Expression .....	60
IV. DNA Methylation during Embryogenesis .....	64
V. Methylation of Parental Imprinted Genes .....	71
VI. Conclusions .....	77
References .....	78

## Aminoacyl-tRNA Synthetases from Higher Eukaryotes

Lev L. Kisselev and Alexey D. Wolfson

I. Classification of Higher Eukaryotic Aminoacyl-tRNA Synthetases ...	86
II. Enzymes Tightly Associated into High-molecular-weight Complexes .....	90
III. Compartmentalization and Intracellular Localization of Mammalian Aminoacyl-tRNA Synthetases .....	105
IV. Tryptophanyl-tRNA Synthetase as an Example of "Free" Cytoplasmic Aminoacyl-tRNA Synthetase .....	107
V. Genes Encoding Higher Eukaryotic Aminoacyl-tRNA Synthetases and the Problem of Multiplicity .....	115
VI. Noncanonical Functions and Unusual Reactions Catalyzed by Aminoacyl-tRNA Synthetases .....	119
VII. Recognition between Aminoacyl-tRNA Synthetases and Their Cognate tRNAs .....	128
VIII. Concluding Remarks and Unanswered Questions .....	131
References .....	134

## The Role of Multisite Phosphorylation in the Regulation of RNA Polymerase II Activity

Michael E. Dahmus

I. Early Research on the Phosphorylation of RNA Polymerase II .....	145
II. Discovery of the C-terminal Domain .....	145
III. Phosphorylation of RNA Polymerase Subunit IIA Occurs on Serine, Threonine, and Tyrosine and Is Confined to the C-terminal Domain .....	147
IV. The <i>in Vivo</i> Ratio of RNA Polymerases IIA and IIO .....	151
V. Transcript Elongation Is Catalyzed by RNA Polymerase IIO .....	152
VI. Phosphorylation Cycle of RNA Polymerase II: A Model .....	154
VII. Discrimination between RNA Polymerases IIA and IIO in Complex Assembly .....	156
VIII. Temporal Relationship between RNA Polymerase II Phosphorylation and the Progression of RNA Polymerase II through the Transcription Cycle .....	158

IX. Interaction of the Unphosphorylated C-terminal Domain with Components of the Preinitiation Complex .....	160
X. Is There a Requirement for C-terminal Domain Phosphorylation during the Transition from Complex Assembly to Elongation? .....	163
XI. Protein Kinases That Phosphorylate the C-terminal Domain .....	165
XII. C-terminal Domain Phosphatases .....	172
XIII. Glycosylation of the C-terminal Domain .....	173
XIV. Concluding Remarks .....	174
References .....	176

## The Role of the 5' Untranslated Region of Eukaryotic Messenger RNAs in Translation and Its Investigation Using Antisense Technologies

Kostas Pantopoulos, Hans E. Johansson and Matthias W. Hentze

I. General Aspects of Translation Initiation in Eukaryotes .....	182
II. Selective Translational Regulation via 5' UTR Elements .....	194
III. Antisense Technologies .....	205
IV. Applications of Antisense Oligonucleotides to the Study of Translation .....	219
V. Abbreviations .....	227
References .....	228

## Regulation of Replication of an Iteron-containing DNA Molecule

Marcin Filutowicz, Stephanie Dellis, Igor Levchenko, Marjeta Urh, Frank Wu and Dona York

I. Components Required for Localization and Activation of Iteron-containing Replicons .....	241
II. Organization of a $\gamma$ - <i>ori</i> Replicon .....	241
III. Control of Replication .....	251
IV. Perspectives: Alternative Modes of Replication .....	264
References .....	268

## The Balbiani Ring Multigene Family: Coding Repetitive Sequences and Evolution of a Tissue-Specific Cell Function

Lars Wieslander

I. Biology of <i>Chironomus tentans</i> .....	277
II. The Secretory Proteins Encoded by the Balbiani Ring Multigene Family and Salivary-Gland Silk Formation .....	281
III. The Genes in the Balbiani Ring Multigene Family .....	285
IV. Processes in the Evolution of the Balbiani Ring Multigene Family: Increased Functional Versatility as a Result of Sequence Duplications and Remodeling of Coding Repeat Arrays .....	297
V. Concluding Remarks .....	309
References .....	309

## Uracil-Excision DNA Repair

Dale W. Mosbaugh and Samuel E. Bennett

I. Uracil Residues in DNA .....	316
II. Biological Consequences of Uracil-DNA .....	330
III. Uracil-DNA Glycosylase .....	336
IV. Bacteriophage PBS2 Uracil-DNA Glycosylase Inhibitor .....	353
V. Uracil-Excision DNA Repair Pathway .....	356
VI. Summary and Outlook .....	363
References .....	364

INDEX .....	371
