TABLE OF CONTENTS

Preface ................................................................. 1
The Edman Award ...................................................... 4
In Memory ............................................................. 6

SEQUENCER METHODOLOGY AND INSTRUMENTATION

Modular Berlin microsequencer for the sequential degradation of proteins and peptides from the amino- and carboxyl-terminal ends

C-terminal sequence analysis

Chemical C-terminal sequencing
D. H. Hawke and V. L. Boyd ........................................ 35

Extending the performance of the solid-phase protein sequencer
R. A. Laursen, Th. T. Lee, J. D. Dixon and S.-P. Liang .................. 47

Direct microsequencing of blotted and covalently attached proteins in a cross-flow reaction chamber
H. Reinke, S. Fischer, F. Reimann and H. Tschesche .................. 55
SAMPLE PREPARATION AND ANALYSIS

Current strategies for microscale purification of proteins and peptides for sequence analysis

Capillary electrophoresis: A new dimension in the separation sciences
T. Large .................................................................................................................. 79

Structural analysis of membrane proteins
J. E. Shiveley ......................................................................................................... 91

Protein-electroblotting and microsequencing in establishing integrated human protein databases
H. H. Rasmussen, J. Van Damme, G. Bauw, M. Puype, B. Gesser, J. E. Celis and J. Vandesekerckhove ................................................................. 103

Comparison of the blotting efficiencies of various PVDF membranes
P. Matsudaira .......................................................................................................... 115

Highly sensitive determination of amino acid derivatives obtained from N-terminal sequence analysis
A. Tsugita and M. Kamo ....................................................................................... 123

Amino acid analysis and sequencing - What is state-of-the-art?

Realistic expectations for amino acid analysis

MODIFIED RESIDUES, CHEMICAL PROBLEMS AND SYNTHETIC PEPTIDES

A protein chemistry approach to the modelling of integral membrane proteins
J. B. C. Findlay .................................................................................................. 151

N-terminal acetylated mitochondrial aldehyde dehydrogenase is found in fresh but not frozen liver tissue
H. Weiner, S. C. Cunningham and R. A. Angelo .................................................. 161
Elucidating ligand binding sites in polypeptides by photoaffinity labeling with aryl azides  
*H. Ponstingl, L. D. Barnes, C. Granzow, R. H. Himes, G. Maier and G. Nasioulas*  

Use of thiopropyl-Sepharose 6B for isolation and structure-functional analysis of thiol proteins  
*T. A. Egorov*  

Zinc fingers involved in MHC class I gene regulation: Use of synthetic peptides for structural analysis  
*E. Appella, J. G. Omichinski, G. M. Clore, A. M. Gronenborn and K. Sakaguchi*  

Hydrophobic surfactant proteins SP-B and SP-C: Special analytical problems  
*J. Johansson, T. Curstedt, P. Persson, B. Robertson, B. Löwenadler and H. Jörnvall*  

**PROTEOLYSIS**  

The yeast prohormone-processing Kex2 protease, an enzyme with specificity for paired basic residues  
*R. S. Fuller, C. Brenner, P. Gluschankof and C. A. Wilcox*  

Structures of three inhibitor complexes of HIV-1 protease  
*A. Wlodawer, M. Miller, A. L. Swain and M. Jaskolski*  

Protease specificity and protein sequence analysis  
*L. Polgar*  

Cleavage-sites in protein targeting signals  
*G. von Heijne*  

Studies on a dimeric aspartic protease from a single domain of pepsin  
*H. Mattras, L. Chiche, M. Bianchi, R.-A. Boigegrain, B. Castro and M.-A. Coletti-Previero*  

**MASS SPECTROMETRY**  

LC/MS and LC/MS/MS screening for the sites of post-translational modification in proteins  
*T. Covey, B. Shushan and R. Bonner*
Protein and peptide sequence analysis by tandem mass spectrometry in combination with either capillary electrophoresis or micro-capillary HPLC

Plasma desorption mass spectrometry as a tool for characterization of native and modified forms of recombinant polypeptides
M. Hartmanis ................................................................. 267

Plasma desorption mass spectrometry in monitoring peptide synthesis and phosphorylation reactions

SYNERGISM WITH DNA ANALYSIS

Repeating domains in the plasma proteins participating in blood coagulation and fibrinolysis
A. Ichinose and E. W. Davie ................................................................. 285

Structural analysis of the glucocorticoid receptor protein

C1 inhibitor: structure, genetic variants and serpin homologies
S. Magnusson, S. C. Bock and K. Skriver ................................................................. 301

Genetic strategies for protein purification
S. Ståhl, P.-Å. Nygren and M. Uhlén ................................................................. 313

PREDICTIONS, DATA BANKS, PATTERNS AND TERTIARY STRUCTURES

The prediction of the secondary structure of proteins
G. D. Fasman ................................................................. 321

A computer method of finding supersecondary structure
K. Nagano ................................................................. 333

Usefulness of the PIR database for protein comparisons
L. T. Hunt ................................................................. 343
The structure and post-translational modification of lipoyl domains in 2-oxo acid dehydrogenase multienzyme complexes
R. N. Perham, F. Dardel, E. D. Laue and L. C. Packman ........................................... 353

Zinc chemistry in function and structure of zinc proteins
B. L. Vallee and D. S. Auld ................................................................. 363

Patterns of sequence variation in families of homologous proteins

Protein folding: Local structures, domains and assemblies
R. Jaenicke ................................................................. 387

Keyword Index ................................................................. 397
