CONTENTS

CONTRIBUTORS

ix

Biochemical Basis of Antigen-Specific Suppressor T Cell Factors: Controversies and Possible Answers

KIMISHIGE ISHIZAKA, YASUYUKI ISHII, TATSUMI NAKANO, AND KATSUJI SUGIE

I. Introduction	1
II. Historical Background	1
III. Controversial Issues on Antigen-Specific TsF and Possible Answers	17
IV. Possible Roles of GIF as a Subunit of TsF	33
V. Discussion and Summary	51
References	55

The Role of Complement in B Cell Activation and Tolerance

MICHAEL C. CARROLL

I. Introduction	61
II. Complement C3 Alters Fate of Antigen	61
III. Complement Enhancement of Humoral Immunity	65
IV. Negative Selection of Self-Reactive B Cells	72
V. Complement Deficiency and SLE	78
VI. Summary	82
References	83

Receptor Editing in B Cells

DAVID NEMAZEE

I. Introduction	89
II. Receptor Selection versus Clonal Selection	89
III. Antigen Receptor Gene Assembly by V(D)J Recombination	89
IV. Recombination Signals and the 12/23 Rule	90
V. Ig Genes of Mouse and Man	91
VI. Secondary Rearrangements	92

VII. Recombinational Accessibility	94
VIII. Quasi-ordered Rearrangements	95
IX. Allelic Exclusion	96
X. Mechanisms of Allelic Exclusion	97
XI. Ig-L-Chain Allelic Exclusion	99
XII. Receptor Editing Monitored <i>in Vivo</i> in Transgenic Models of Immune Tolerance	100
XIII. Analysis of Receptor Editing in Gene-Targeted Antibody Gene Mice	102
XIV. Central B Cell Tolerance Is Associated with Developmental Block	104
XV. Locus Specificity of B Cell Receptor Editing	106
XVI. Developmental Stage Specificity of Receptor Editing	107
XVII. A Role for Receptor Editing in Receptor Diversification?	108
XVIII. Editing in Mature, Antigen-Reactive B Cells: Receptor Revision	108
XIX. Locus Specificity of Receptor Revision	110
XX. Potential Functions of Receptor Revision	111
XXI. Problems with the Receptor Selection Concept	112
XXII. Conclusion	114
References	114

Chemokines and Their Receptors in Lymphocyte Traffic and HIV Infection

PIUS LOETSCHER, BERNHARD MOSER, AND MARCO BAGGIOLINI

I. Introduction	127
II. Expanding Functional Implications of Chemokines	127
III. Chemokines and Chemokine Receptors in Lymphocytes	129
IV. Chemokine-Mediated Signal Transduction	144
V. HIV Infection	146
References	158

Escape of Human Solid Tumors from T-Cell Recognition: Molecular Mechanisms and Functional Significance

FRANCESCO M. MARINCOLA, ELIZABETH M. JAFFEE, DANIEL J. HICKLIN, AND SOLDANO FERRONE

I. Introduction	181
II. Tumor Cell-Escape Mechanisms	190
III. Inadequacy of Tumor Cells as Targets	195
IV. Potential Role of HLA Class I Polymorphism in Tumor Cell Escape	226
V. Inhibitory Signals Provided by the Tumor Microenvironment	229
VI. Inadequate Immunogenicity of the Tumor Microenvironment	236
VII. Escaping Escape Mechanisms: Possible Immunological Alternatives	241
References	245

The Host Response to *Leishmania* Infection

WERNER SOLBACH AND TAMÁS LASKAY

I. Introduction	275
II. The Parasite	277
III. The Host's Innate Response	281
IV. The Host's Adaptive Immune Response	285
V. Persistence	299
VI. Genetic Background of Resistance and Susceptibility	300
VII. Concluding Remarks	302
References	303

INDEX	319
CONTENTS OF RECENT VOLUMES	327
