Contributors to Volume 79 ix

New Paradigms for the Treatment of Cancer: The Role of Anti-Angiogenesis Agents

Julie M. Cherrington, Laurie M. Strawn, and Laura K. Shawver

- I. Introduction 2
- II. Growth Factors and Receptor Tyrosine Kinases 4
- III. Platelet-Derived Endothelial Cell Growth Factor/Thymidine Phosphorylase 16
- IV. Matrix Metalloproteinases 18
- V. Plasminogen Activator/Plasmin System 24
- VI. Integrins 26
- VII. Other 28
- VIII. Conclusions 29
- References 30

The Hepatocyte Growth Factor/Met Pathway in Development, Tumorigenesis, and B-Cell Differentiation

Robbert van der Voort, Taher E. I. Taher, Patrick W. B. Derksen,
Marcel Spaargaren, Ronald van der Neut, and Steven T. Pals

- I. Introduction 39
- II. Structure and Function of HGF and Met 40
- III. HGF/Met in B-Cell Development and Neoplasia 68
- IV. Summary 75
- References 75

Clinical Targets for Anti-Metastasis Therapy

Ann F. Chambers, Ian C. MacDonald, Eric E. Schmidt, Vincent L. Morris,
and Alan C. Groom

- I. Introduction 92
- II. Metastasis: Clinical and Experimental Considerations 93
- III. New Tools for Studying the Metastatic Process 95
- IV. New Insights into the Metastatic Process 100
- V. Targets for Anti-Metastasis Therapy: Clinical and Biological Considerations 110
- VI. Conclusions 118
- References 118

Animal Models of Melanoma: Recent Advances and Future Prospects

Nabeel Bardeesy, Kwok-Kin Wong, Ronald A. DePinho, and Lynda Chin

- I. Introduction 123
- II. Clinical Aspects of Melanoma 124
- III. Molecular Basis for Melanoma 127
- IV. Role of Receptor Tyrosine Kinases 135
- V. Model Systems for Melanoma 139
- VI. Conclusions 149
- References 150

The Indispensable Role of Microenvironment in the Natural History of Low-Grade B-Cell Neoplasms

Paolo Ghia and Federico Caligaris-Cappio

- I. Introduction 158
- II. More Characters Are Coming on the Stage 158
- III. Conclusions 170
- References 170

Epstein–Barr Virus Latency: LMP2, A Regulator or Means for Epstein–Barr Virus Persistence?

Richard Longnecker

- I. Introduction 176
- II. EBV Latency 177
- III. Latent Membrane Protein 2 178
- IV. B-Cell Signal Transduction and LMP2A 183
- V. LMP2A Site-Specific Mutant LCLs 185
- VI. Model of LMP2A and LMP2B Function *in Vitro* 189
- VII. *In Vivo* Models of LMP2A Function 191
- VIII. LMP2 Function in Epithelial Cells 192
- IX. Discussion 193
- References 197

Biochemistry and Pathological Importance of Mucin-Associated Antigens in Gastrointestinal Neoplasia

Stephan E. Baldus and Franz-Georg Hanisch

- I. Introduction 201
- II. Biochemistry and Molecular Biology of Mucins 202
- III. Alterations of Mucin Peptide and Mucin Glycosylation during Carcinogenesis 216
- IV. Expression of Mucin-Associated Antigens in Gastric Tissues 219
- V. Expression in Colorectal Tissues 224

- VI. Prognostic Relevance in Gastrointestinal Cancer 231
- VII. Serum Tumor Markers (Circulating Antigens) 233
- VIII. Functional Aspects Regarding Invasion and Metastasis 234
- IX. Perspectives in Tumor Immunology and Cancer Therapy 236
- References 238

Studies on Polyomavirus Persistence and Polyomavirus-Induced Tumor Development in Relation to the Immune System

Zsofia Berke and Tina Dalianis

- I. Introduction 249
- II. Initial Studies on Polyomavirus Infection and Polyoma-Specific Immune Responses *in Vivo* and *in Vitro* 250
- III. Molecular Characteristics of Polyomavirus 252
- IV. Polyomavirus Tumor-Specific Transplantation Antigens 253
- V. Factors Influencing Polyomavirus Persistence and Polyomavirus-Induced Tumor Development 254
- VI. Studies on Polyomavirus Persistence and Polyomavirus-Induced Tumor Development in Immunocompetent and Immunodeficient Mice 256
- VII. Concluding Remarks 271
- VIII. Future Prospects 273
- References 273
