

Advances in VIRUS RESEARCH

Edited by

KARL MARAMOROSCH

Department of Entomology
Rutgers University
New Brunswick, New Jersey

FREDERICK A. MURPHY

School of Veterinary Medicine
University of California, Davis
Davis, California

AARON J. SHATKIN

Center for Advanced Biotechnology and Medicine
Piscataway, New Jersey

VOLUME 52

ACADEMIC PRESS

San Diego New York Boston
London Sydney Tokyo Toronto

CONTENTS

Picornaviruses: Epitopes, Canyons, and Pockets

THOMAS J. SMITH AND TIMOTHY BAKER

I. Introduction	1
II. Background	2
III. Antibody-Mediated Neutralization	2
IV. Canyon Hypothesis	8
V. Pockets	10
VI. Pocket Factors	14
VII. Viral "Breathing"	15
VIII. Thermodynamic Model for Viral Uncoating	16
References	19

Naturally Occurring Variants of Hepatitis B Virus

STEPHAN GÜNTHER, LUTZ FISCHER, IRMGARD PULT, MARTINA STERNECK,
AND HANS WILL

I. Introduction	26
II. HBV Sequence Variation	30
III. Variants with Mutations in Pre-C Region	37
IV. Variants with Mutations in C Gene	56
V. Core Promoter Variants	70
VI. Mutations Changing X Protein Structure and Function	80
VII. S Gene Variants	81
VIII. Mutations Changing P Protein Structure and Function	95
IX. Variants with Grossly Altered Genome Structure	97
X. Conclusions and Hypotheses	101
References	105

Kaposi's Sarcoma-Associated Herpesvirus: Epidemiology, Virology, and Molecular Biology

RONIT SARID, SONJA J. OLSEN, AND PATRICK S. MOORE

I. Introduction	140
II. Discovery and Initial Characterization of KSHV	142
III. Epidemiology of KSHV and Etiology of KS	144

IV. KSHV Virology and Molecular Biology	169
V. KSHV Genes	182
VI. KSHV Gene Expression	201
VII. KSHV and Tumorigenesis	204
VIII. Future Directions	207
References	208

Role of Chemokine Receptors in HIV-1 Infection and Pathogenesis

TED M. ROSS, PAUL D. BIENIASZ, AND BRYAN R. CULLEN

I. Introduction	233
II. HIV/SIV Entry and Chemokine Receptor Selectivity	234
III. Evidence for Chemokine Receptors as Cofactors for HIV-1 Entry	235
IV. Mechanism of Action of Coreceptors	238
V. Expression Patterns and Regulation of Chemokine Receptors	246
VI. Viral Determinants of Coreceptor Recognition	248
VII. Coreceptor Utilization by HIV/SIV <i>in Vivo</i>	251
VIII. Implications for HIV Disease Treatment	255
IX. Conclusions	256
References	256

SPECIAL SECTION: RETROVIRAL INTEGRATION

GUEST EDITOR: ANNA MARIE SKALKA

Introduction

ANNA MARIE SKALKA

Text	271
------------	-----

Nuclear Import of Human Immunodeficiency Virus Type-1 Preintegration Complexes

RON A. M. FOUCHIER AND MICHAEL H. MALIM

I. Introduction	275
II. Pathways of Cellular Nuclear Import	276
III. Nuclear Import in Nonretroviral Systems	277
IV. HIV-1 Infection of Nondividing Cells	280
V. Isolation and Composition of HIV-1 Preintegration Complexes	280
VI. NLSs in HIV-1 Preintegration Complex Proteins	281
VII. Models for HIV-1 Preintegration Complex Nuclear Import	286
VIII. Some Future Questions	289
IX. Relationships between Oncoretrovirus and Foamy Virus Infections and the Cell Cycle	290

X. Summary	292
References	292

Host Proteins in Retroviral cDNA Integration

FREDERIC D. BUSHMAN

I. Introduction	301
II. Assaying cDNA Integration <i>in Vitro</i>	302
III. Host Proteins Involved in Early Steps of cDNA Integration	304
IV. Host Proteins Involved in Late Stages of Integration Reaction	308
V. Proteins Influencing Target Site Selection	309
VI. Summary and Future Directions	312
References	312

HIV Integrase Structure and Function

DOMINIC ESPOSITO AND ROBERT CRAIGIE

I. Introduction	319
II. Domain Structure of HIV-1 Integrase	320
III. Catalytic Core Domain	321
IV. N-Terminal Zinc-Binding Domain	322
V. C-Terminal Domain	323
VI. Multimeric Organization of HIV Integrase	324
VII. HIV Integrase-DNA Interactions	326
VIII. Summary	328
References	329

Crystal Structures of Catalytic Core Domains of Retroviral Integrases and Role of Divalent Cations in Enzymatic Activity

ALEXANDER WLODAWER

I. Introduction	335
II. Domain Structures of IN and Enzymatic Activity of Its Core	336
III. Structural Studies of Catalytic Domain of IN	337
IV. Active Site	339
V. Role of Dimer	340
VI. Binding of Divalent Cations	341
VII. Activity of ASV IN Catalytic Domain with Various Divalent Cations	342
VIII. Comparison with Related Enzymes	343
IX. Comparison of Divalent Cation Binding Sites in IN and Related Enzymes	344

X.	Inhibitors of IN	345
XI.	Summary	346
	References	347

HIV-1 Integrase: Structural Organization, Conformational Changes, and Catalysis

ERNEST ASANTE-APPIAH AND ANNA MARIE SKALKA

I.	Introduction	351
II.	Structural Organization of IN	352
III.	Functional Oligomer	355
IV.	Metal-Induced Conformational Changes	358
V.	Structural Features That Mediate Conformational Changes in HIV-1 IN	360
VI.	Conformational Changes and Catalysis	362
VII.	Conclusion	363
VIII.	Summary	364
	References	365

Substrate Recognition by Retroviral Integrases

MICHAEL KATZMAN AND RICHARD A. KATZ

I.	Introduction	371
II.	DNA Substrates	373
III.	<i>In Vitro</i> Assays	373
IV.	Recognition of Viral DNA	375
V.	Recognition of Host DNA	383
VI.	Perspective	386
VII.	Summary	387
	References	388

Reconstitution of Concerted DNA Integration with Purified Components

PATRICK HINDMARSH AND JONATHAN LEIS

I.	Characteristics of Retrovirus DNA Integration <i>in Vivo</i>	397
II.	Oligodeoxynucleotides as Integration Substrates	398
III.	Early <i>in Vitro</i> Reconstitution Integration Systems	399
IV.	Reconstitution of ASV Concerted DNA Integration	401
V.	Mutations in U5 or U3 LTRs That Influence Integration	403
VI.	Reconstitution of HIV-1 Concerted DNA Integration	404
VII.	HMG Proteins	405
VIII.	Role of HMG Proteins in Integration	406
IX.	Conclusion	407
	References	407

***In Vivo* Analysis of Retroviral Integrase Structure and Function**

ALAN ENGELMAN

I. Introduction	411
II. Retroviral <i>att</i> Locus	411
III. Structure and Function of Retroviral IN	415
IV. Class I IN Mutant Viruses	416
V. Class II IN Mutants: Defective Reverse Transcription and Particle Morphogenesis/Release	417
VI. Complementation of IN Defects with Vpr Fusion Proteins	421
VII. Summary	422
References	423

Inhibitors of Human Immunodeficiency Virus Integrase

YVES POMMIER AND NOURI NEAMATI

I. Introduction	427
II. Possible Sites of Action for Integration Inhibitors	428
III. Assays and Discovery of Inhibitors	436
IV. Inhibitors Reported to Date	442
V. Conclusions	448
VI. Summary	448
References	448
