CONTENTS

CONTRIBUTORS

ix

$\alpha\beta/\gamma\delta$ Lineage Commitment in the Thymus of Normal and Genetically Manipulated Mice

HANS JÖRG FEHLING, SUSAN GILFILLAN, AND RHODRI CEREDIG

I. Introduction	1
II. Models of $\alpha\beta/\gamma\delta$ Lineage Commitment and Lineage Maintenance	16
III. Analysis of TCR Gene Rearrangements in $\alpha\beta$ and $\gamma\delta$ Lineage Cells	19
IV. Analysis of TCR Transgenic and Gene-Targeted Mice	35
V. Cell Culture Studies	52
VI. Developmental Considerations	53
VII. In Search of a Consensus Model for the $\alpha\beta/\gamma\delta$ Lineage Split	54
References	64

Immunoregulatory Functions of $\gamma\delta$ T Cells

WILLI BORN, CAROL CADY, JESSICA JONES-CARSON, AKIKO MUKASA,
MICHAEL LAHN, AND REBECCA O'BRIEN

I. Introduction	77
II. Origin, Lineage and Development, and Distribution	78
III. Specificity	83
IV. Functions	93
V. Concluding Remarks	123
References	124

STATs as Mediators of Cytokine-Induced Responses

TIMOTHY HOEY AND MICHAEL J. GRUSBY

I. Introduction	145
II. The STAT Gene Family	145
III. Structural and Functional Domains in STAT Proteins	146

IV. STAT-Deficient Mice	152
V. STAT Function in Cellular Proliferation and Disease	155
VI. Regulation of STAT Function	156
VII. Summary and Perspective	157
References	158

CD95(APO-1/Fas)-Mediated Apoptosis: Live and Let Die

PETER H. KRAMMER

I. Introduction	163
II. Death Receptors and Ligands	164
III. The CD95/CD95L System	166
IV. Gene Defects in the CD95/CD95L System	167
V. Role of the CD95/CD95L System in Deletion of Peripheral T Cells	168
VI. Role of the CD95/CD95L System in Liver Homeostasis	169
VII. Signal Transduction of CD95-Mediated Apoptosis	169
VIII. The Death Domain	170
IX. CD95 Associated Signaling Molecules	170
X. Other Signaling Molecules Invoked in CD95 Signaling	172
XI. Proteins of the Bcl-2 Family	172
XII. The Death-Inducing Signaling Complex (DISC)	174
XIII. Downstream Caspases in CD95 Death Receptor Signaling	176
XIV. Type I and Type II Cells	180
XV. FLIPs (FLICE Inhibitory Proteins)	181
XVI. Sensitivity and Resistance of T Lymphocytes toward CD95-Mediated Apoptosis	182
XVII. The CD95 System and Chemotherapy	184
XVIII. The CD95 Death System in AIDS	188
XIX. Further Considerations on the Role of Apoptosis in the Clinic	190
References	192

A CXC Chemokine SDF-1/PBSF: A Ligand for a HIV Coreceptor, CXCR4

TAKASHI NAGASAWA, KAZUNOBU TACHIBANA, AND KENJI KAWABATA

I. Introduction	211
II. Identification, Structure, and Expression of CXC Chemokine SDF-1/PBSF	212
III. Physiological Functions of SDF-1/PBSF	215
IV. A SDF-1/PBSF Receptor, CXCR4	217
V. HIV-1 Infection and CXCR4	219
VI. Perspectives	222
References	222

T Lymphocyte Tolerance: From Thymic Deletion to Peripheral Control Mechanisms

BRIGITTA STOCKINGER

I. Introduction	229
II. Central Tolerance Induction in the Thymus	229
III. Peripheral Tolerance	240
References	251

Confrontation between Intracellular Bacteria and the Immune System

ULRICH E. SCHAIBLE, HELEN L. COLLINS, AND STEFAN H. E. KAUFMANN

I. Introduction	267
II. What Is an Intracellular Pathogen?	268
III. How to Enter the Host Cell Is How to Survive	269
IV. Induction of Nonspecific Immunity	273
V. Phagosome Maturation and Microbial Detours	283
VI. Antigen Processing and Presentation Pathways	292
VII. T-Cell Subsets and Effector Mechanisms	307
VIII. Host Genetics Influencing the Outcome of Infection	322
IX. Immune Intervention Strategies	326
References	336

INDEX	379
CONTENTS OF RECENT VOLUMES	385
