Gregg L. Semenza, M.D., Ph.D.

*Institute of Genetic Medicine  
Johns Hopkins University  
School of Medicine*

New York Oxford  
Oxford University Press  
1998

# Contents

## Part I: Transcriptional Regulation

1. Gene Expression and Transcriptional Regulation, 3
2. *Cis*-acting Transcriptional Regulatory Elements, 26
3. *Trans*-acting Factors, 42

## Part II: Transcriptional Pathophysiology

4. Mutations in *Cis*-acting Transcriptional Regulatory Elements, 113
5. Mutations in Genes Encoding Transcription Factors: The Nuclear Receptor Superfamily, 127
6. Other Zinc Finger Proteins: WT1 and GLI3, 155
7. PAX Proteins, 169
8. bHLH Proteins, 199
9. Homeodomain Proteins, 212
10. HMG Domain Proteins, 247
11. POU Domain Proteins, 261
12. Other Transcription Factor Families, 272
13. Coactivators, 289
14. General Transcription Factors, 299
15. Somatic Cell Genetic Disease: Cancer, 310
16. Epigenetic Disease: Teratogenesis, 347

Index, 359
