Contents

ABBREVIATIONS AND SYMBOLS	ix
SOME ARTICLES PLANNED FOR FUTURE VOLUMES	xi

Experimental Analysis of Global Gene Regulation in *Escherichia coli* 1

Robert M. Blumenthal, Deborah W. Borst
and Rowena G. Matthews

I. What Is a Global Regulator?	2
II. Methods for Experimental Analysis of Global Regulators	27
III. Experimental Analysis of Global Regulators and Their Roles in <i>Escherichia coli</i> : Some Examples	42
IV. Summary and Conclusions	73
V. Glossary	75
References	78

Eukaryotic Nuclear RNase P: Structures and Functions 87

Joel R. Chamberlain, Anthony J. Tranguch,
Eileen Pagán-Ramos and David R. Engelke

I. Ribonuclease P	88
II. Yeast Nuclear RNase-P RNA	95
III. Analysis of Mutations in <i>RPR1</i>	108
References	116

Effects of the Ferritin Open Reading Frame on Translational Induction by Iron 121

David P. Mascotti, Lisa S. Goessling, Diane Rup
and Robert E. Thach

I. The IRE and IRPs Are Necessary for Iron Inducibility of Ferritin	122
II. Sequences Downstream of the IRE Augment Its Function	126

III. Comments and Future Directions	131
References	131
Depletion of Nuclear Poly(ADP-ribose) Polymerase by Antisense RNA Expression: Influence on Genomic Stability, Chromatin Organization, DNA Repair, and DNA Replication	135
 Cynthia M. G. Simbulan-Rosenthal, Dean S. Rosenthal, Ruchuang Ding, Joany Jackman and Mark E. Smulson	
I. Biological Roles of PARP as Assessed by Studies with Chemical Inhibitors	136
II. Molecular Biological Approaches to Study Functional Roles of PARP	137
III. Induction of PARP Antisense RNA Depletes Endogenous PARP mRNA, Protein Levels, and Activity at Selected Biological Time Frames	139
IV. Influences of PARP Antisense RNA Expression on Chromatin Organization and Genomic Stability	144
V. Effects of PARP Antisense RNA Expression on Nuclear DNA Repair, Replication, and Differentiation	146
VI. Other Putative Roles of PARP Currently under Study: Apoptosis	151
References	154
The Large Ribosomal Subunit Stalk as a Regulatory Element of the Eukaryotic Translational Machinery ..	157
 Juan P. G. Ballesta and Miguel Remacha	
I. Components of the Eukaryotic Ribosomal Stalk	159
II. The Cytoplasmic Pool of the Stalk Components	165
III. The P1/P2-P0 Protein Complex	167
IV. Exchange of P Proteins in the Ribosome	169
V. Phosphorylation of the Stalk Proteins	171
VI. Functional Roles of the Eukaryotic Stalk Components	176
VII. Regulation of Ribosome Activity and Translation by the Eukaryotic Ribosomal Stalk	184
VIII. Regulation of P1 and P2 Expression	187
IX. Future Prospects	189
References	190

Regulation and Function of Adenosine Deaminase in Mice 195

Michael R. Blackburn and Rodney E. Kellems

I. Developmental and Tissue-specific Expression of <i>Ada</i>	198
II. Regulation of <i>Ada</i> Gene Expression	203
III. Physiological Role of ADA during Development	208
IV. Role of ADA in the Murine Immune System	216
V. Role of ADA in the Secondary Deciduum	219
VI. Role of ADA in the Gastrointestinal Tract	220
VII. Summary	221
References	223

S1-Nuclease-sensitive DNA Structures Contribute to Transcriptional Regulation of the Human PDGF A-chain 227

Zhao-Yi Wang and Thomas F. Deuel

I. Background	228
II. S1-sensitive Sites in PDGF A-Chain Gene	235
III. Summary and Perspective	241
References	242

Minute Virus of Mice *cis*-Acting Sequences Required for Genome Replication and the Role of the *trans*-Acting Viral Protein, NS-1 245

Caroline R. Astell, Qingquan Liu, Colin E. Harris,
John Brunstein, Hitesh K. Jindal and Pat Tam

I. <i>cis</i> -Acting Sequences Required for MVM DNA Replication	253
II. The Nonstructural Proteins of MVM	267
III. Summary and Future Directions	280
References	282
