CONTENTS

CONTRIBUTORS

ix

Exploiting the Immune System: Toward New Vaccines against Intracellular Bacteria

JÜRGEN HESS, ULRICH SCHAIBLE, BÄRBELE RAUPACH, AND STEFAN H. E. KAUFMANN

I. Introduction	1
II. General Comments	2
III. Infectious Diseases Caused by Intracellular Bacterial Pathogens	7
IV. Intracellular Bacteria, Their Niches in the Host Cell, and the Immune Responses Elicited	12
V. Vaccines	26
VI. From Genomes to Antigens	59
VII. Concluding Remarks and Outlook	61
References	63

The Cytoskeleton in Lymphocyte Signaling

A. BAUCH, F. W. ALT, G. R. CRABTREE, AND S. B. SNAPPER

I. Introduction	89
II. Overview	90
III. Current View of the Regulation of Actin Polymerization in Cytoskeletal Rearrangements	94
IV. The Vav Family of Guanine Nucleotide Exchange Factors	95
V. The Regulation of Actin by Rac	98
VI. WASP and the Wiskott-Aldrich Syndrome	100
VII. WASP and the Control of Actin	104
VIII. Shared Aspects in the Phenotype of WASP- and Vav-Deficient Mice	107
IX. Actin Polymerization and the Propagation of Signals to the Nucleus	108
References	110

TGF- β Signaling by Smad Proteins

KOHEI MIYAZONO, PETER TEN DIJKE, AND CARL-HENRIK HELDIN

I. Abstract	115
II. The TGF- β Superfamily	115
III. Serine/Threonine Kinase Receptors	116
IV. Structure and Function of Smads	119
V. Cytoplasmic Actions of Smads	126
VI. Actions of Smads in the Nucleus	128
VII. I-Smads	135
VIII. Signaling Cross-Talk	137
IX. Roles of Smads in Human Cancer	140
X. <i>In Vivo</i> Functions of Smads: Analyses by Gene Targeting	142
XI. Perspectives/Conclusion	143
References	145

MHC Class II-Restricted Antigen Processing and Presentation

JEAN PIETERS

I. Introduction	159
II. The MHC Class I and Class II Pathways	160
III. Structure of MHC Class II Complexes	162
IV. Biosynthesis and Assembly of MHC Class II/Invariant Chain Complexes	171
V. Entry of MHC Class II/Invariant Chain Complexes into the Endocytic Pathway	173
VI. Subcellular Organelles Involved in Antigenic Peptide Loading onto Class II Molecules: The MHC Class II Compartments	176
VII. Transport of MHC Class II Complexes to the Cell Surface	180
VIII. Antigen Internalization	181
IX. Antigen Processing	185
X. The Biology of a Prime Antigen-Presenting Cell: The Dendritic Cell System	187
XI. Subversion of MHC Class II-Restricted Antigen Presentation by Pathogens	189
XII. Conclusions	191
References	192

T-Cell Receptor Crossreactivity and Autoimmune Disease

HARVEY CANTOR

I. Introduction	209
II. Crossreactivity and T-Cell Activation	209
III. Limits of TCR Crossreactivity: Peripheral Purging of Useless T-Cells	218

IV. TCR Crossreactivity and Autoimmune Disease: Viral-Derived Peptide Agonists	220
V. Cytokine Checkpoints in the Generation of Autoimmune Disease	223
References	226

Strategies for Immunotherapy of Cancer

CORNELIS J. M. MELIEF, RENÉ E. M. TOES, JAN PAUL MEDEMA,
SJOERD H. VAN DER BURG, FERRY OSSENDORP, AND RIENK OFFRINGA

I. Introduction	235
II. Natural Protective Immunity against Cancer	238
III. Antigen Eliciting T Cell Responses Expressed by Virus-Associated Tumors	240
IV. Antigens Eliciting T Cell Responses by Non-Virus-Induced Tumors	241
V. Processing of Tumor Antigens	246
VI. Pivotal Role of Dendritic Cells and Tumor-Specific CD4 ⁺ Helper Cells in Tumor Immunity	247
VII. Fine Tuning of T Cell Responses by TNF(-R) Family Members	249
VIII. Escape Mechanisms of Tumors	253
IX. Cancer Therapy by Adoptive Transfer of T Cells	256
X. Design of Rational Cancer Vaccines Including Molecularly Defined Adjuvants	258
XI. Tumor Immunotherapy Based on Improved Costimulation via the CD28 Pathway	261
XII. Enhancement of Tumor-Specific T Cell Responses by Cytokines and by Cytokine-Transduced Tumor Cells	262
XIII. Monitoring of Tumor-Specific T Cell Responses	263
XIV. Immunotherapy with Monoclonal Antibodies	263
XV. Epilogue	264
References	264

Tyrosine Kinase Activation in the Decision between Growth, Differentiation, and Death Responses Initiated from the B Cell Antigen Receptor

ROBERT C. HSUEH AND RICHARD H. SCHEUERMANN

I. Abstract	283
II. Introduction	283
III. B Cell Antigen Receptor Signaling Controls Several Stages of B Lymphocyte Development	284
IV. Mechanisms Governing Different Cellular Responses from the Same Receptor	288
V. Ig α and Ig β Coreceptors in BCR Signaling	292
VI. The BCR-Associated Protein Tyrosine Kinases	295
VII. The Connections between Tyrosine Kinase Activation and Cellular Responses	304
VIII. Concluding Remarks	307
References	308

The 3' IgH Regulatory Region: A Complex Structure in a Search for a Function

AHMED AMINE KHAMLICH, ERIC PINAUD, CATHERINE DECOURT, CHRISTINE CHAUVEAU, AND MICHEL COGNÉ

I. Introduction	317
II. Structure of the 3' IgH Control Region	317
III. Activity during B Cell Development	319
IV. Synergies between 3' Enhancers	320
V. DNA-Binding Proteins	323
VI. In a Search for a Function	330
VII. The Case of Humanized Mice	337
VIII. Conclusion	337
References	338
INDEX	347
CONTENTS OF RECENT VOLUMES	359
