

Advances in VIRUS RESEARCH

Edited by

KARL MARAMOROSCH

Department of Entomology
Rutgers University
New Brunswick, New Jersey

FREDERICK A. MURPHY

School of Veterinary Medicine
University of California, Davis
Davis, California

AARON J. SHATKIN

Center for Advanced Biotechnology and Medicine
Piscataway, New Jersey

VOLUME 47

ACADEMIC PRESS

San Diego London Boston
New York Sydney Tokyo Toronto

CONTENTS

Marburg and Ebola Viruses

HEINZ FELDMANN AND HANS-DIETER KLENK

I. Introduction	1
II. Epidemiology of Filoviruses	2
III. Biology of Filoviruses.	18
IV. Clinical Virology.	32
V. Pathology and Immunology.	37
Note.	42
References	42

Molecular Characterization of Pestiviruses

GREGOR MEYERS AND HEINZ-JÜRGEN THIEL

I. Introduction	53
II. Pestiviruses: Diseases, Genomes, and Proteins	54
III. RNA Recombination: The Molecular Basis for Cytopathogenicity of Pestiviruses	68
IV. Large-Scale Jumps Instead of Tiny Steps: Considerations about Viral Evolution.	111
References	113

Principles of Molecular Organization, Expression, and Evolution of Closteroviruses: Over the Barriers

A. A. AGRANOVSKY

I. Introduction	119
II. Draft of Closterovirus Taxonomy	120
III. Biological Patterns and Cytopathic Effects	121
IV. Particle Structure: Closteroviruses Are Rattlesnakes, Not Just Threads	124
V. Genome Organization and Functions of Gene Products in Closteroviruses.	129
VI. Expression Strategy.	139
VII. Evolution of Closterovirus Genomes.	147
VIII. Conclusions	152
References	153

**Comparison of the Replication of Positive-Stranded
RNA Viruses of Plants and Animals**

KENNETH W. BUCK

I.	Introduction	159
II.	Virus-Encoded Replication Proteins	163
III.	Host Proteins in RNA Replication	205
IV.	The Role of Membranes in RNA Replication	209
V.	Cis-Acting Nucleotide Sequences Required for RNA Replication	214
VI.	Control of Asymmetric Positive- and Negative-Strand Synthesis	233
VII.	Concluding Remarks	235
	References	236

**Trans-Activation of Cellular Genes by Hepatitis B Virus Proteins:
A Possible Mechanism of Hepatocarcinogenesis**

WOLFGANG H. CASELMANN

I.	Introduction	253
II.	The Hepatitis B Virus	255
III.	Hepatocellular Carcinoma	269
IV.	HBV Trans-Activators in Hepatocarcinogenesis	272
V.	Future Research Directions and Clinical Perspectives	292
	References	292

Autonomous Parvovirus and Densovirus Gene Vectors

JOE CORSINI, BORIS AFANASIEV, IAN H. MAXWELL,
AND JONATHAN O. CARLSON

I.	Introduction	303
II.	Parvoviruses	305
III.	Parvovirus Gene Vectors	317
IV.	Summary and Prospects	335
	References	338

Virus-Induced Immunopathology

BARRY T. ROUSE

I.	Introduction	353
II.	Immunopathological Lesions Which Primarily Involve CD8 ⁺ T Cells ..	354
III.	Immunopathological Reactions Primarily Involving CD4 ⁺ T Lymphocytes	358
IV.	Immune Inflammatory Responses Involving Antibody	364
V.	Viruses and Autoimmunity	365
VI.	Control of Virus-Induced Immune Inflammatory Disease	367
VII.	Conclusions	370
	References	372

**Geographic and Molecular Epidemiology of Primate T Lymphotropic
Retroviruses: HTLV-I, HTLV-II, STLV-I, STLV-PP, and PTLV-L**

ANTOINE GESSAIN AND GUY DE THÉ

I. Introduction and Historical Background	377
II. Epidemiological Characteristics of the Different PTLVs	380
III. Genetic Structure of HTLV-I/II	382
IV. Methods Used in Molecular Epidemiology of PTLVs	385
V. HTLV-I	387
VI. STLV-I: Close Phylogenetic Relationship with HTLV-I	403
VII. HTLV-II.	404
VIII. STLV-PP and PTLV-L.	409
IX. Conclusions and Perspective: HTLV-I/II as Privileged Markers of Migration of Ancient Human Populations	411
References	412
INDEX.	427
