Contents

SOME ARTICLES PLANNED FOR FUTURE VOLUMES.....	ix
---	----

Structure, Mechanism, and Evolution of the mRNA Capping Apparatus 1

Stewart Shuman

I. Genetic and Physical Organization of the Cellular Capping Apparatus.....	3
II. Structure and Mechanism of mRNA Guanylyltransferase.....	4
III. Structure and Mechanism of Yeast RNA Triphosphatase.....	12
IV. Metazoan RNA Triphosphatase.....	19
V. Assembly of the Yeast Triphosphatase-Guanylyltransferase Complex.....	22
VI. Other RNA Triphosphatases of Unknown Function.....	24
VII. Cap Methyltransferase.....	28
VIII. Perspective.....	34
References.....	35

Folding of a Nascent Peptide on the Ribosome 41

Boyd Hardesty and Gisela Kramer

I. Introduction.....	42
II. RNA Binding Sites during Translation.....	43
III. Ribosomal RNA and Peptide Synthesis.....	45
IV. Nascent Peptides.....	47
V. Tunnel in the Large Ribosomal Subunit.....	51
VI. Folding of Nascent Peptides.....	54
VII. Pause-Site Peptides.....	55
VIII. Chaperonelike Activity of Ribosomes.....	56
IX. Effects of Chaperones on Nascent Peptides.....	57
X. Problems and Prospects.....	60
References.....	62

Exoribonucleases and Their Multiple Roles in RNA Metabolism	67
Murray P. Deutscher and Zhongwei Li	
I. Overview of Exoribonuclease Diversity and Function	68
II. Catalog of Exoribonucleases	71
III. Exoribonucleases in Multienzyme Complexes	91
IV. Concluding Remarks	94
References	95
Protein Traffic in Bacteria: Multiple Routes From the Ribosome To and Across the Membrane	107
Matthias Müller, Hans-Georg Koch, Konstanze Beck, and Ute Schäfer	
I. SecA/SecB-Dependent Targeting to the SecYE Translocon	109
II. SRP-Dependent Targeting to the SecYE Translocon	115
III. Is There a Concerted Targeting by SRP and SecA/SecB to the SecYE Translocon?	123
IV. Translocation and Integration at the SecYE Translocon	124
V. Spontaneous Insertion into the Plasma Membrane	131
VI. TAT-Specific Targeting and Export	136
VII. Posttranslocational Events in the Periplasmic Space	138
References	141
The Intrinsically Unstable Life of DNA Triplet Repeats Associated with Human Hereditary Disorders	159
Richard P. Bowater and Robert D. Wells	
I. Diseases Associated with Expansions of DNA Triplet Repeats	160
II. Mechanisms of Disease Pathology Caused by Expansions of DNA Triplet Repeats	165
III. Molecular Mechanisms of Expansions and Deletions of DNA-Triplet Repeats	169
IV. Genetic Instabilities of Other Microsatellite Sequences	189
V. Summary and Future Prospects	190
References	192

Molecular and Cell Biology of Acid β -Glucosidase and Prosaposin 203

Xiaoyang Qi and Gregory A. Grabowski

I. Molecular and Cell Biology of Acid β -Glucosidase	204
II. Molecular Biology and Function of Prosaposin and Saposins	211
III. Multifunctional Roles of Saposin C and Prosaposin	221
IV. Conclusions	234
References	235

Regulation and Function of the Cyclic Nucleotide Phosphodiesterase (PDE3) Gene Family 241

Yasmin Shakur, Lena Stenson Holst, Tova Rahn Landstrom, Matthew Movsesian, Eva Degerman, and Vincent Manganiello

I. Introduction	242
II. The PDE3 Gene Family	247
III. Hormonal Regulation of PDE3 Enzymes	254
IV. Long-Term Regulation of PDE3 Enzymes	260
V. Pharmacology and Potential Therapeutic Applications of PDE3 Inhibitors	262
VI. Present and Future Therapeutic Applications for PDE3 Inhibitors	268
References	270

Understanding Nuclear Receptor Function: From DNA to Chromatin to the Interphase Nucleus 279

Gordon L. Hager

I. Identification of Regulatory Elements for Steroid Receptors	280
II. Chromatin Involvement in Gene Regulation by Steroid Receptors	281
III. Beyond the Chromatin Fiber: Receptor Trafficking in Living Cells	296
References	301

A Unique Combination of Transcription Factors Controls Differentiation of Thyroid Cells 307

Giuseppe Damante, Gianluca Tell, and Roberto Di Lauro

I. Introduction	308
II. Expression, Biological Effects, and Molecular Characteristics of the Thyroid-Specific Transcription Factors	312

III. Target Genes, Cooperativity, Recycling, and Regulation	330
IV. Thyroid-Specific Transcription Factors in Congenital Hypothyroidism ...	339
V. Conclusions and Perspectives	341
References	343
 Regulation of Metallothionein Gene Expression	357
Kalpana Ghoshal and Samson T. Jacob	
I. Metallothionein Proteins	358
II. Probable Functions of Metallothioneins	359
III. Gene Structure of Mammalian Metallothioneins	361
IV. CIS-Acting Elements in <i>MT-I</i> Promoter	362
V. Trans-Acting Factors	362
VI. Basal Expression	362
VII. Heavy Metal-Induced Expression	365
VIII. Induction by Other Agents	367
IX. Tissue-Specific Expression	370
X. Role of Repressors	371
XI. Role of Chromatin Structure	372
XII. Regulation by Epigenetic Mechanism	373
XIII. Concluding Remarks	378
References	379
 INDEX.....	385
