San Diego San Francisco New York Boston London
Sydney Tokyo

CONTENTS

CONTRIBUTORS

ix

MIC Genes: From Genetics to Biology

SEIAMAK BAHRAM

I. Introduction	1
II. Genes and Genomics	5
III. Transcripts and Transcription	13
IV. Biochemistry and Biology	20
V. Genetics and Immunogenetics	30
VI. Conclusion	46
References	47

CD40-Mediated Regulation of Immune Responses by TRAF-Dependent and TRAF-Independent Signaling Mechanisms

AMRIE C. GRAMMER AND PETER E. LIPSKY

I. Introduction	61
II. Discovery of CD40 and CD154	61
III. Functional Outcomes of CD154-CD40 Signaling	70
IV. Regulation of CD40 and CD154 Expression	78
V. Role of CD40-Induced Signaling Cascades in Functional Responses of B Cells	86
VI. Conclusion	145
References	146

Cell Death Control in Lymphocytes

KIM NEWTON AND ANDREAS STRASSER

I. Introduction	179
II. Apoptosis and the Role of Caspases	179

III. Apoptosis Signaling by Death Receptors	180
IV. Apoptosis Signaling through Apaf-1 and Caspase 9	184
V. Apoptosis and Its Regulation by Members of the Bcl-2 Family	186
VI. Transcriptional and Posttranslational Control of Bcl-2 Family Members	188
VII. Apoptosis and the Immune System	189
VIII. T Cell Development—Apoptosis at the Pre-TCR Checkpoint	190
IX. Positive and Negative Selection at the Pre-T Stage of Development	193
X. T Cell Apoptosis in Peripheral Lymphoid Organs	195
XI. The TNF-R Family and T Cell Proliferation	200
XII. B Cell Development—Apoptosis at the Pre-BCR Checkpoint	200
XIII. Selection of Immature B Cells in the Bone Marrow	202
XIV. B Cell Apoptosis in Peripheral Lymphoid Organs	203
XV. Conclusion	205
References	206

Systemic Lupus Erythematosus, Complement Deficiency, and Apoptosis

M. C. PICKERING, M. BOTTO, P. R. TAYLOR, P. J. LACHMANN, AND M. J. WALPORT

I. Introduction	227
II. Description of the Associations between Complement and SLE in Humans	228
III. Animal Models of Complement Deficiency	277
IV. Complement and Inflammation in SLE	279
V. Lupus Causes Autoantibody Production to C1q	281
VI. Hypotheses for the Association between Complement Deficiency and SLE	283
VII. What Lessons Can Be Learned from Other Murine Models of Autoimmunity?	297
VIII. Conclusions	298
References	299

Signal Transduction by the High-Affinity Immunoglobulin E Receptor Fc ϵ RI: Coupling Form to Function

MONICA J. S. NADLER, SHARON A. MATTHEWS, HELEN TURNER,
AND JEAN-PIERRE KINET

I. Introduction	325
II. Signal Initiation: The Central Importance of ITAM	327
III. Phosphate Transfer and PTKs	328
IV. Phosphate Transfer and PTPs	332
V. Other Signaling Molecules	335
VI. Integration of Lipid-Protein Interactions and Calcium Flux	338
VII. From Lipid Signaling to Protein Serine-Threonine Protein Kinases	339

CONTENTS

vii

VIII. Lipid Rafts	343
IX. Conclusion	344
References	345
INDEX	357
CONTENTS OF RECENT VOLUMES	367
