CONTENTS

CONTRIBUTORS

ix

Biology of the Interleukin-2 Receptor

BRAD H. NELSON AND DENNIS M. WILLERFORD

I. Introduction	1
II. The IL-2 Receptor Complex	3
III. IL-2 Receptor Expression	7
IV. Cellular Responses to IL-2 Receptor Signals	10
V. Mechanism of IL-2 Receptor Activation	19
VI. Intracellular Signaling by the IL-2 Receptor	21
VII. <i>In Vivo</i> Studies of IL-2 Receptor Function in Lymphocyte Development	42
VIII. <i>In Vivo</i> Studies of IL-2 Receptor Function in Peripheral Lymphocytes	53
IX. Summary and Conclusions	64
References	66

Interleukin-12: A Cytokine at the Interface of Inflammation and Immunity

GIORGIO TRINCHIERI

I. Introduction	83
II. IL-12 Molecule and Its Genes	86
III. IL-12 Receptor and Signal Transduction	95
IV. Production of IL-12	101
V. Molecular Control of IL-12 Gene Expression	114
VI. IL-12 Effects on Hematopoietic Stem Cells	119
VII. Induction of IFN- γ and Other Cytokines by IL-12	122
VIII. Mitogenic Activity of IL-12	127
IX. Activation of Cytotoxic Lymphocytes by IL-12	129
X. Effect of IL-12 on the Differentiation of T Helper Cells	134

XI. Effects of IL-12 on B-Cell Responses and Vaccination	148
XII. IL-12 in Delayed-Type Hypersensitivity, Airway Hyperresponsiveness, and Graft Rejection	152
XIII. IL-12 in Organ-Specific Autoimmune Diseases	157
XIV. IL-12 in the Inflammatory Response	166
XV. IL-12 in Infectious Diseases	168
XVI. Antitumor Effects of IL-12	187
XVII. Concluding Remarks	193
References	194

Recent Progress on the Regulation of Apoptosis by Bcl-2 Family Members

ANDY J. MINN, RACHEL E. SWAIN, AVERIL MA, AND CRAIG B. THOMPSON

I. Significance of Programmed Cell Death	245
II. The Genetics of Programmed Cell Death	247
III. The Bcl-2 Family	250
IV. Mitochondria Can Control Apoptosis	257
V. Structure/Function Studies of Bcl-x _L	261
VI. How Do Bcl-2 Family Members Regulate Cell Survival?	266
VII. Conclusion	269
References	271

Interleukin-18: A Novel Cytokine That Augments Both Innate and Acquired Immunity

HARUKI OKAMURA, HIROKO TSUTSUI, SHIN-ICHIRO KASHIWAMURA,
TOMOHIRO YOSHIMOTO, AND KENJI NAKANISHI

I. Introduction	281
II. Molecular Structure of IL-18 and Its Gene	282
III. Producing Cells	285
IV. Requirement of Caspase-1 for Processing of IL-18	286
V. Biological Function	287
VI. Receptors for IL-18	294
VII. Role of IL-18 in Host Defenses	298
VIII. Pathological Roles of IL-18	301
IX. Perspective	304
References	305

CD4⁺ T-Cell Induction and Effector Functions: A Comparison of Immunity against Soluble Antigens and Viral Infections

ANNETTE OXENIUS, ROLF M. ZINKERNAGEL, AND HANS HENGARTNER

I. Introduction	313
II. Activation of CD4 ⁺ T Cells	314
III. CD4 ⁺ T-Cell Effector Functions	330

IV. Conclusions	351
References	352

Current Views in Intracellular Transport: Insights from Studies in Immunology

VICTOR W. HSU AND PETER J. PETERS

I. Introduction	369
II. A General Mechanism of Intracellular Transport	373
III. Complexities of Transport <i>in Vivo</i>	383
IV. Secretory Pathways	385
V. Endocytic Pathways	392
VI. Transport in Polarized Cells	398
VII. Perspective	402
References	402

Phylogenetic Emergence and Molecular Evolution of the Immunoglobulin Family

JOHN J. MARCHALONIS, SAMUEL F. SCHLUTER, RALPH M. BERNSTEIN,
SHANXIANG SHEN, AND ALLEN B. EDMUNDSON

I. Introduction	417
II. Evolutionary Emergence of the Combinatorial Immune System	418
III. Ancient Foundations of the Combinatorial Immune System	418
IV. Emergence of <i>Bona Fide</i> Immunoglobulins	425
V. Immunoglobulins and T-Cell Receptors of Jawed Vertebrates	430
VI. Framework 4 of the Variable Domain Encoded by the Joining Segment	439
VII. Evolutionary Comparisons of T-Cell Receptors	441
VIII. Evolution of Light Chains	451
IX. Origin and Evolution of Immunoglobulin Heavy Chains	460
X. Segmental Gene Organization in Evolution	475
XI. Molecular Events Underlying the Explosive Emergence of Immunoglobulins and Their Initial Phases of Evolution	485
XII. Conclusions	491
References	492

Current Insights into the "Antiphospholipid" Syndrome: Clinical, Immunological, and Molecular Aspects

DAVID A. KANDIAH, ANDREJ SALI, YONGHUA SHENG, EDWARD J. VICTORIA,
DAVID M. MARQUIS, STEPHEN M. COUTTS, AND STEVEN A. KRILIS

I. Introduction	507
II. "Antiphospholipid" Antibodies	508
III. Clinical Features of the "Antiphospholipid" Syndrome	512
IV. β 2-Glycoprotein I	520
V. Immunogenicity and Animal Models	531

VI. Prothrombin	533
VII. Lupus Anticoagulant Antibodies and Protein C Activation	535
VIII. Lupus Anticoagulant Antibodies and Phosphatidylethanolamine	536
IX. Antiphospholipid Antibodies and Endothelial Cells	536
X. Pathogenesis of the Antiphospholipid Syndrome	537
XI. Laboratory Investigations of the Antiphospholipid Syndrome	543
XII. Antiphospholipid Syndrome and Future Therapies	545
XIII. Summary and Conclusions	547
References	548
INDEX	565
CONTENTS OF RECENT VOLUMES	573
