University of California, Irvine  
Irvine, California*

Volume 64

ACADEMIC PRESS

San Diego London Boston New York  
Sydney Tokyo Toronto

# Contents

SOME ARTICLES PLANNED FOR FUTURE VOLUMES .....	xi
<b>ATP-Dependent Restriction Enzymes .....</b>	<b>1</b>
Desirazu N. Rao, Swati Saha, and Vinita Krishnamurthy	
I. Introduction .....	2
II. Classification of Restriction-Modification Systems .....	3
III. Type I Restriction-Modification Enzymes .....	8
IV. Type III Restriction-Modification Enzymes .....	31
V. Biological and Evolutionary Significance of Restriction-Modification Systems .....	50
References .....	55
<b>DNA Polymerase of the T4-Related Bacteriophages .....</b>	<b>65</b>
Jim D. Karam and William H. Konigsberg	
I. Introduction .....	66
II. T4 as an Experimental System for Studies of DNA Replication .....	67
III. Biological Properties of T4 DNA Polymerase .....	72
IV. Structure of gp43 .....	83
V. Perspectives and Concluding Remarks .....	89
References .....	91
<b>The Peripheral Myelin Protein 22 and Epithelial Membrane Protein Family .....</b>	<b>97</b>
Anton M. Jetten and Ueli Suter	
I. Introduction .....	98
II. Cloning and Expression of PMP22 and EMPs .....	99
III. Structure of PMP22 and EMPs .....	103
IV. Genomic Structure and Regulation .....	107
V. Putative Functions of PMP22 and EMPs in Cell Growth and Differentiation .....	111
VI. PMP22 in Myelination and Disease .....	113

VII. Summary .....	122
References .....	122

## Translational Frameshifting: Implications for the Mechanism of Translational Frame Maintenance . . . . . 131

Philip J. Farabaugh

I. Introduction .....	132
II. Nature of Translational Errors .....	133
III. Translational Accuracy and Inaccuracy .....	134
IV. Genetics of Translational Frame Maintenance .....	135
V. Programmed Alternative Decoding .....	149
VI. A Synthesis of Alternative Decoding Events .....	162
VII. Summary .....	165
References .....	166

## Syndromes Associated with *Homo sapiens* Pol II Regulatory Genes . . . . . 171

Minou Bina, Sarah Demmon, and Elsie I. Pares-Matos

I. Introduction .....	172
II. Background .....	172
III. Syndromes Associated with Regulators of Transcription .....	178
IV. Perspective .....	209
References .....	210

## Topoisomerase II as a Target for Anticancer Drugs: When Enzymes Stop Being Nice . . . . . 221

John M. Fortune and Neil Osheroff

I. Introduction .....	222
II. Type II Topoisomerases .....	223
III. Topoisomerase II Poisons .....	229
IV. Mechanism of Action of Topoisomerase II Poisons .....	231
V. Interactions between Topoisomerase II and "Poisoning" Drugs .....	236
VI. The Positional Poison Model .....	239
VII. Mechanistic Basis for Altered Sensitivity to Topoisomerase II Poisons .....	241
VIII. Topoisomerase II Catalytic Inhibitors .....	242
IX. Conclusions and Perspectives .....	244
References .....	245

## The Biological Properties and Evolutionary Dynamics of Mammalian LINE-1 Retrotransposons . . . . . 255

Anthony V. Furano

I. Introduction . . . . .	256
II. Biological Properties of L1 Elements . . . . .	257
III. History and Mechanisms of L1 Evolution . . . . .	279
IV. Impact of L1 Elements of Mammals . . . . .	288
References . . . . .	290

## Regulation of the Mammalian Alcohol Dehydrogenase Genes . . . . . 295

Howard J. Edenberg

I. The <i>ADH</i> Gene Family: Overview . . . . .	296
II. Class I <i>ADH</i> . . . . .	303
III. Class II <i>ADH</i> . . . . .	323
IV. Class III <i>ADH</i> . . . . .	325
V. Class IV <i>ADH</i> . . . . .	328
VI. Class V <i>ADH</i> . . . . .	331
VII. Class VI <i>ADH</i> . . . . .	332
VIII. Common Themes and Elements . . . . .	333
References . . . . .	334

## Transcriptional Regulation by Cyclic AMP-Responsive Factors . . . . . 343

Dario De Cesare and Paolo Sassone-Corsi

I. Introduction . . . . .	344
II. A Multigene Family of cAMP-Responsive Transcription Factors . . . . .	345
III. Mechanisms of Transcriptional Activation by CREM and CREB . . . . .	349
IV. Modularity and Versatility of the CREM Gene . . . . .	354
V. A Physiological Outlook at CREB and CREM Functions . . . . .	358
VI. Conclusions and Perspectives . . . . .	366
References . . . . .	366

## INDEX . . . . . 371
