
Advances in **CANCER RESEARCH**

Volume 77

Edited by

George F. Vande Woude

*Division of Basic Sciences
National Cancer Institute
National Institutes of Health
Bethesda, Maryland*

George Klein

*Microbiology and Tumor Biology Center
Karolinska Institutet
Stockholm, Sweden*

ACADEMIC PRESS

San Diego London Boston
New York Sydney Tokyo Toronto

Contributors to Volume 77 vii

The Yin-Yang of TCF/ β -Catenin Signaling

Nick Barker, Patrice J. Morin, and Hans Clevers

- I. An Introduction to the Tcf Family 2
- II. The HMG Box: DNA Binding and Bending 3
- III. Context-Dependent Transactivation 4
- IV. Functions of the Tcfs in Mammalian Development 6
- V. Wingless/Wnt Signaling Pathways 7
- VI. Tcf/ β -Catenin Complexes: Bipartite Transcription Factors Involved in Wingless/Wnt Signaling 8
- VII. Regulation of Tcf/ β -Catenin Signaling 10
- VIII. Regulation of Wingless/Wnt Target Genes by Tcfs: Activation versus Repression 15
- IX. Tcf/ β -Catenin Signaling and Cancer 17
- References 21

Biochemical and Clinical Implications of the ErbB/HER Signaling Network of Growth Factor Receptors

Leah N. Klapper, Mark H. Kirschbaum, Michael Sela, and Yosef Yarden

- I. Introduction 26
- II. Clinical Aspects of ErbB Receptors 29
- III. How Does ErbB-2 Induce Cancer? 42
- IV. Evolutionary and Developmental Aspects of the Multiplicity of ErbB Proteins 46
- V. The ErbB Signaling Network 48
- VI. ErbB-Directed Cancer Therapy 55
- VII. Conclusions 61
- References 62

p53 and Human Cancer: The First Ten Thousand Mutations

Pierre Hainaut and Monica Hollstein

- I. Introduction 81
- II. Biology of the p53 Protein 83

- III. Mutations and Variations in the p53 Gene 100
- IV. p53 Mutations in Sporadic Cancers: Host-Environment Interactions 104
- V. Clinical Relevance of p53 Mutations 119
- References 123

Macrophage Stimulating Protein

Edward J. Leonard and Alla Danilkovitch

- I. Introduction 139
- II. Structural Aspects of Native and Recombinant pro-MSP 141
- III. Binding of MSP to Its Receptor 142
- IV. A Model of MSP-Induced Receptor Dimerization 143
- V. Regulation of MSP Activity: Pathways for pro-MSP Cleavage 144
- VI. MSP-Ron Signaling 147
- VII. Modes of MSP Receptor Regulation or Activation 152
- VIII. Target Cells for Macrophage Stimulating Protein 157
- IX. Perspective 161
- References 162

CD44 Glycoproteins in Colorectal Cancer: Expression, Function, and Prognostic Value

Vera J. M. Wielenga, Ronald van der Neut, G. Johan A. Offerhaus, and Steven T. Pals

- I. Introduction 169
- II. Structure and Function of CD44 170
- III. CD44 in Tumor Progression and Metastasis 174
- IV. Conclusions 182
- References 182

A Simple Model for Carcinogenesis of Colorectal Cancers with Microsatellite Instability

Nicolas Janin

- I. Introduction 190
- II. A Simple Model of RER+ Tumor Carcinogenesis 193
- III. Evidence to Support the Model 198
- IV. Discussion 203
- V. Conclusion 218
- References 218
