Sydney Tokyo Toronto*

Contents

SOME ARTICLES PLANNED FOR FUTURE VOLUMES	ix
Neurofilaments in Health and Disease 1	
Jean-Pierre Julien and Walter E. Mushynski	
I. Neurofilament Structure	2
II. Neurofilament Phosphorylation	4
III. Neurofilament Functions	7
IV. Neurofilaments in Diseases	10
V. Mechanisms of Neurofilament-Induced Pathology	14
VI. Future Directions	19
References	20
Regulation of Cytochrome P450 Gene Transcription by Phenobarbital 25	
Byron Kemper	
I. Introduction	26
II. Phenobarbital Induction of Drug Metabolism	27
III. Induction of P450s in <i>Bacillus megaterium</i>	30
IV. Proximal Promoter	35
V. Distal Phenobarbital-Responsive Enhancer	41
VI. Perspectives and Models of Phenobarbital Induction of P450 Genes	55
References	62
RNA and Protein Interactions Modulated by Protein Arginine Methylation 65	
Jonathan D. Gary and Steven Clarke	
I. Introduction	66
II. Background	68
III. Identification of Protein Arginine N-Methyltransferase Genes	78
IV. Methyl-Accepting Substrates for Protein Arginine N-Methyltransferases	88
V. Determination of Arginine Methyltransferase Substrates	100

VI. Functional Roles for the Protein Arginine N-Methyltransferase and Arginine Methylation	111
VII. Future Directions	123
References	124
Genetic Regulation of Phospholipid Metabolism: Yeast as a Model Eukaryote	133
Susan A. Henry and Jana L. Patton-Vogt	
I. Introduction	134
II. Regulation of Phospholipid Metabolism in Yeast	141
III. Model for the Regulation of Genes Containing UAS _{INO}	165
IV. Summary and Future Directions	172
References	173
Inosine-5'-Monophosphate Dehydrogenase: Regulation of Expression and Role in Cellular Proliferation and T Lymphocyte Activation	181
Albert G. Zimmermann, Jing-Jin Gu, Josée Laliberté, and Beverly S. Mitchell	
I. Introduction	182
II. IMPDH Activity and Cellular Proliferation	183
III. <i>De Novo</i> Purine Biosynthesis and Salvage	184
IV. Cellular IMPDH Activity Comprises Activities of Two Isozymes	190
V. IMPDH Activity and Cellular Signaling	200
VI. <i>In Vitro</i> Effects of IMPDH Inhibition on the Immune System	201
VII. Clinical Applications for IMPDH Inhibitors	202
VIII. Summary	203
References	204
Structure and Function Analysis of <i>Pseudomonas</i> Plant Cell Wall Hydrolases	211
Geoffrey P. Hazlewood and Harry J. Gilbert	
I. Introduction	212
II. Composition and Structure of Plant Cell Walls	213
III. Plant Cell Wall Hydrolases	215
IV. <i>Pseudomonas fluorescens</i> subsp. <i>cellulosa</i>	217
V. Architecture of <i>Pseudomonas</i> Plant Cell Wall Hydrolases	218

VI. Function of Noncatalytic Domains	222
VII. Structures and Catalytic Mechanisms of <i>Pseudomonas</i> Plant Cell Wall Hydrolases	231
References	239
Regulation of the Spatiotemporal Pattern of Expression of the Glutamine Synthetase Gene 243	
Heleen Lie-Venema, Theodorus B. M. Hakvoort, Formijn J. van Hemert, Antoon F. M. Moorman, and Wouter H. Lamers	
I. Introduction	244
II. Spatiotemporal Aspects of Glutamine Synthetase Expression	246
III. Levels of Regulation of Glutamine Synthetase Expression	266
IV. Glutamine Synthetase Gene: Evolution, Structure, and Regulatory Regions	273
V. Concluding Remarks	293
References	295
Structural Organization and Transcription Regulation of Nuclear Genes Encoding the Mammalian Cytochrome c Oxidase Complex 309	
Nibedita Lenka, C. Vijayasarathy, Jayati Mullick, and Narayan G. Avadhani	
I. Introduction	311
II. Sequence Properties of Nuclear-Encoded Subunits	313
III. Structure of Nuclear-Encoded Genes	320
IV. Mechanisms of Coordinate Regulation	332
V. Summary and Future Direction	337
References	338
Control of Meiotic Recombination in <i>Schizosaccharomyces pombe</i> 345	
Mary E. Fox and Gerald R. Smith	
I. Control of Entry into Meiosis	348
II. Nuclear Cytology during Meiosis	352
III. Meiotic Recombination Hotspots	355

IV. Recombination-Deficient Mutants and Genes	361
V. Region-Specific Control of Meiotic Recombination	369
VI. Conclusion and Perspective	373
Note Added in Proof	375
References	375
The Nucleosome: A Powerful Regulator of Transcription	379
Alan P. Wolffe and Hitoshi Kurumizaka	
I. The Nucleosome Core	381
II. The Nucleosome	390
III. Transcription Factor Access to Nucleosomal DNA	400
IV. Concluding Remarks	418
References	418
INDEX	423
